Lightning-Fast Loading Speed

For every second it takes your website to load, you lose 7% in conversions*. That is why Google is now using page speed as a ranking factor. Visitors are more likely to engage with your website if your content is delivered faster.

Our websites are built for speed and work on all devices. In addition to the SEO benefits improved page speed brings to your business, there are many conversion and engagement advantages, such as:

70% longer sessions*

60% more page views*

35% lower bounce rate*

Google is now using page speed and mobile friendliness as a ranking signal.

Our websites are optimised independently for desktop, tablet and mobile.

Capture Your Customers' Attention

Have you ever noticed personalised offers or notifications that display on websites based on your browsing habits? Large organisations like Amazon and Google do this all the time. Now it's your turn.

Triggers

Choose a trigger to activate your website personalisation. Triggers can include times date of the year, location, number of previous visits and more.

Actions

After you choose a trigger, select from ready-made actions such as popups and notification bars. You can promote offers, encourage bookings, run deals or even increase reservations.

Conversions

Engage site visitors by displaying customised actions at exactly the right time and watch your conversion rate soar.

What are the benefits?

Responsive Design

Your site will work perfectly on desktop, tablet and mobile, so customers have the best possible experience on every device.

SEO Help

We'll make sure your site is Google-friendly by customising the SEO settings to make it easier for customers to find you online.

Analytics

We employ a full suite of analytics and tracking software so you can see how your online efforts are paying off.

Reliable Hosting

All of our websites are hosted on Amazon's worldwide hosting service, so you know your site will always be available online.

Advanced Widgets

We use a variety of widgets designed to get you more phone calls, appointments, reservations, visitors and customers.

Social Media

Connect with your customers when they are not on your website. We will add social icons so visitors can easily follow you.
