

# Setting up..... Changes in Industries

**TESLACARE**  
Innovations

## Our Profile...

### Products

#### Electronic Solutions

Research and Development  
Manufacturing  
Testing

#### Power Supply Units

SMPS  
Phase Converters  
Inverter  
Solar charge Controller

#### Customized PLC

#### Custom DC Motor Drives

#### High Voltage Power Supply Units

### Services

#### Embedded Design

Hardware & Software  
Testing Firmware development  
Test Fixture Development

#### PCB Design Solutions

Schematic, Layout  
Terminal Diagram  
Product Level Functional Diagrams

#### Software Development

VB Standalone Development  
Data Logging Software  
IOT interface API

#### Technical Analysis

Problem Analysis  
Feasibility study for new developments  
Cutting edge Solutions

#### 3D Printing Services

Green Destinations with a Sustainable Technology

An Innovative Organization founded in 2019 by two engineers who wanted to achieve and implement technology in a greater way to mankind. Teslacare Innovations involved in research and development of Electronic solutions offering design, development, manufacturing and technical assistance to various applications like Food industry, Agriculture and Industrial Automation.

Our Organization provides technological solutions to the products and business owners in-terms of Quality and reliability. Our products are well engineered with the better R&D team and ensure a greener solution to the market.
