

TESLACARE Innovations

An Innovative Startup Company Focussing

R&D Activities

Manufacturing of Ozone Generators [OEM],

Water and Air Treatment, PCB Design Solutions,

Automated Irrigation Systems.

Teslacare Innovations was founded in 2019 by two Engineers who wanted to achieve water and air treatment with no residues (Chemical free Solution). Continuous development in Technology and Innovations lead us to design products to water and air treatment, Seed Germination process and Agri Irrigation automation process.

Teslacare Innovations

- Quality & Assurance
- Service and Support
- Agile Development Process
- Customized Applications
- Field oriented developments

Products & Services

Industrial Water Treatment

Agri Farms

Automation Industries

R & D Facilities

Embedded Products

Design and Development
