

To Whom It May Concern,

I am pleased to recommend Tirre Logston. Tirre has consistently demonstrated the skills, professionalism, and dedication that make for an exceptional future educator.

In our STEM Lab, which she built and led for K-5 students, she embraced hands-on, project-based learning. Tirre quickly learned how to guide students through inquiry-driven activities, encourage creative problem-solving, and foster a classroom environment where every child felt confident and capable.

As part of our two-way immersion program, we serve a diverse community of multilingual learners. Tirre excelled at supporting these students by designing clear lessons and adapting instruction to meet the varied learning needs of each student.

Tirre is also highly capable with instructional technology. In a school where digital tools are used daily, Tirre demonstrated confidence and initiative—frequently integrating technology into lessons and problem-solving tech challenges with ease.

Overall, Tirre shows great promise as an educator. Tirre's creativity, adaptability, and genuine care for students will make her an asset to any school community. I fully recommend Tirre for any teaching position or program they pursue.

Sincerely,

Lori Miller *Lori Miller*
