How It Works

EMSCULPT NEO is the world's first and only technology that uses **Radiofrequency and HIFEM+** (high intensity focused electromagnetic field) to **eliminate fat and build muscles non-invasively.**

RF

HIFEM+

Fat Breakdown

In less than 4 minutes the **temperature in fat reaches** levels that cause their **permanent damage.**

Muscle Warm-Up

The muscle **temperature raises** by several degrees, **similar to what a warm-up activity does before any workout.**

LESS **-30%**
Fat

on average*

+25% MORE
Muscle

on average*

Supramaximal Contraction

Muscles in the treated area **are contracted at intensities** that are **not achievable during routine exercise.**

After Treatment

The fat cells are slowly removed from the body and the strained **muscle fibers initiate a growth process.** This results in **fat elimination and muscle building.**

More Applicators & Body Parts

Emsculpt NEO individually tailored treatments can help you **eliminate fat and build muscles on various body parts.**

Frequently Asked Questions

Why is Emsculpt NEO the ONE in body shaping?

EMSCULPT NEO is the first procedure to provide simultaneous fat elimination and muscle building in a combined 30-minute session.

Am I a candidate?

Everybody can benefit from more muscles and less fat. Ask your provider if the treatment is suitable for you.

What is the treatment time?

Four 30-minute treatments scheduled once a week are recommended. Your provider will help you create a treatment plan tailored to your specific goals.

Is there any downtime?

Any pre/post-treatment preparation?

EMSCULPT NEO is a non-invasive procedure that requires no recovery time or any pre-treatment preparation.

What does it feel like?

EMSCULPT NEO procedure feels like an intense workout with a warming sensation in the treated area. You can lay down and relax during the treatment.

Does it really work?

YES! EMSCULPT NEO showed consistency in eliminating fat and/or building muscle in seven latest clinical studies. Moreover, 30 scientific publications make HIFEM-brand technology the most intensively researched body contouring technology since its introduction in 2018.

How fast will I see results?

You begin to feel tangible results right after the treatments. Positive results are usually reported two to four weeks after the last session and continue to improve for several weeks following treatment.

Your results may vary. You may feel intense heat during the treatment, but it should never be painful. If you experience pain during the treatment, immediately discontinue the treatment and speak with your treatment provider. Treatment should not be applied over clothing or scar tissue, or if you have electronic or metal implants. As with any heat-based therapy, burns may result. As with any medical procedure, ask your doctor if the EMSCULPT NEO® procedure is right for you. EMSCULPT NEO® is indicated for non-invasive lipolysis (breakdown of fat) of the abdomen and thighs and reduction in circumference of the abdomen and thighs with Skin Type I to Skin Type VI; and for non-invasive lipolysis (breakdown of fat) of the upper arms limited to skin types II and III and BMI 30 or under. EMSCULPT NEO® is also indicated for improvement of abdominal tone, strengthening of the abdominal muscles, development of firmer abdomen; strengthening, toning, and firming of buttocks, thighs, and calves; and improvement of muscle tone and firmness, for strengthening muscles in arms. ©2022 BTL Industries, Inc. and affiliated companies.
