## SUMMARY

Tailored for mid-size organisations (200-5,000 employees), the **Enterprise Health Program** delivers precise, industry-specific diagnostics to uncover hidden inefficiencies draining millions in value. Backed by psychological research with thousands of respondents and protected as a registered EU innovation, the **Program** has been successfully implemented across industries, driving measurable performance improvements.

## PROGRAM

It provides comprehensive **Audit** of Your company's organisational performance, offering a holistic diagnostic across 6 critical areas:

- *Greatness (diagnosis of excellence)*
- *Employee engagement & talent retention*
- *Organisational self-deception*
- *Psychosocial assessment (ESG recommendation)*
- *Time management*
- *Customisable diagnostics tailored to client priorities.*

The **Audit** goes beyond traditional KPIs, offering a data-driven, actionable diagnosis of where companies lose efficiency and competitiveness. Through the **Transformation** we help You turn inefficiencies into engines for strategic growth and innovation while adhering to **GDPR** standards for data privacy and protection.

## HOW IT WORKS

**Interview:** 30-min call to spot potential blind spots.

**Enterprise Health Survey:** quick, 10-min self-assessment producing a complimentary Report with landscape overview.

**Enterprise Health Audit:** 1-2-months in-depth diagnosis across 6 performance areas, concluded with targeted leadership workshops.

**Enterprise Health Transformation:** 12-month program feat. talent-job optimisation, comparative diagnostics, and leadership coaching for companies seeking sustained enhancement of performance
