

Carbo  **Tico**

About us

Carbotico, is a Costa Rica company, that was founded with the purpose of innovating and improving the offer in the national and international market of the production and distribution of calcium carbonate of different granulometries an superior quality.

Additionally, we seek to take full advantage of all the raw material, to offer different type of products.

Location

We are located in Colorado, Abangares, Guanacaste, Costa Rica.
150 km NW of our capital city San José

Mission

Our mission is to develop new ways of product in the calcium carbonate market, improving and innovating technology, to satisfy diverse needs of the industry; So, we can increase competitiveness of our customers in local and international market.

Vision

To be the best and most professional producer of limestone aggregates, so that we can become a determining factor in the aggregate quality in local and international production.

Services and Quality Control

We offer our clients rocks and limestone aggregates 100% pure and natural:

1. Aggregates for construction like type 1 granite, granite (38 mm), granite (12 mm) Granite Dust and many other aggregates based on CSCR2010 standards.
2. Ballast for roads and terrain substitution according to CSCR2010 standards.
3. Raw material for different industries: lime, concrete, glass, paint, asbestos cement, calcium carbonate.
4. Special request for clients with particular technical specifications. example: breakwater rocks, decorative rocks, etc.

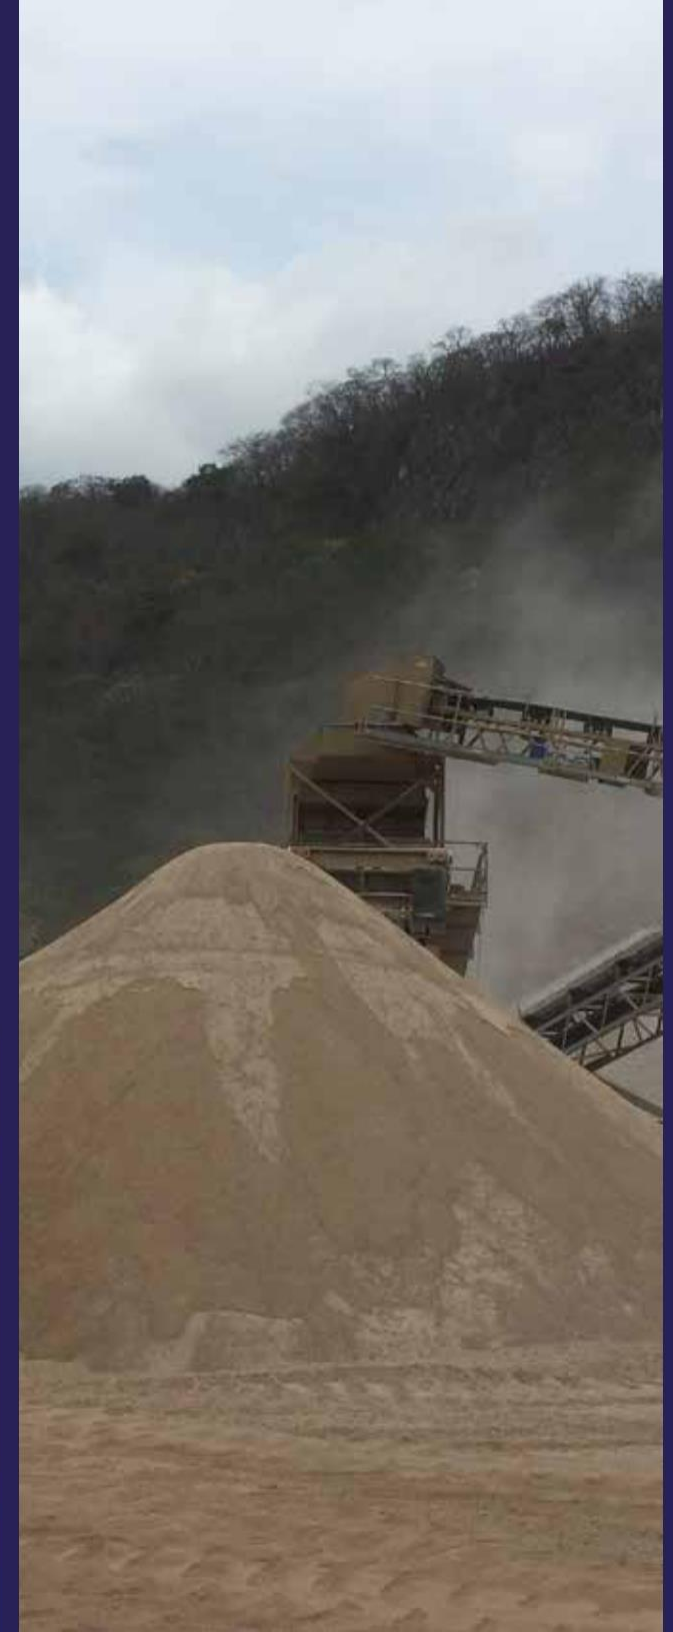

We also offer to our clients a high standard quality control in our services, this in order to guarantee that the end user will get the best product according their needs.

- Drilling and blasting
- Mining
