Plus at least three important additional advantages:

1. You will take fewer notes during class, enabling you to pay closer attention to what is being taught and explained by your coach...
2. If the manual helps you land your next job just 2 weeks sooner, it probably means another \$1,200 - \$2,000 or more in your pocket...
3. Next time you're in job search (there will probably be a next time), you'll have your resource materials to quickly review what you need to do...
