

Ready for efficient and simple scrubbing/polishing?

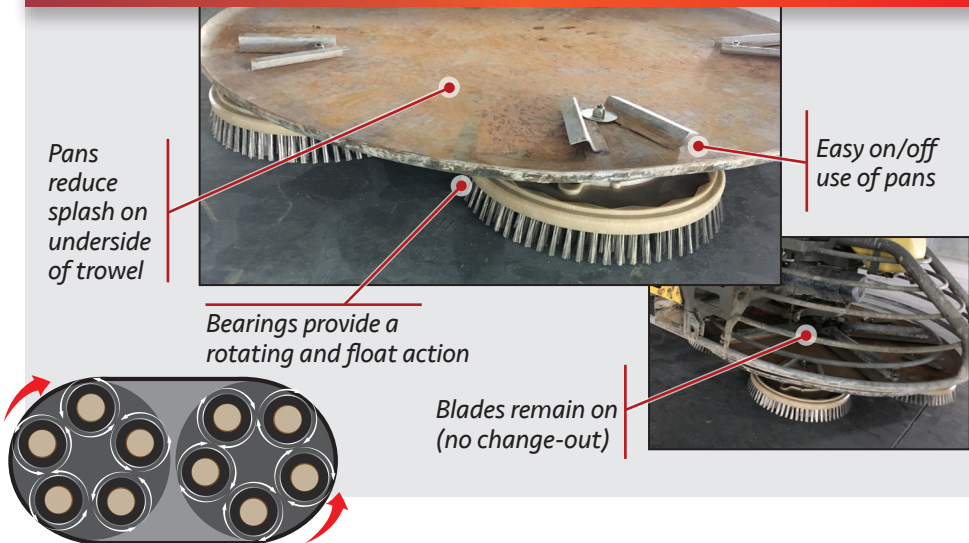

"The use of the Valtec scrubbing brushes allowed us to successfully remove any remaining bond breaker/curing compound off of the slab before a densifier was applied. The time saved with these brushes compared to traditional scrubbing was vast."

ETHAN GALLOWAY

Procon, Inc

Use Valtec's replacement components for scrubbing, cleaning, or processing surfaces on your pan planetary rotary system to save time and lower costs.

Benefits

Valtec replacement components

- ☐ Triple sealed modified bearings and hardware
- ☐ Pad drivers to run your pads
