

## Prep List – Flea Service

1. Remove objects from floor areas as much as possible (toys, pet food bowls, boxes, etc.)
2. Remove objects from floor in closets and under beds.
3. Thoroughly vacuum carpets. Concentrate under furniture and along edge of baseboards. This will aid in removing adult fleas, eggs and pupae.
4. Vacuum under cushions on furniture.
5. If pet(s), frequent any area, vacuum up all pet hair that has accumulated.
6. Dispose of vacuum bag when done.
7. If there is a fish tank, unplug filter and loosely cover top of tank with plastic.
8. Arrange to have pet(s) removed from the house *before* treatment is to begin and for at least four (4) hours *after* treatment is completed.
9. Pets should be treated by a vet or groomer *before* returning to the house.
10. All adults and children must vacate the home *before* treatment begins and for at least four (4) hours *after* treatment is completed.

### ***When you return home***

1. Open all windows to help ventilate the house.
2. Uncover fish tank and restart filter.
3. Thoroughly vacuum every day for one (1) week.
4. Dispose of vacuum bag each time.

If you have any questions or concerns, please contact your management office.
