

NEW! **Ag Leader[™] SureSpeed**

There are years that narrow planting windows force farmers to decide whether they plant faster and sacrifice seed placement or to drag out the season but place seeds optimally. We say “why choose?” with the introduction of SureSpeed, available for spring 2021 corn and soybean planting.

Perfect Spacing

SureSpeed accurately places seed at 12 mph, but also at speeds much slower. Perfect planting is a priority, speed is an added bonus.

Aftermarket Solution

With solutions for various makes and models of box hopper and bulk fill planters, the system was designed to give your planter high accuracy at high speeds.

Singulation & Spacing

Unique meter design and controlled transfer of seeds from meter to delivery device maximizes singulation and ensures perfect spacing at speeds up to 12 mph.

Performance

The flighted delivery belt matches ground speed and has the lowest release point in the industry for consistent spacing at any speed.

Maintenance

Low maintenance system. No tools required.

Force Capacity

SureSpeed paired with SureForce maintains consistent ground contact and smooth row unit ride with increasing speed in varying conditions.

Ease of Use

Controlled by the industry-leading, user-friendly InCommand 1200 display.
