

### NEW PRODUCT– AgFiniti® Map View

- Remote precision data viewing from any web-enabled device for SMS Basic™ and Advanced users.
- Access data from your iPad, Windows and Android tablets, laptop or even your smart phone.

#### Key Selling Points:

- **Precision Data Hub** - Access all of your data from one spot (no need to subscribe to multiple brands of cloud services to access your data).
- **View data from all of your precision displays**, including Ag Leader Technology®, AGCO™, CNH®, John Deere™, Precision Planting, Trimble®, and more.
- **Analyze your data on the go** - Map View gives you flexible access to your precision data from your preferred web-enabled device.
- **View important map statistics** – view row by row planting details, yield, hybrids, soil types and more
- **View your current GPS position<sup>1</sup>** or a selected location's data from multiple maps
- **It's free** – to current SMS Basic and Advanced users.

To learn more about the other features of AgFiniti Map View, please see the [press release](#).
