Hieroglyphic Trail to Superstition Ridgeline & Superstition Peak (Superstition Mountains). Rating A.

The hike to the ridgeline and on to the peak is close to 8 miles long with an elevation gain of approximately 3,000' (total actual elevation is right at 4,000'). Reaching the peak will put you at 5,057' and the highest point in the Superstitions.

The first 1.5 miles is a well used trail that rises about 600' and ends at a section of pools where hundreds of petroglyphs have been etched into the rocks over 800 years ago by the Hohokam Indians (modern miners and settlers came upon these drawings and mistook them for Hieroglyphs so the canyon's name came from a simple misunderstanding).

Hieroglyphic Trail ends at the pools. From here you now go to the far end of the petroglyph area where you will see a very large boulder on the south side (right) of the creek that has created a very large, almost small cave like, overhang. From here you want to follow a very faint trail towards the cliff wall. As you begin on this section it is very easy to begin climbing too soon. Look carefully for intermittent cairns as you pick your way up Hieroglyphic Canyon. You will be

generally slightly above and on the right side of the canyon as you make your way up towards the Superstition saddle.

The faint trail will eventually dump you directly into the canyon drainage where you make your way up and to the other side of the canyon. At this point you continue up and northeast picking your way carefully through very loose shale. The markers are far and few between at this point so look carefully to see faint use sections in the shale. You will finally pick up a more well established trail as you near the saddle. Make your way up from here until you come to the saddle. You will see the Superstition Ridgeline Trail that runs right by this spot.

This is a good spot for a rest and snack break. You get some great views of the Four Peak off to the northeast and Weaver's needle almost in front of you.

It is now about .7 miles to the cutoff for the peak. Head southeast on the Ridgeline Trail following cairns along the way (the trail is somewhat faint when you first begin from the saddle so look carefully and head up the small peak in front of you). You will come to two more saddles along the way, with the second one coming after a short, steep, loose climb. From this point you go about 30 yards and you reach a section where you have to climb using hands and feet to get on top of this section. From here it's just a matter of following the trail to the right of a large section of Hoodoos. About .2 miles past these you will come upon a very large cairn on your right, which is the cutoff to the peak. It's now about .2 miles to the top. Just walk straight up the smooth rock area and you will come upon cairns that take you through and around more Hoodoos. As you get through the Hoodoos you look up and slightly to your right and you will see the peak in front of you. Make your way up the rock for a final short Class 3 scramble where you reach the top. The views up there are incredible in all directions and if you look down towards the east and slightly south you will see the parking lot where you started.

Depending on everyone's capability this hike could take anywhere from 6 hours to about 7-1/2 hours to complete. No restrooms at the trailhead. No park fee. Driving distance is 130 miles RT.

Hieroglyphic/Ridgeline/Superstition Peak (Superstition Mountains-Southwest).

Rating B+. This is a tough 8.5 mile in-and-out hike to the highest point in the Superstitions, with approximately 3,400 ft. elevation gain. The hike starts at scenic Hieroglyphic Canyon near Gold Canyon in Apache Junction and climbs up to the Ridgeline trail (some bushwhacking and scrambling) on the spine of the Superstition Mountains. Superstition Peak is a short distance along the Ridgeline and has survey markers dating to 1899, including one marking the peak as the highest point of the Superstitions. The trail above Hieroglyphic Canyon is sketchy in places but is marked with cairns; it is very steep with loose shale in many areas and requires some serious scrambling in a couple of places near the top. However, the views from the peak are stunning and well worth the effort and elevation gain (how often do you get to look down on

Weaver's Needle?). No restrooms at the trailhead. No park Fee. Driving distance is 130 miles RT.

Hog Canyon Trail (Superstition Mtns). Rating B. This is a 7.3 mile hike with over 1,000 ft of elevation change. Hog Canyon is one of the central drainages on the south side of Superstition Mountain. Just a "stones throw" north of Gold Canyon and its golf courses, it is situated between Monument Canyon on the left and the ever/over popular Hieroglyphic Canyon on the right. Interestingly, despite its proximity to the populated areas of the valley, hardly anything has ever been mentioned about this large and easily viewed canyon.

The two miles across the desert until you get in to the canyon was kind of boring, but once you are there it is worth it! I would say that it is an easier canyon than Monument Canyon to get around in. Once you get to the waterfalls and petroglyphs there is a little climbing to get to the top, which I highly recommend. The better petroglyphs are up above the lower pools. The pools were full and there was a little water drizzling down. Definitely climb as far to the left of the first pool as you can get, but it's not that hard. Don't expect to see anyone from parking area to the falls. No facilities at the trailhead. No park fee. Driving distance is about 120 miles RT.

La Barge Canyon Loop (Superstition Mountains). Rating B. This is a lollipop loop hike of about 11.5 miles with an elevation gain of over 1000 ft.

It is 11.5 miles long with a total ascent of over 1000 ft. The trail surface is a typical trail with some rocks, gravel, and sand with some streambed boulder hopping and scrambling in La Barge Canyon itself.

Follow First Water Trail for about 0.4 miles to the junction with Second Water Trail. Turn left onto Second Water Trail and follow it approximately 3.3 miles down into Boulder Canyon and the junction with Boulder Canyon Trail. Turn right on Boulder Canyon Trail and follow it for approximately 1 mile as it crosses back and forth over Boulder Creek to a cairn on the left that takes you up a faint trail to the back spine of Battleship Mountain to a saddle. Follow the trail down the other side into La Barge Box. (In warmer weather, this is a great spot to jump in the main pool and cool off). This section is a great spot to take a break and just explore part of this beautiful canyon.

After the break we then head down La Barge Creek, boulder hopping on what are initially some large boulders. As you make your way down La Barge Creek, you have an incredible view of

Battleship Mountain on your left. La Barge Creek connects to Boulder Canyon and from there it is approximately 0.7 miles back to the junction with Second Water Trail. Then it is 3.3 miles back to the trailhead. Trail condition - half is on established average trail and half is a bushwhack through a rough canyon. No park fee. Restrooms are at the trailhead. Driving distance is 124 miles RT.

Praying Hands Trail (Superstitions). Rating C. This is a 7 mile out and back hike with an elevation gain of 1000 feet. You start on Jacob's Crosscut trail for one mile, passing through typical desert terrain with lots of Saguaros and Jumping Cholla. Then turn left (uphill) on trail 56. There are several winding trails that get you up to the saddle – so take any of them that head toward Praying Hands. There are great views of the valley and various rock formations as you travel along the trail. Around the 3 mile point you will come to another saddle with to a rock formation on the right that looks like a baby. This is our turnaround point.
