Flat Iron Trail (Superstition Mountains). Rating A. This is an 8-mile hike, an in and out trip with an elevation change of 3,200 feet to the flat summit with astounding views over the west valley. The trail is starts out with a gradual climb and follows switchbacks into Siphon Draw and the waterfall area. Past this point the route climbs steadily over rocks and boulders staying to the right of an obvious water course. After crossing to the left side of the dry river bed the route climbs steeply over large boulders. At approximately 2 miles it seems that the trail branches up the hill to the right over small rocks and scree. Do **not** take this route - the best route is to continue straight and climb over more boulders all the way up to the Flat Iron saddle. The final obstacle before the saddle is a near vertical section that requires great care and the use of tree branches as an aid to scramble over. There are also routes around this obstacle on the left and the right. At the saddle, turn left on the trail to visit a memorial to a recent airplane crash. The hoodoo area immediately above this point is an interesting side trip. Retrace the path past the uphill route and continue straight up to the summit of Flat Iron. Take great care on the return trip - especially the initial near-vertical section. **What you need to know:** This is an extremely difficult hike - expect that the hiking speed be as low as 1 mile per hour in a number of areas. Allow 7-8 hours to safely complete this hike. Route finding is difficult in places. There are no signposts. It is easy to get off the trail. If possible, use a GPS track as an aid. Restrooms are located at the trailhead, which is in Lost Dutchman Park on the west side of the Superstitions. There is a park entrance fee of **\$7.00** per car of four (\$3.00 per extra person). Driving distance is approximately 120 miles roundtrip.

Hieroglyphic Trail to Superstition Ridgeline & Superstition Peak (Superstition Mountains). Rating A. The hike to the ridgeline and on to the peak is close to 8 miles long with an elevation gain of approximately 3,000 feet (total actual elevation is right at 4,000 feet). Reaching the peak will put you at 5,057 feet and the highest point in the Superstitions. The first 1.5 miles is a well-used trail that rises about 600 feet and ends at a section of pools where hundreds of petroglyphs have been etched into the rocks over 800 years ago by the Hohokam Indians (modern miners and settlers came upon these drawings and mistook them for Hieroglyphs so the canyon's name came from a simple misunderstanding). Hieroglyphic Trail ends at the pools. From here you now go to the far end of the petroglyph area where you will see a very large boulder on the south side (right) of the creek that has created a very large, almost small cave like, overhang. From here you want to follow a very faint trail towards the cliff wall. As you begin on this section it is very easy to begin climbing too soon. Look carefully for intermittent cairns as you pick your way up Hieroglyphic Canyon. You will be generally slightly above and on the right side of the canyon as you make your way up towards the Superstition saddle. The faint trail will eventually dump you directly into the canyon drainage where you make your way up and to the other side of the canyon. At this point you continue up and northeast picking your way carefully through very loose shale. The markers are far and few between at this point so look carefully to see faint use sections in the shale. You will finally pick up a more

well-established trail as you near the saddle. Make your way up from here until you come to the saddle. You will see the Superstition Ridgeline Trail that runs right by this spot. This is a good spot for a rest and snack break. You get some great views of the Four Peak off to the northeast and Weaver's needle almost in front of you. It is now about .7 miles to the cutoff for the peak. Head southeast on the Ridgeline Trail following cairns along the way (the trail is somewhat faint when you first begin from the saddle so look carefully and head up the small peak in front of you). You will come to two more saddles along the way, with the second one coming after a short, steep, loose climb. From this point you go about 30 yards and you reach a section where you have to climb using hands and feet to get on top of this section. From here it's just a matter of following the trail to the right of a large section of Hoodoos. About .2 miles past these you will come upon a very large cairn on your right, which is the cutoff to the peak. It's now about .2 miles to the top. Just walk straight up the smooth rock area and you will come upon cairns that take you through and around more Hoodoos. As you get through the Hoodoos you look up and slightly to your right and you will see the peak in front of you. Make your way up the rock for a final short Class 3 scramble where you reach the top. The views up there are incredible in all directions and if you look down towards the east and slightly south you will see the parking lot where you started. Depending on everyone's capability this hike could take anywhere from 6 hours to about 7-1/2 hours to complete. No restrooms at the trailhead. No park fees. Driving distance is 130 miles roundtrip.

Hieroglyphic, Ridgeline, Superstition Peak (Superstition Mountains-Southwest).

Rating B Challenge. This is a tough 8.5-mile in-and-out hike to the highest point in the Superstitions, with approximately 3,400 feet. elevation gain. The hike starts at scenic Hieroglyphic Canyon near Gold Canyon in Apache Junction and climbs up to the Ridgeline Trail (some bushwhacking and scrambling) on the spine of the Superstition Mountains. Superstition Peak is a short distance along the Ridgeline and has survey markers dating to 1899, including one marking the peak as the highest point of the Superstitions. The trail above Hieroglyphic Canyon is sketchy in places but is marked with cairns; it is very steep with loose shale in many areas and requires some serious scrambling in a couple of places near the top. However, the views from the peak are stunning and well worth the effort and elevation gain (how often do you get to look down on Weaver's Needle?). No restrooms at the trailhead. No park fees. Driving distance is 130 miles roundtrip.

Hog Canyon Trail (Superstition Mtns). Rating B. This is a 7.3-mile hike with over 1,000 feet of elevation change. Hog Canyon is one of the central drainages on the south side of Superstition Mountain. Just a "stone's throw" north of Gold Canyon and its golf courses, it is situated between Monument Canyon on the left and the ever/over popular Hieroglyphic Canyon on the right. Interestingly, despite its proximity to the populated areas of the valley, hardly anything has ever been mentioned about this large and easily viewed canyon. The two miles across the desert until you get in

to the canyon was kind of boring, but once you are there it is worth it! I would say that it is an easier canyon than Monument Canyon to get around in. Once you get to the waterfalls and petroglyphs there is a little climbing to get to the top, which I highly recommend. The better petroglyphs are up above the lower pools. The pools were full and there was a little water drizzling down. Definitely climb as far to the left of the first pool as you can get, but it's not that hard. Don't expect to see anyone from parking area to the falls. No facilities at the trailhead. No park fees. Driving distance is about 120 miles roundtrip.

Directions to Superstitions - Broadway Trailhead -- Head south on PebbleCreek Parkway to I-10. Take I-10 East HOV to Highway 60 East. Then exit HOV left onto Highway 60 east (Globe). Turn left on Mountain View Drive and go about 1 mile. Turn Right on Broadway. Parking area is on the left.

La Barge Canyon Loop (Superstition Mountains). Rating B. This is a lollipop loop hike of about 11.5 miles with an elevation gain of over 1000 feet. The trail surface is a typical trail with some rocks, gravel, and sand with some streambed boulder hopping and scrambling in La Barge Canyon itself. Follow First Water Trail for about 0.4 miles to the junction with Second Water Trail. Turn left onto Second Water Trail and follow it approximately 3.3 miles down into Boulder Canyon and the junction with Boulder Canyon Trail. Turn right on Boulder Canyon Trail and follow it for approximately 1 mile as it crosses back and forth over Boulder Creek to a cairn on the left that takes you up a faint trail to the back spine of Battleship Mountain to a saddle. Follow the trail down the other side into La Barge Box. (In warmer weather, this is a great spot to jump in the main pool and cool off). This section is a great spot to take a break and just explore part of this beautiful canyon. After the break we then head down La Barge Creek, boulder hopping on what are initially some large boulders. As you make your way down La Barge Creek, you have an incredible view of Battleship Mountain on your left. La Barge Creek connects to Boulder Canyon and from there it is approximately 0.7 miles back to the junction with Second Water Trail. Then it is 3.3 miles back to the trailhead. Trail condition - half is on established average trail and half is a bushwhack through a rough canyon. No park fees. Restrooms are at the trailhead. Driving distance is 124 miles roundtrip. <http://pchikingclub.smugmug.com/SuperstitionWilderness/La-Barge-Canyon>

Massacre Falls Loop (Superstitions). Rating C Challenge. This is a 6-mile in and out hike with an elevation gain of 1500 feet. You start at the Crosscut trailhead and head off to the left along the fence for the parking area. There are great views of the valley and various rock formations as you travel along the trail. As you work your way up you will pass a shot side trail that overlooks the area of the massacre. Massacre Falls itself will be off to the right. Trail condition – an average hiking trail, but steady uphill going and downhill on the return. There are no restrooms (though you can go 1.5 miles further up the road to the 1st Water trailhead which has restrooms and then return to the trailhead). No park fee from this trailhead. This 4+ mile out-and-back hike starts at the Peralta Trailhead off Route 60 east of Phoenix and goes through an interesting saguaro forest along the Miner’s Needle Trail on the way to Miners Needle, which has a hole (arch) in it. Peralta Trail #102 (Superstition Mountains). Rating C Challenge. This is an in and out hike of about 6 miles (add .5 to go to Geronimo's Cave) with an elevation gain of 1,500 feet – a steep, continuous climb. But it is one of the most beautiful hikes we do - Weaver’s Needle will be in front of you at the top. We also go to a lone tree with terrific close-up views of Weavers Needle. An optional addition is to hike to Geronimo’s Cave, which provides great views of the valley just hiked and points east. You start on Jacob's Crosscut Trail for one mile, passing through typical desert terrain with lots of saguaros and jumping cholla. Then turn left (uphill) on Trail 56.
