

Business Review

Ciraula's keeps cars cool in summer heat, warm in winter cold

People always are talking about the weather and no one ever does anything about it — but, Cool Car Care does!

Cool Car Care Cooling Center, located at 460 Brown Ave., (Route 130) Wilkins Township, keeps the temperature controlled in your car.

Ciraula's is a complete radiator, heater and air conditioning specialty shop that was opened in 1972 by Francis Ciraula. Ciraula's Cool Car Care Cooling Center was added later.

The business specializes in same-day service — in during the morning and finished by the afternoon. All this at a reasonable price.

See Robert (Hirky) Bost, Ciraula's longtime manager, for fast, expert service.

In the automobile temperature control business since 1943, Ciraula and Bost always offer a written guarantee.

"We have a reputation based on integrity and we value our reputation," says Ciraula.

Ciraula's Car Care Cooling Center also offers a preventative maintenance program for customers to check different needs of the car in each season.

Right now, your car must keep you warm and protect you against the cold weather. Later, it will be time to check your air conditioning system.

"We keep you warm in winter and cool in summer and keep the engine temperature at a proper level," says Ciraula.

With complete auto radiator and air conditioning sales and service, Ciraula's seeks to fulfill every need in automotive temperature control.

Ciraula Radiator Cooling Center offers expert radiator repair and service so not only are you kept warm and happy during grueling winter months, but your car and engine are cool and running properly.

The company offers the highest-quality GMAC Delco products and Ciraula's written guarantee. The prices will warm your heart.

"We have quality labor at fair prices," says Ciraula.

Most charge cards are welcome.

Ciraula's is open from 8 a.m. to 5:30 p.m. Monday through Friday and from 8 a.m. to noon on Saturday.

Call Ciraula's Cool Car Care Center at 824-9870 and let the experts keep your car operating properly and your passengers at a comfortable temperature.
