Capelin on Driftwood
<https://acutabovewoodworkings.com>

The sizes of stock for this project are approximate and any size can be used to suit your needs. Cut as many capelin as you require for your project using this pattern to make a template and trace onto your scrap wood blanks. Drill your $\frac{3}{32}$ " diameter holes approximately $\frac{1}{2}$ way through your fish cutouts. Paint as you wish or leave them natural. It's up to you.
