

Care Instructions

I purposely buy high-quality vegan suede and wool blend blanks so your hats will last a lifetime with minimal maintenance. They're crushable, lightweight, and water and stain resistant. Due to the internal structure of the hat, they're amazingly durable and can be reshaped easily. They're great for travelling because they can be tucked into a suitcase then pulled right out for wear. The most delicate part of your hat would be the accessories on the hat band. I use real dried flowers. To protect these for travelling, they can be easily removed from the hat band and placed into a plastic baggie. Use some parchment paper to gently "float" the flowers then blow some air into the bag to puff it up, then toss right in with your hat. In typical felt hat fashion, the wool blend options run a little heavier in weight! Wool is a wonderful wicking material perfect for all seasons and when blended with cotton and poly, it is lighter than a true traditional fur felt. Because of the blend, the material is also simple to spot clean with a dry or slightly damp microfiber cloth.

The vegan suede hats are a mid-weight hat. They're more breathable and lighter than the wool blends, making them a perfect spring or summer hat. Also super durable and an easy-to-clean material, you can use a dry or damp microfiber cloth to spot clean.

The material of your hat should be posted in the listing or on the tag. Though the base of your hat is high quality and requires minimum maintenance, these are works of art and need to be cared for as such. A storage box is provided complimentary with all orders. Specialty shaped and felt hat orders may need different care instructions.
