MJO HOPE CONNECT

We are now available virtually
remotely, for that video chat.
See You Soon!

SmartHealth & Wellness Happiness Driven By Technology!

MJO Hope Connect programs are designed to teach nursing home residents and those suffering from disabilities basic technology skills including how to start, stop, mute, skip ads and enlarge a YouTube video and more advanced options. MJO Hope's interactive online activity room classes, offered in English, Spanish and Chinese, are available during nursing home activities.

Although there is no substitute for person-to-person contact, video conferencing technology is helping to alleviate the loneliness that can stem from being away from family and friends by providing easy to use video calling for seniors. This can allow seniors to (virtually) join in on holiday meals and other family events! While it may be challenging to determine the best video calling device for seniors. The MJO Hope Foundation donates technology to your nursing home to improve group participation. Your only obligation is to fill out a year end impact report for our smart health & wellness program — we will take care of the rest.

"The best way to stay connected to your loved one in a nursing home is VIRTUALLY!"

Nurse Daniel
