

## TRUCKER'S CONVOY 2022 FOLLOW-UP TO RCMP RE: TRUDEAU FOR TREASON

In January 2022 we took our trucks to the streets of Ottawa to protest in the Freedom Convoy 2022 against the COVID-19 vaccine travel mandates. We protested because we were alarmed by the reports of vaccine **injury** and **death** and because our livelihood was adversely affected by these new draconian cross border laws. The convoy was a peaceful, lawful protest of these harmful, unlawful, vax mandates nevertheless Trudeau shut us down by police force. We are now returning to demand that the **RCMP arrest Prime Minister Trudeau for treason because of his unlawful violent vaccine mandates, and his unlawful use of force to break up the protest.**

In February 2022 the police and the courts found our protest to be peaceful. Also, CSIS announced that the convoy protest did not meet the standards of a national security breach required by the Emergencies Act. Regardless of the evidence of our peacefulness, Trudeau illegally declared a national emergency, issued counterfeit regulations, and brought in armed police; many of whom could not be identified as Canadian, to shut down the peaceful protest by force. These counterfeit emergency regulations infringed upon our basic human rights and our fundamental freedoms. We were beaten for no reason, our trucks were damaged and confiscated without legal cause or authorization, and many of us were criminally prosecuted with unreasonable bail conditions; all because we were exercising our inalienable right to freedom of speech, peaceful assembly, and association. We had an important public message and we protested peacefully in a symbolic location.

All of the vaccine mandates resulted in aggressive treatment of citizens and were implemented and enforced with deliberate violence. These counterfeit regulations violated our constitutionally protected rights and freedoms which are protected in the preamble of the Constitution Act (Implied Bill of Rights). Furthermore, under Section 35 of the Constitution Act which protects rights of First Nations, Inuit and Metis, rights were also violated, and moreover the regulations did exempt them, but this was ignored by the government when the Emergency Act was invoked. The preamble of the EA, prohibiting violation of human rights and fundamental freedoms, was also ignored; and the Canadian Bill of Rights section 2 requires that all regulations be vetted for their consistency with the CBR - all these required procedures were ignored! The unlawful vaccine mandates and actions towards us for protesting were taken in conspiracy with foreign powers (i.e. World Economic Forum/World Health Organization/United Nations). What makes this action treason is: 1. Conspiracy with foreign powers 2. Undermining parliamentary process, and 3. Violence was used to undermine the Canadian sovereign (i.e., the people).

To support our protest Stand4THEE (S4T), the grassroots organization whose mandate is to lawfully defend our rights and freedoms, has prepared a police incident report for us with evidence that proves treason by Trudeau. The link to the incident report is here: <https://tinyurl.com/yc3h9vzu>. S4T has also compiled a list of 6000 persons so far and counting, from across the country, that are demanding the arrest of Trudeau for treason. The link to make a declaration in support of arresting Trudeau is here: <https://tinyurl.com/298my46f>.

As a safeguard against future abuse of power by the governments we need to use our **right to jury** for all claims made against us. A jury has the right not only to hear and decide on the guilt or innocence, but they can also nullify the law if they find it unjust. Had juries been provided for any mandatory vaccine charges, more likely than not the jury would have nullified these laws. And later, juries for the convoy charges could have also dealt with government overreach most effectively. NOTE: Surveys found 70% of people did not agree with the invocation of the EA against the truckers.

The history of this right to jury started with the Magna Carta in 1215. The Magna Carta's intent was to prevent the King's domination of the court. It inspired later generations to view the right to a trial by jury as one of the basic safeguards of freedom from arbitrary government. Later this right to jury was acknowledged by the preamble of the Canadian Constitution because it assured it was based on the principles of the UK, which includes common law rights; also, jury guarantees are found in the Canadian Bill of Rights section 2(e) and (f).

In parallel with a Grand Jury investigation to indict Trudeau for treason, the RCMP must open an RCMP investigation into the egregious rights violations and deliberate violence against his own citizens in conspiracy with foreign powers.

Signed:
