

MJB
M&E

Tailored expertise – your bespoke, client-focused approach.

ABOUT US

MJB M&E Ltd was established to provide tailored, client-focused solutions in electrical and specialist installations, backed by decades of industry experience. We design, supply, and install comprehensive electrical systems, working closely with partnered mechanical contractors to deliver fully integrated, turnkey MEP packages.

Our approach centers on understanding client requirements, offering expert guidance, and ensuring that every project is executed to the highest standards. At MJB M&E Ltd, we combine technical expertise with personalised service to deliver results that exceed expectations.

OUR ACCREDITATIONS

At MJB M&E Ltd, health, safety, quality, and environmental responsibility are at the core of everything we do. We operate in accordance with recognised industry standards and accreditations including ISO 9001, ISO 14001, SMAS, NAPIT, and SSIP approval. These certifications reflect our commitment to maintaining robust management systems, safe working practices, and continuous improvement across all projects. By adhering to strict compliance procedures and promoting a strong safety culture, we ensure the well-being of our workforce, clients, and partners while delivering work to the highest professional and regulatory standards.

MEET THE DIRECTORS

Mark Buchannan
DIRECTOR

.....

Mark Buchanan is a highly skilled electrician and visionary leader with extensive experience spanning residential, commercial, industrial, and renewable energy sectors. Beginning his career as an apprentice, he developed deep technical expertise and a strong commitment to precision, safety, and innovation. Transitioning into leadership, Mark has successfully directed a respected electrical company, fostering client satisfaction, team development, and operational excellence. With a focus on emerging technologies and sustainable solutions, he is dedicated to delivering modern, reliable, and future-ready electrical services, underpinned by a culture of continuous improvement and a proven track record of success.

Craig Ottaway
DIRECTOR

.....

Craig is an experienced electrical professional with a career spanning apprenticeships, project engineering, and contract management across a variety of sectors. He began his journey completing an electrical apprenticeship with EMCOR, progressing to Project Engineer and managing a range of high-end, complex projects. He subsequently worked as a Contracts Manager for several medium and large-scale contractors, gaining extensive experience in delivering successful projects across residential, commercial, and industrial sectors. Craig combines technical expertise with strategic project oversight, ensuring quality, efficiency, and client satisfaction.

OUR SERVICES

LV Distribution

Design and installation of main panels, distribution boards, sub-main cabling, and all forms of cable containment systems, ensuring safe, reliable power distribution across your project.

Full Electrical Installations

Complete electrical packages including LED lighting, intelligent lighting controls, small power installations, and all associated accessories.

Turnkey MEP Solutions

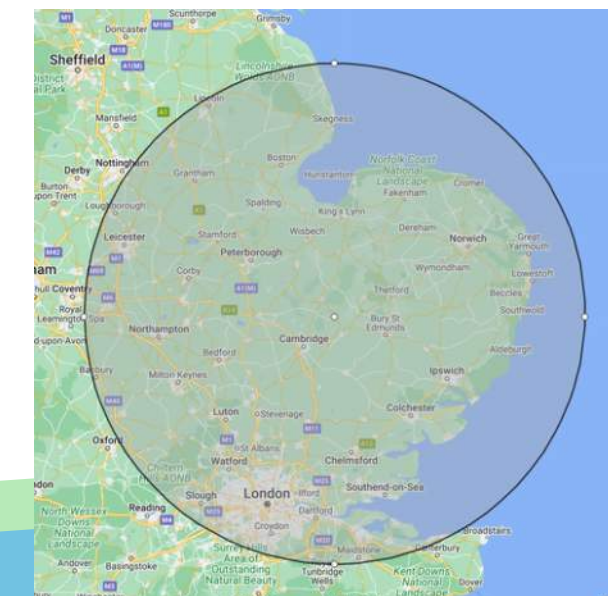

Fully coordinated, tailored project delivery including electrical, mechanical, and ventilation services through our trusted specialist partners.

Renewable Technologies

Installation and integration of modern energy solutions including Air Source Heat Pumps (ASHP), Solar PV systems, and EV charging infrastructure.

Design & Feasibility

Comprehensive design support and feasibility studies to ensure efficient, compliant, and cost-effective solutions from concept through to delivery.
