

THE SOCIAL PUP: WEBCAM ACCESS

1. Download “EyeInCloud” in your AP store (by Ameta International Co.)

2. Allow “EyeInCloud” to send you PUSH notifications

3. At the “iPhone X x iPad compatibility” screen – select “SKIP”

iPhone X & iPad Compatibility

Perfect fit to your screen

4. At the “Lens Adjustment” screen – select “SKIP”

5. At the Privacy Statement screen – select “Agree”

6. At the Add Device screen – select “SKIP”

7. At the Live screen – select the Top Menu Bar

8. At the Server Listing screen – select the “Round Icon with 3 dots...”

9. Select "Manually Add" and you will be prompted to allow your phone to access the camera – select "OK".

10. Scan the below QR code:

It will update the landing page to look like this:

11. In the user field – type over “admin” with **TSP CUSTOMER** (note – it must be ALL CAPS, with a single space between TSP and CUSTOMER)

12. In the password field – **CALL THE STORE OR ASK AN EMPLOYEE FOR THE PASSWORD**

13. You will be promoted to Connect to Local Network – select “ALLOW”

14. You will then be shown a screen "SERVER LIST: - wait for the broadcast icon to turn GREEN

15. You will have access to cameras (01), (02), (03), (04), (05) & (06)

Note – you can improve your camera picture quality by:

- Selecting a camera image
- Making it full screen & tapping the <eye> icon and selecting “super definition”

16. Your camera feed will constantly be running in the background. You need to log out or else it will eat A LOT of data! Simply closing the application DOES NOT turn off the data usage. YOU MUST LOG OUT of the ap:
