

ABOUT OUR SIGNS

- **Thickness Options:** Available in 4mm or 10mm.
- **4mm Only:** Required for round signs, custom shapes, or any sign with handles.
- **Durability Hack:** Some schools purchase two sets of 4mm signs and use double-sided tape to create an 8mm sign for added strength. (This method was our original process in 2019, and many schools still do this after receiving their signs.)
- **10mm Recommended:** Only available for square and rectangle signs without handles. These are perfect for creating noise and sharp motions at competitions.
