

NEW TO THE MARKET

INTRODUCING THE BRAND NEW MEMBER OF THE AWARD WINNING ONTEC S FAMILY

The ONTEC S20 can be used for all emergency lighting needs and so is perfect for contractor stock. It's a compact modern look bulkhead with a light output that beats most products on the market. A universal exit legend is included to convert into a wall mount exit sign for viewing distance up to 20m. It provides 3 hour illumination as standard but can be switched to provide 3 times the light output for 1 hour to cover those high risk task areas where extra light is required. It has multiple cable entry points for true mounting flexibility. The quality of the fitting is so good that we offer a battery warranty of 3 years whilst the fitting is covered for 5 years.

It's also fully certified for use pre and post Brexit so you have peace of mind no matter what happens.

Visit our website at www.rdfightingpowerandcontrol.co.uk to see more info on the ONTEC S20 as well as the best range of emergency luminaires and exit signs, all with options including lithium long life batteries, addressable self-contained, DALI and central battery powered.

We can provide all our emergency fittings in the complete RAL colour range and some are also available in brushed or polished steel.

Contact our sales team at sales@rdflightingpowerandcontrol.co.uk now to request an Ontec S20 sample.
