ABOUT THE PRACTICE

Cutting Edge utilizes an expert medical team who use the latest techniques and technology to improve the quality of life for patients suffering from musculoskeletal and neurologic conditions.

WHY CHOOSE CUTTING EDGE

Cutting Edge applies a multidisciplinary approach for the most comprehensive treatment plan possible. Each patient is handled uniquely for their specific diagnosis. Cutting Edge Board Certified Physicians are at the forefront of employing advanced technologies in their patients' best interest from diagnosis through treatment.

We are a Cut Above the Rest.

SERVICES

ORTHOPEDIC SURGERY

Spine & Extremity Surgery

Minimally invasive procedures using advanced surgical techniques in conjunction with innovative implants that can provide greater longevity and outcomes along with biologic adjuvants that can help promote quicker recovery and provide improved healing potential.

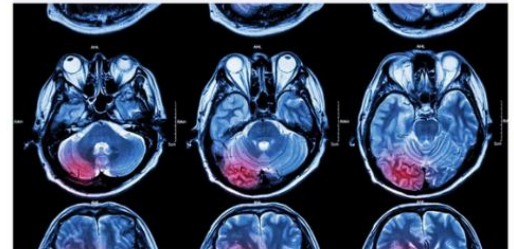

NEUROLOGY

Comprehensive Neurological Care

Treating a wide range of conditions that affect the nervous system and working closely with patients and their families to develop trusting relationships and ensure optimal care.

TRAUMATIC BRAIN INJURY

Innovative Treatments

Diagnosing and treating all types of traumatic brain injuries, providing integrative care that supports recovery.

INTERVENTIONAL PAIN MANAGEMENT

Comprehensive Pain Management

A range of treatment options that not only address the painful condition, but also the impact of pain on the patient. Reducing or eliminating pain to increase stamina and strength and improve functionality for sleep, work, leisure activities and the overall quality of life.

IN-HOUSE MRI

In-house MRI

Providing two key benefits to patients, convenience and consistency. No more scheduling neurological imaging at different radiology offices throughout the area which means the same calibrations provide the most accurate picture of any changes over time.

REFERRAL NETWORK

Successful Treatment Plans

A strong referral network is critical. We specialize in creating efficient solutions that keep patient care at the forefront.
