

HURRICANE PREPARATION

Hurricane preparation is vital for protecting lives, property, and peace of mind. Hurricanes can bring devastating winds, heavy rainfall, flooding, and power outages, often with little warning. By preparing in advance—securing your home, stocking emergency supplies, and having an evacuation plan—you reduce the risk of injury, minimize damage, and ensure you're ready to act quickly. Proper preparation can make all the difference when facing the unpredictable and potentially destructive force of a hurricane.

Checklist:

- Install or inspect hurricane shutters / plywood for windows
- Test and fuel generators
- Store 3–5 days' worth of water, food, and medications
- Review evacuation routes and shelter plans
- Move valuables and documents to a safe, waterproof area
- Fill gas tanks and propane tanks
- Back up important documents/photos digitally
- Anchor or secure large outdoor structures (grills, sheds)
- Take photos of home/property for insurance
- Verify insurance policy coverage for wind/flood
