Parcel Transportation Management Solutions that are **scalable.**

What we do.

Our robust product set covers your shipping and logistics needs throughout the entire parcel order life cycle. For over 30 years, parcel shippers with extremely high volumes and complex shipping rules have relied on ScanData. Our customers are the leaders in their respective businesses, including the #1 General Retailer, #2 Pharmaceutical, #1 Cataloger, #2 & #5 Flowers/Gifts, and two Top-10 Apparel companies. We have tailored our solution to handle complex configurations for temperature sensitivity, cold chain variables, regulatory requirements, supply chain complexities, and carrier agility. Our experience results in expert consultation, seamless integration, and rapid deployment. ScanData provides 24x7x365 support provided by veteran on-shore engineers, not call center reps with a script. This delivers on our promise to keep your mission critical systems running.

Shipping & Manifesting
We provide single-site to enterprise-wide solutions and support a variety of distribution models via integration with your existing ecommerce and warehouse management systems.

Multi-Carrier Rate Shopping
ScanData offers everything from simple Least-Cost Rating to Multi-Ship Point, Multi-Carrier Drop-Ship rate shopping, making sure you are paying the absolute minimum and your packages arrive on time.

Label Generation
Our carrier compliance experts have spent decades solving every imaginable problem. Whether standard or customized, ScanData can create carrier-certified shipping labels along with pick tickets, invoices, and documentation in multiple formats.

Returns Services
ScanData can support pre-printed return labels and website integration for customer's on-demand returns label printing. This allows customer flexibility of multiple carrier drop off and pick up services.

Drop Ship Vendors
With increasing supply chain costs and the shortening of transit windows, it's never been more important to control your vendor's shipments. Easily manage hundreds of drop ship vendors with our centralized solution.

Service Disruption Handling
When unknown events arise, from severe weather to riots, ScanData can prevent shipping via certain carriers and ship methods, and/or to specific locations, giving you real-time control of your distribution.

Data Warehouse & Reporting
ScanData's data warehouse can hold years of parcel shipping data for audit, reconciliation, and reporting. We offer out-of-the-box and customized reports, along with executive dashboards to close the gap between the warehouse and the boardroom.

Alerts & Tracking
We not only capture and store all events, we can notify customers based on rules provided by the retailer. ScanData can support both internal and carrier-generated status updates/alerts.

International Shipping
Not only does ScanData support all domestic shipping, we handle International shipments, from APO/FPO shipments to global delivery, with the full complement of required paperwork.
