

PCC Performance & Capability Consultants

Expertise Overview

Performance & Capability Consultants

30%

Cost Reduction Potential

Front-End Loading Project Management eliminating costly surprises and optimizing resource utilization throughout project lifecycle.

20%

Duration Reduction Potential

Schedule optimization accelerating delivery through tool time improvement and process waste elimination.

20+

Major Energy Companies

Global implementation with proven success across the Upstream, Midstream and Downstream oil and gas sectors.

Guaranteed Results

Measurable performance improvement within 90 days of implementation.

OUR EXPERTISE & CAPABILITIES

Performance & Capability Consultants

Operations Excellence

Real-time performance optimization focused on production maximization and OEE improvement.

Maintenance Excellence

Proactive asset management strategies to maximize reliability and extend equipment lifespan.

TAR & Shutdowns

Optimizing critical path management and execution of planned downtime events.

Capital Projects

Increased productivity, reduced schedule durations and on-time delivery for Large-scale construction projects.

Well Delivery

Improving the delivery of subsurface execution and drilling projects, focusing on reducing costs, NPT and ILT.

Petrochemical

Increasing reliability, product quality and OEE for chemical manufacturing.

Refining

Margin optimization, reduced TAR durations and capacity utilization improvements.

Process & Behavioural Safety

Embedding safety culture, leadership capability, and compliance across operations.

Each expertise area features distinct methodologies and customised approaches

Delivering targeted solutions for your specific challenges.

PCC How & Where We Work

Global Excellence & Delivery

Performance & Capability Consultants

Proven expertise spanning Thailand, Singapore, UK, Norway, Australia, Germany, the Middle East, and Brazil.

Consulting-engineering integration, embedding transformation directly into operational workflows for measurable impact.

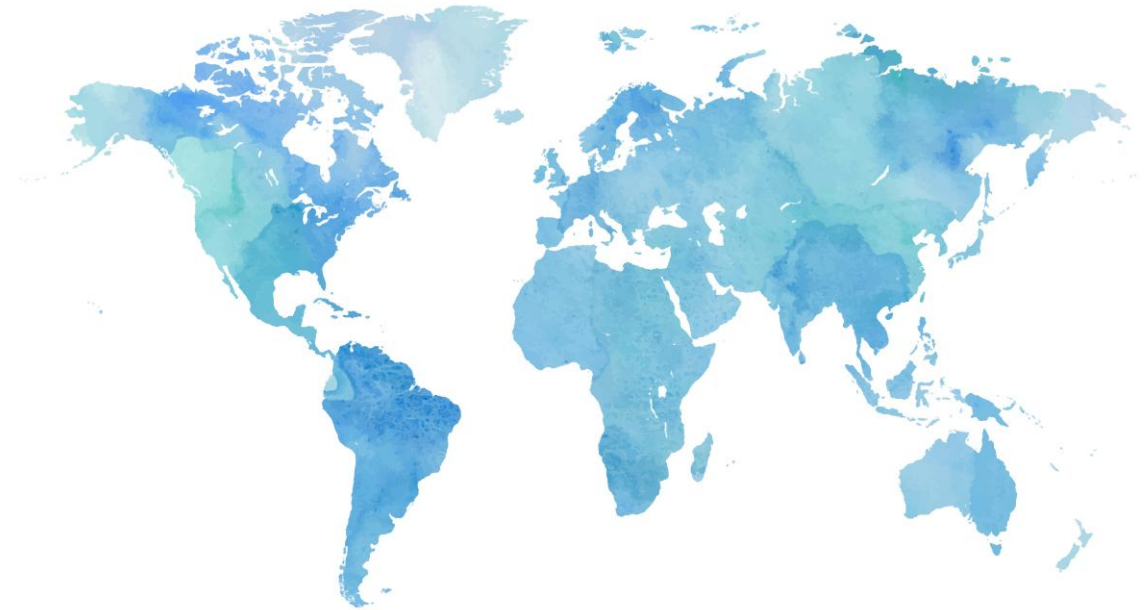

Trusted change leaders, guiding teams through transformation while inspiring ownership and engagement.

Front-line centricity, amplifying the voices of staff and contractors to elevate ground-level innovation.

Leadership-to-execution bridge, translating strategic goals into actionable outcomes and performance metrics.

Capability-building focus, nurturing long-term competencies and performance-oriented mindsets.

Multicultural delivery strength, enabling effective implementation in global environments via fluency in 5 languages.

PCC 5 Transformation Pillars

Proven to Deliver Performance Gains

Performance & Capability Consultants

People

High-Performance Culture

Empower and engage the workforce to elevate capability, achieving up to **30% improvement in safety participation** and **20%+ gains in productivity** through targeted initiatives and culture-building strategies.

Metrics

Data-Driven Decision Making

Harness **real-time performance dashboards** that replace guesswork with actionable insight, enabling faster, smarter decisions that drive on-time project delivery.

Core Meeting Cadence

Operational Alignment

Implement a structured communication rhythm that synchronises front-line execution with leadership objectives, resulting in up to **30% reduction in rework** and enhanced accountability.

Process

Workflow Optimisation

Streamline operations to **eliminate non-value-adding activities**—consistently delivering **10–15%** schedule acceleration while upholding quality and compliance across operational areas.

Integration

Cross-Functional Excellence

Break down functional silos **through structured, collaborative workflows**, accelerating bottleneck resolution by up to **50%** and improving decision-making speed across disciplines.

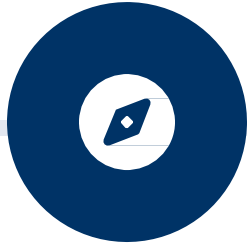

These five pillars work together as a comprehensive system. Each adapted to your specific industry needs while maintaining a consistent methodology for sustained results.

DRIVING PERFORMANCE WITH PCC's UNIQUE APPROACH

Performance & Capability Consultants

We implement – in the field, with front-line teams and leadership

Strategic Alignment

Creating a clear line of sight between organizational goals/metrics and front-line teams

In-Field Capability Building

Daily coaching & practical workshops that develop skills during implementation

Measurable Results

90-day performance uplift guaranteed with sustained improvement

Unlike traditional consultants who leave after analysis, we work alongside your teams to deliver real change and develop lasting capabilities.

TYPICAL CLIENT RESULTS

Performance & Capability Consultants

"Their approach to developing our team's capabilities and performance focus has transformed our operations."

—Site Director, Major APAC Energy Company
