

Petrochemical

Increasing Performance, Reliability and Availability

Petrochemical Approach

Where we implement

Petrochemical Plants PCC can implement in all phases of the lifecycle management from plant Design and Construction to the Commissioning and Operation of industrial facilities. Our expertise and competencies include:

Operational Excellence implementing best practices and continuous improvement methodologies to enhance plant performance and productivity.

Maintenance Excellence improving Reliability and Uptime.

Shutdowns expertise in developing efficient and sustainable processes for chemical readiness reviews and schedule predictability.

Engineering Projects increasing readiness to execute including contractors and client personnel.

Technical Understanding ability to immediately understand technical issues drawing on extensive Petrochemical expertise.

Proven Success increasing OEE and Reliability and Sustainability.
