

Process & Behavioural Safety

Coaching to Improve Levels of Maturity

Process & Behavioural Safety Approach

Influencing & Strengthening

Process & Behavioural Safety PCC expertise and competencies includes:

Cultural understanding that in different parts of the world safety behaviours differ and implementation approaches need to be tailored for same.

Risk mitigation assessing and strengthening effectiveness of safe systems of work including Risk assessments, Management of Change, Permit to Work.

Process Safety audit and metrics assessed and conversations facilitated to drive a performance focus and improved decisions.

Safety meeting cadence strengthened, with detailed terms of reference developed reflecting the key metrics and behaviours which influence performance.

Behavioural observation program engagement and ownership increased and associated actions prioritized.

Agile Improvement teams formed and conversations facilitated to close performance or behavioural gaps.

Coaching conversations held daily with Front Line during morning crew stand up meetings and daily field walks.

Safety Capability strengthened through practical skill sessions and 1-2-1 conversations.
