Kryonix

SmartMod
Prefabricated Modular Data Center

Factory-Built Precision. Rapid On-Site Deployment.

Integrated power, cooling, and IT — ready to run anywhere.

Overview

Kryonix SmartMod delivers a complete prefabricated infrastructure integrating power, cooling, IT, monitoring, and fire suppression into modular units.

Each module is factory-assembled, tested, and shipped for plug-and-play deployment — accelerating delivery while ensuring performance consistency.
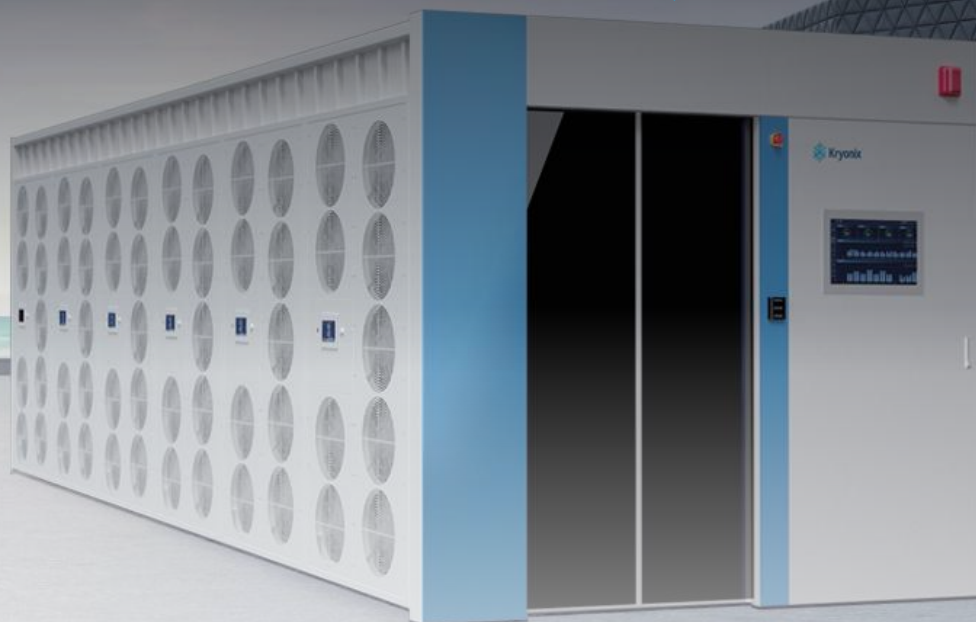

Each module integrates:

◆ Cooling System

◆ UPS Power System

◆ IT System

◆ Monitoring and fire protection system

Deploy Anywhere. Run Immediately.

Kryonix

Key Advantages

Turnkey Integration
Power, cooling, and monitoring in one system.

Rapid Deployment
Cut build time by over 50% vs. traditional construction.

Lower CAPEX & OPEX
Prefabrication reduces site labor and energy use.

Flexible Scalability
Combine or expand modules as demand grows.

Quality Assured
Factory-tested for reliability before shipment.

Applications

◆ Enterprise data centers   ◆ AI clusters   ◆ Edge and cloud sites
