

Genotype Cats Health Agreement and Contract for:

Offered by the Breeder, Kristy Marson (genotypecats@gmail.com, 4141 Lakepoint Drive Tuscaloosa AL, 415-246-5109)

Health Warranty

If your kitten or cat is diagnosed with a serious and life-threatening genetic defect or congenital disease before 2 years of age and is confirmed by a veterinary specialist for the health concern or disease (e.g. a cardiologist for heart issues), scientifically accurate methods (e.g. lab testing not snap tests), and/or necropsy (should the kitten die) we will provide you with a replacement kitten of equivalent expense (all medical costs and transport costs are the responsibility of the Buyer). Depending on the specific condition, we will work with you to decide who can best care for the sick cat. Examples of conditions that would entitle you to have your kitten replaced include life-threatening heritable heart conditions and degenerative nerve disorders; in other words, conditions that drastically affect the cat's longevity such that they will live fewer than 9 years (ragdolls' life expectancy ranges from 9 to 25 years averaging 15). Examples of conditions that would not qualify for replacement are innocent heart murmurs, growth issues, stress related illness, or allergies; in other words, conditions that an otherwise healthy cat can live with and be happy. In general, we respect a veterinarian's opinion of what constitutes a serious defect, but we may require a second opinion upon review of your veterinary records by our veterinarian (they must be faxed to Dr. White at 205-555-0255 within 24 hours of any urgent health concern). Our health warrantee is void if the kitten is given any of the FeLV/FIV vaccine series, allowed to roam outside, or bred.

Contract of Sale

The Buyer must have the kitten examined by a licensed veterinarian within 72 hours of leaving our care (by _____ at _____) or the health warranty portion of this contract will be voided.

The Buyer assumes responsibility for all medical expenses of the kitten/cat at the time the contract is signed (at pick-up or before if the kitten is to be delivered). The Breeder will not assume responsibility of any medical expenses incurred once the kitten is transferred to its new owner. The Buyer will spay/neuter the kitten between 6 and 7 months of age, keep all vaccinations current, and provide proper housing, husbandry, nutrition, and parasite prevention to keep the kitten in healthy condition throughout its life. Should the kitten become ill at any point in its life, the Buyer will immediately notify the Breeder (via email) and take proper steps to have the kitten seen and treated by the Buyer's veterinarian and, if necessary, a specialists. Of critical importance: kittens are very fragile and can go down-hill incredibly quickly, **kitten illness is an urgent care situation**, always. This is of such importance, if the Buyer does not respond to kitten illness by urgently seeking veterinary care (e.g. the kitten having been seen by a vet within 24 hours of the reported first observation of the symptoms as well as appropriate rechecks if the kitten does not improve or, and especially, if the kitten's symptoms worsen), the health warrantee portion of this contract will be voided. Breeding this kitten/cat will void the health warranty and you will voluntarily pay \$5000 USD in damages to Genotype Cats (Kristy Marson).

The Breeder will supply TICA registration paperwork after proof of spay/neuter is received.

Should the Buyer not be able to keep the cat, the Buyer will provide right of first refusal to the Breeder.

I, _____ (the Buyer), by signing this agreement, agree to the terms detailed above and understand that failure to meet the requirements will void all portions of the warrantee and is grounds for legal action. *The Buyer will pay all court costs associated with any legal proceedings which will be required to occur in the Breeder's county: Tuscaloosa County, Alabama.*
