Servicing NSW North Coast

# WHO WE ARE

## ABOUT SPROCKET CIVIL

Sprocket Civil Pty Ltd is an earthmoving and excavation contractor servicing the NSW North Coast.

We specialise in providing high-quality earthworks and related services with a strong commitment to safety, efficiency, and customer satisfaction.

With over 25 years of industry experience — including large-scale highway upgrade projects in a Superintendent capacity, our Director brings deep operational knowledge.

We maintain a modern, well-serviced fleet of heavy plant and equipment, allowing us to self-perform across excavation, grading, stabilisation, sealing, and haulage.

# CORE SERVICES

WHAT WE DELIVER

## SITE CUTS & EXCAVATION

## GRADING & ROAD RE-SHEETING

## STABILISATION & SEALING

# PLANT & EQUIPMENT

HEAVY MACHINERY • TRUCKS • FLOATS

## CAT 313GC

13T EXCAVATOR • TRIMBLE GPS

## CAT 306

6T EXCAVATOR • 2D GRADE CONTROL

## CAT 12M GRADER

ROAD GRADING

## CAT SS250

SOIL STABILISER

## 2013 MACK TRIDENT

TRUCK & DOG • 32T PAYLOAD

## MACK SUPERLINER

PRIME MOVER

## 1983 MACK R600

BOGGIE TIPPER

## DAF TIPPER

BOGIE TIPPER

## DAF JET PATCHER

POTHOLE REPAIR

## TRI-AXEL FLOAT

EQUIPMENT TRANSPORT

ALSO INCLUDES: Flat Bed Truck • Bogie Tipper x4 • Tag Trailer • Water Carts (10,000L & 8,000L) • Step Deck Float • Kubota MX5200HD Laser Level Tractor • Slasher • Forestry Mulcher • Scarifiers

# SKID STEERS & ATTACHMENTS

VERSATILITY • ONE MACHINE, MANY SOLUTIONS

## PRIMARY MACHINES

**CAT 259D**

**ASV RT120**

**TEREX R350T**

## ATTACHMENTS RANGE

**POST HOLE AUGER | GRABS | GRADER ATTACHMENT | TRENCHER | 4-IN-1 BUCKET | PALLET FORKS | GRAPPLE RAKE | 1M PROFILER**

## STABILISATION CAPABILITY

# FULL IN-HOUSE STABILISATION SPREAD

- ▶ CAT SS250 Soil Stabiliser Mill — purpose-built for road rehabilitation
- ▶ Lime Spreader — large and small units for precision application
- ▶ 1m Profiler — milling asphalt and mixing gravels up to 150mm
- ▶ Water Carts — 10,000L & 8,000L for moisture conditioning
- ▶ CAT CB214D Roller — compaction to specification
- ▶ Paveline Truck — bitumen spray bar, chip spreader & snorkel
- ▶ DAF Jet Patcher — targeted pothole and edge repair

## OUR PROCESS

# PLAN → MOBILISE → DELIVER → COMPLETE

## 01 PLAN

Comprehensive site assessment, scope validation and constructability review to ensure project clarity from the outset. Identification of risks, environmental considerations and stakeholder requirements, supported by detailed resource planning and scheduling. SWMS and project-specific safety documentation developed for all activities in line with our ISO-certified systems.

## 02 MOBILISE

Efficient deployment of skilled personnel, plant and equipment to site, ensuring readiness to commence works safely and productively. Establishment of site controls including traffic management, environmental protections and safety systems. Coordination with clients, subcontractors and suppliers to ensure a seamless project start-up.

## 03 DELIVER

Execution of works in accordance with project specifications, program requirements and quality standards. Ongoing supervision, progress monitoring and communication to maintain efficiency and mitigate risks. Strong focus on safety, environmental compliance and workmanship, ensuring consistent, high-quality outcomes.

## 04 COMPLETE

Finalisation of works with thorough quality assurance checks, site clean-up and demobilisation. Completion of all required documentation, including as-builts and compliance records. Handover delivered to client satisfaction, with a commitment to leaving a safe, compliant and fully completed project.

## ISO 9001

QUALITY MANAGEMENT  
2015 CERTIFIED

## ISO 14001

ENVIRONMENTAL MANAGEMENT  
2015 CERTIFIED

## ISO 45001

OH&S MANAGEMENT  
2018 CERTIFIED

### SAFETY

Comprehensive Safe Work Method Statements (SWMS) developed and implemented across all plant, equipment and site activities. Full compliance with WHS legislation and regulations, supported by an ISO 45001-certified safety management system. All personnel are covered by workers compensation and provided with appropriate PPE for their roles. Task-specific risk assessments and Job Safety Analyses (JSAs) are completed prior to works, with ongoing monitoring to manage hazards. Regular toolbox talks, safety briefings and site inspections reinforce a proactive, zero-harm safety culture.

### QUALITY

Robust quality assurance systems aligned with ISO 9001, ensuring all works are delivered to specification and client requirements. Inspection and Test Plans (ITPs) are developed for all project activities, with clearly defined hold points and witness points. A continuous improvement framework drives performance, supported by systematic non-conformance identification, tracking and close-out. All processes are governed by documented procedures, with calibrated survey and testing equipment used to verify accuracy and compliance across all works.

### ENVIRONMENT

Environmental management practices aligned with ISO 14001, ensuring responsible delivery of all projects. Project-specific Environmental Management Plans are implemented, supported by effective erosion and sediment control measures. Spill kits are maintained on all plant and vehicles to mitigate contamination risks. Waste minimisation and recycling practices are embedded across operations, alongside proactive noise and dust management. Flora and fauna protection procedures are followed to preserve local ecosystems and minimise environmental impact.

Fully documented systems, SOPs, ITPs, SWMS, risk assessments and continuous improvement framework across all operations.

## FEATURED PROJECT

# EMERGENCY RECOVERY WORK

NAMBUCCA & MACKSVILLE NSW

## \$2.3M

CONTRACT VALUE

## 30+

SUBCONTRACTORS ENGAGED AND MANAGED

## 0

INCIDENTS / BREACHES

### PROJECT OVERVIEW

Delivery of emergency road rectification and re-sheeting works across the Nambucca Valley and Macksville regions following significant flood events. Undertaken for Nambucca Valley Council under disaster funding, the project included large-scale coordination of resources and reinstatement of critical road infrastructure to restore safety and accessibility.

### SCOPE OF WORKS

- ▶ Rapid mobilisation across regional network
- ▶ Engagement and Management of over 30 subcontractors
- ▶ Large-scale road re-sheeting
- ▶ Material supply, compaction and finishing
- ▶ Lime stabilisation where required
- ▶ Traffic management implementation

## THE SPROCKET CIVIL CREW

### STEPHEN GERSBACH

#### DIRECTOR

- ▶ Oversees all project delivery and client liaison
- ▶ Responsible for strategic planning and operational performance
- ▶ Ensures compliance with ISO 9001, 14001 & 45001 systems
- ▶ 25+ years industry experience within operation, management and design

#### TEAM VALUES

- ▶ Owner-operated
- ▶ Experienced operators across all plant classes
- ▶ Current tickets and certifications
- ▶ Strong safety culture from top down
- ▶ Hiring and supporting locals

## INSURANCE COVERAGE

### PUBLIC LIABILITY

**\$20M**

- ▶ Workers Compensation — full coverage for all staff
- ▶ Comprehensive Plant Insurance — all machinery
- ▶ Motor Vehicle Insurance — entire fleet covered
- ▶ Professional Indemnity — as required by contract

## CERTIFICATIONS & COMPLIANCE

### INTEGRATED MANAGEMENT SYSTEM

- ▶ ISO 9001:2015 — Quality Management System
- ▶ ISO 14001:2015 — Environmental Management System
- ▶ ISO 45001:2018 — OH&S Management System
- ▶ ABN — 11 690 914 026
- ▶ SWMS — for all plant and equipment
- ▶ PPE — provided for all personnel

## CONTRACTING INFORMATION

### FLEXIBLE ENGAGEMENT

Available for short-term emergency works through to long-term contract engagements. Competitive rates with transparent pricing.

### RELEVANT EXPERIENCE

Proven track record in earthworks, sealing and excavation. Experienced team familiar with regulations and project requirements.

## WHY CLIENTS CHOOSE SPROCKET CIVIL

### OWNER OVERSEEING EVERY JOB

Director personally oversees all projects — no layers of management between you and the decision-maker.

### TRIPLE ISO CERTIFIED

Integrated management systems for Quality (9001), Environment (14001) and Safety (45001).

### REGIONAL EXPERTISE

Deep knowledge of Mid North Coast conditions, councils, and community expectations.

### SELF-PERFORM CAPABILITY

Complete fleet of owned plant and equipment. No reliance on external hire means faster mobilisation and cost certainty.

### EMERGENCY RESPONSE

Proven ability to mobilise rapidly for urgent works. Available 24/7 for emergency contracts.

### SAFETY FIRST CULTURE

Zero-incident target with comprehensive SWMS, daily toolbox talks, and full PPE provision.
