WELCOME TO THE PWS 2021 BEDROOM DIRECTORY

PWS is the market leading distributor of kitchen and bedroom components - proudly supplying our customers for over 110 years.

We're committed to continuous innovation and a highly integrated, customer-centric approach. In 2019 we extended the tried and tested PWS formula into the bedroom, by offering high quality and flexible bedroom components in both complete and component format, alongside a dedicated made-to-measure offer and a highly popular sliding wardrobe collection. In 2021 we have expanded our market leading offer even further, by introducing a new Paint-to-order service across some of our best-selling bedroom ranges.

Delivering excellent service and understanding our customers' requirements is at the heart of everything we do, ensuring that it is always quick and easy to work with us, and that our proposition adds real value to your business.

Most importantly, whether you are buying kitchen or bedroom components, you and your business are supported by one personal team, dedicated to providing expert advice, and assisting a professional, streamlined journey from start to finish.

We hope you enjoy the new PWS Bedroom Directory.

...

LEADING INNOVATION

We want to pioneer and define our sector. And, as a long-established organisation, we have unrivalled access to consumer and industry intelligence across product and process trends, which enables us to innovate, differentiate and launch fast.

QUALITY ALWAYS

Quality begins and ends with the customer and we strive to always satisfy your needs. To this end, we have a global perspective in sourcing only the very best products and materials across our categories from around the world, underpinned by a policy of continued improvement in process and service.

TRUE PARTNERSHIP

We want to understand your business and your goals, to develop a partnership via which we can tailor and provide you with specific product, service and commercial benefits.

EXCEPTIONAL SERVICES AND SUPPORT

Dependability, knowledge, expertise, responsiveness and communication, are critical in a multifaceted industry, and these values sit at the very core of PWS. Our customer-centric service culture is personal, efficient and reliable.

PAINT-TO-ORDER SERVICE

At PWS, we're committed to continually improving our service proposition to our customers. Our fully automated, paint-to-order (PTO) service offers an extensive colour palette and a superior quality and finish.

We've recently moved from polyurethane to water-based paint. This allows us to significantly reduce our VOC emissions, whilst also delivering a much higher standard of paint finishing.* Delivered out of our industry leading paint finishing facility at our County Durham headquarters, we employ the very latest technology innovations and manufacturing techniques, with a dedicated quality management team to ensure the highest levels of performance at all times.

ROBOTIC ACCURACY

Our high-performance robotic machinery incorporates the latest in 3D scanning, air filtration, temperature control and drying technology, for the utmost accuracy in application, and consistency of colour and finish every time. The only one of its kind in Europe.

IN-HOUSE QUALITY ASSURED

Our high-quality, Fira Gold Certified paint is machine mixed in-house, and applied in the most highly controlled atmospheres to ensure quality control at all stages.

IT'S ALL IN THE PREPARATION

Specialist sanding and priming technology tailors the preparation of each door material type to optimise the paint adhesion - for a truly flawless finish that stands the test of time.

DRILLING SERVICE FOR PAINTED PRODUCTS

Our drilling service for painted products helps to significantly reduce potential damage - and makes things easier for you and your customers all round.

THE OPTIMUM ENVIRONMENT

Our super-scale dust extraction and filtration network cleans the air in the whole building every hour - to continuously ensure the purest environment and optimum paint finishing conditions.

THE GREATEST CAPACITY AND THROUGHPUT

Our highly automated technology allows us to handle volume with ease, offering the greatest capacity and quickest throughput in the industry. Our robotic paint line can run faster than five metres a minute. It both paints and dries, enabling product to be painted on both sides the same day.

A BETTER, GREENER, WATER-BASED FINISH

Our new water-based paint not only helps us to provide a much greener service, but also delivers a higher quality finish with far greater scratch resistance.

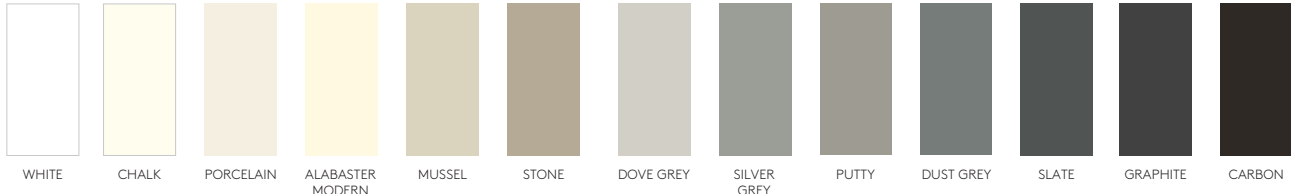

*Our new water-based finish has been implemented across all 35 matt colours.

35 MATT COLOURS TO CHOOSE FROM

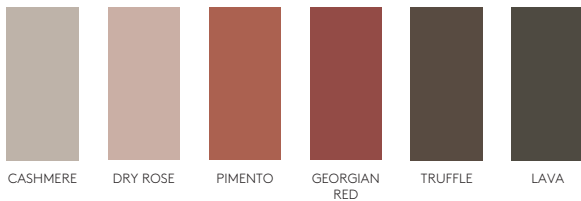

Wherever you see our paint-to-order symbol, this range can be painted in any of our Paint-to-order colours. Ranging from muted neutrals to vibrant shades, our painted palette consists of 35 different carefully considered matt colours.

Paint-to-Order lead-times:

The stated lead-times for Paint-to-Order are for guidance purposes only and always subject to manufacturing capacity. An accurate lead-time, in the form of a delivery date, will be confirmed with each individual order acknowledgment.

*Lead-time based on orders placed before 5pm, Tuesday cut-off.

Because of the variables between the photographic and print process, colours shown in print may vary slightly from the actual product supplied.

See page 1.08 on how to order PAINT-TO-ORDER RANGES

A FIFTH GENERATION BUSINESS

FOUNDED IN 1909

Our story began over 110 years ago, as a family run, independent business in County Durham. From day one, our approach was to create a furniture collection that was innovative, flexible and good quality, all at an affordable price; values that remain strong today.

Still owned by the same family, we've now grown to become the market leading distributor of bedroom components in the UK and our portfolio is as diverse as it is creative.

We go to great lengths to ensure that the suppliers we work with are world class. Our long-standing supplier relationships are built on trust and dependability, driven by our desire to supply innovative, high quality products to our customers.

We're proud to have helped create thousands of homes, forging lasting partnerships with a growing family of valued customers nationwide.

An established family business built for the future.

Darlington, High Row - circa 1909

CUSTOMER-CENTRIC SUPPORT

At PWS, delivering excellent customer service is at the heart of everything we do.

With this in mind our customer-centric support hub is designed to improve our business partnership with you, and make it much quicker and easier to work with us.

This hub joins all PWS kitchen and bedroom sales and customer service teams together in one dedicated place, providing a seamless customer journey, and the most comprehensive range of products and services under one roof.

YOUR PERSONAL TEAM OF EXPERTS AND 'ONE CALL' SERVICE

Our support hub provides all customers with a dedicated team of experts working closely with you at all times - there to support all of your business needs via one quick and easy call. This includes:

**LOCAL
AREA SALES
MANAGER**
(EXTERNAL)

Face-to-face business support in your local area

**BUSINESS
DEVELOPMENT**

SHOP BEDROOMS

**Our new website includes a host of new features to make it easier for you to
TRADE SMARTER - ANYWHERE, ANYTIME, ANY PLACE.**

- ✓ Easily browse our complete collection of over 18,000 products
- ✓ Place, track & check your orders & quotations
- ✓ View instant pricing
- ✓ Quick order entry
- ✓ Brand new consignment area to track deliveries & collections
- ✓ Download the latest Directory, Technical Manuals, consumer brochures & more

AN EASY TO NAVIGATE ONE-STOP-SHOP

From stocked, paint-to-order and bespoke - to accessories, lighting and worksurfaces, you can now find our full kitchen and bedroom portfolio in one easy to navigate place.

ORDERING MADE SIMPLE

We want to make your service experience with us as simple and hassle free as possible which is why we are investing in our online services.

EQ FROM COMPUSOFT

Many customers use EQ and we have worked with Compusoft to integrate our online services, to make placing an order even simpler and real-time through this leading business management platform for the industry.

- Using your PWS login details, place orders electronically through EQ with instant stock availability information and live stock allocation.
- EQ Direct Pricing allows you to download your PWS product prices directly into EQ (PWS list and net prices) without the need to manage the discount lists in EQ.
- As with the PWS website, ordering through EQ directly, rather than by email, allocates the stock immediately to your order.
- You can track and progress your order immediately on the PWS Website.

WHAT DO I NEED?

1. EQ version 14.2.158 and above
 2. PWS website login details
- Set-up in the EQ supplier screen for account placing orders directly and EQ Direct Pricing integration.

CAD PACKAGES

We offer dedicated catalogues in the major CAD software platforms:

BEDROOM MARKETING SUPPORT

CONSUMER LITERATURE

Our high quality, inspirational consumer brochures feature a mix of room set, product and lifestyle photography to help your customer create their dream bedroom.

Order code	Description
KDB1BC	The Bedroom Collection

To order, please speak to your Area Sales Manager or Sales team.

SAMPLE DOORS

All of our ranges are available as samples in either 447x397/397x447 or 570x397 (Unity/Stanhope/Alpina size) to help you illustrate key features and benefits of each design to your customer - see price list for sample doors.

DOORSTAND

Doorstands are the perfect way to display our door ranges in your showroom. Ideal for smaller spaces where room is at a premium, these units allow you to store frontal samples in a compact, tidy way.

Designed to give customers quick and easy access to all sample door styles and colours in one place. Each door stand holds 15 doors. Manufactured from Egger U961 board and 3mm ABS edging with Kesseböhmer door display rails.

UNIT DIMENSIONS

Height 2100mm x width 433mm x depth 600mm

Supplied boxed, flatpack with cam and dowel fixings.
Full assembly instructions.

Order code	Description
DOORSTAND	Door display stand, 2100x433x600mm (No doors) Choose your own doors from our price list.

DOOR DISPLAY RAILS

Effectively display our doors, handleboards and worktop samples using our Chrome finished rails.

- Left and right-hand versions available
- Supplied in packs of 10

Order code	Description
KDRLH	Left handed
KDRRH	Right handed

HANDLEBOARDS

Handleboards are the perfect way to display the wide range of handle options we have available. With the ability to hold up to twelve styles, simply choose the handles you want to display from the handle section in this directory.

Handleboard

Order code	Description
BHANDLE/BOARD	Blank handleboard and clips to attach handles
BHB/CLIPS	Additional clips

PAINT SWATCHES

Paint swatches are the best way to show our full paint-to-order palette.

Order code	Description
CLASSICSWATCH	Paint-to-order colour sample swatch book

SWATCHES

Designed to be a quick and easy tool to showcase all colour options in a handy briefcase size. These swatches can be left on display for browsing customers as they are fully labelled with range and colour references.

Modern, Classic & Internal Accessory Swatches. 3 x Individual come as 18mm rectangular sample sets.

All of the available finishes in our Alpina made-to-measure ranges are available in a swatch booklet.

Stanhope samples available on request.

Order code	Description

Visit www.pws.co.uk/bedrooms and explore over 60 trend leading kitchen and bedroom sets.

To book a visit contact us at sales-support@pws.co.uk

SHOWROOM DESIGN SERVICE

We're proud to offer all showroom based customers access to our dedicated showroom design service for both kitchens and bedrooms.

From advice on a single door swap to full showroom planning, our experienced designers can help to take the hassle out of planning and designing your displays. Working closely with you, they can create tailored designs which will fit beautifully, accurately, and commercially in your showroom – whilst being on hand to offer expert design advice on the latest products, materials, colours, finishes and details.

We all know that consumers like to buy what they have seen. This is why many retailers ask our designers to help them replicate our imagery in their showroom. This can often help you to ensure a consistent consumer journey, with designs that may have already been seen in our brochures or online marketing platforms, and that your customers can trust and begin to imagine in their own home.

Additionally, many of our retailers often plan their display updates in line with our product launches, which tend to generate the most demand from consumers looking to recreate these featured looks.

Our designers can also assist with the wider elements of your showroom design.

From work/meeting spaces, entrance ways, and sample/specification areas, to completely bespoke concepts, as well as providing advice on styling, materials and finishes, our showroom design service will help to create effortless flow and maximum engagement - and truly bring your space to life.

To request a kitchen or bedroom showroom design contact
showroomdesign@pws.co.uk

Receive stunning 3D designs, overview plan with dimensions, full technical drawings, component and internal storage break downs, as well a quote for your display.

COMPLETE BEDROOMS INSTALLATION PROPOSITION

When purchasing a complete bedroom we can offer you additional services.

INSTALLATION - COMPLETE BEDROOMS

All of our Bedroom installers have had intensive training to ensure that they can continue delivering you an exceptional service. From initial design to installation you can be assured that your customers fitted bedroom will be installed within four to six weeks of the order being placed.

Designed & Quoted

Once your design and quotation has been created in your store and submitted to your assigned customer service member, it will be listed as 'subject to survey' until installations@pws.co.uk qualify your order and design, and arrange a pre-installation home survey.

Pre-installation home survey

Within one week from receipt of your order, one of our bedroom fitters will arrange a pre-fit home survey. This survey will last approximately 30 minutes and will assess the site to check that dimensions in the design are correct and whether there are any obstructions or access problems for delivery. Once satisfied, a date within 4 weeks to deliver and install the furniture will be arranged by phone or email.

Surveys & installations

For all survey and installation queries contact:

Email: installations@pws.co.uk
Tel: 01325 329450

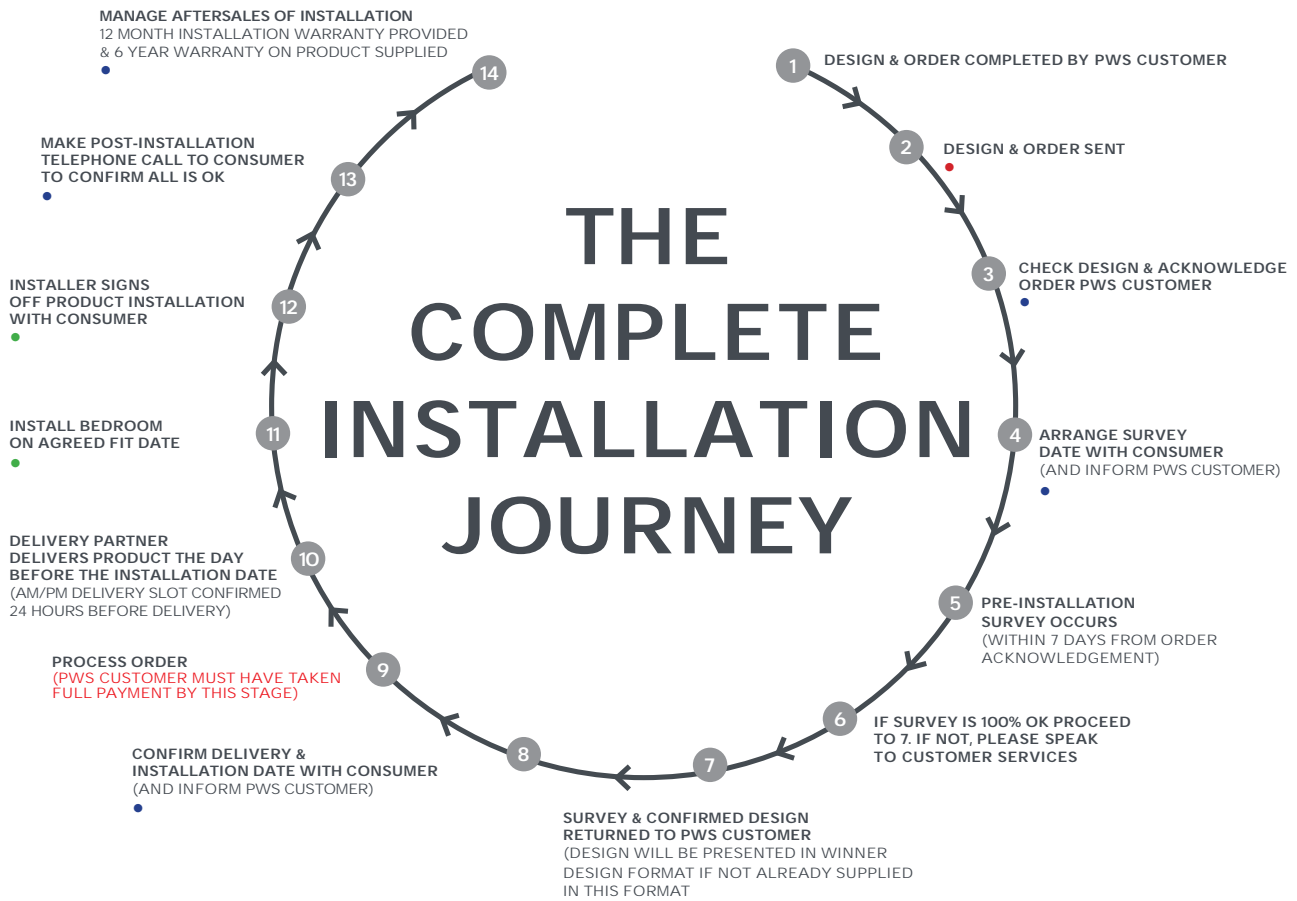

Premium Delivery

We provide a premium delivery service. There will be an option for the consumer to select a specific delivery day and delivery slot between Monday to Friday, 8am to 5 pm. Delivery will be made at least one day before installation commences and a call will be made one hour before delivery to confirm that plans can still go ahead. Additional delivery costs apply.

Paint-to-Order lead-times:

The stated lead-times for Paint-to-Order are for guidance purposes only and always subject to manufacturing capacity. An accurate lead-time, in the form of a delivery date, will be confirmed with each individual order acknowledgment.

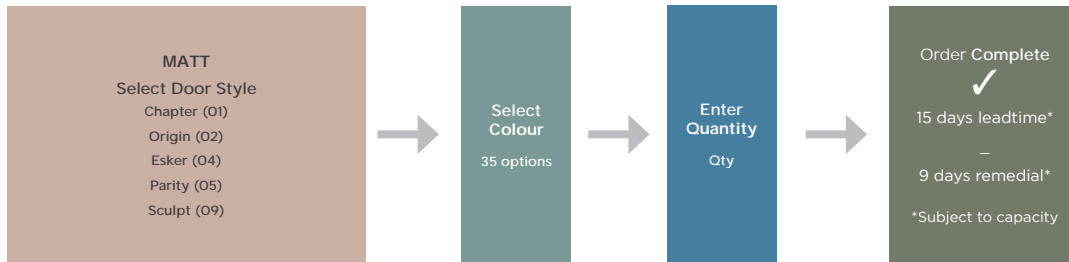

*Lead-time based on orders placed before 5pm, Tuesday cut-off.

Because of the variables between the photographic and print process, colours shown in print may vary slightly from the actual product supplied.

PAINT-TO-ORDER ORDER FLOW CHART

The easiest way to order is at www.pws.co.uk/bedrooms

When placing orders for paint-to-order doors please be aware of the following:

- 1.** Stated lead times for Paint-to-Order are designed as a guideline and always subject to manufacturing capacity.
An accurate lead-time, in the form of a delivery date, will be confirmed with each individual order acknowledgement.
- 2.** Orders for paint-to-order door ranges can be placed by email or via the PWS website.
Upon receipt of each order to PWS you will receive an itemised order acknowledgement.
- 3.** Due to the bespoke nature of paint-to-order products, it is not possible to cancel or amend orders once placed.
Additions to an order will be processed as a new order.
- 4.** Orders for painted product will be dispatched upon completion of the full order
No part orders will be dispatched.
- 5.** PWS cannot accept the return of surplus paint-to-order product.
- 6.** Although we strive to maintain consistency, as a painted product there will be batch-to-batch variances.
PWS cannot guarantee an exact colour match between orders. We do not recommend mixing doors ordered through paint-to-order with doors ordered from stock.
- 7.** The paint colours depicted in our marketing materials are indicative of the colours of the painted product.
Paint colours do vary batch to batch and substrate to substrate.
- 8.** A selection of care and maintenance kits are available for paint-to-order colours.

SERVICE OPTIONS

PAINT-TO-ORDER (XX)

15 working days
9 days remedial

Dark colours will be painted on a lighter material. When painting a mirror door you may be able to see a small reflection of the lighter finish around the edge of the mirror.

Due to the manufacturing process of the Chapter & Origin Mirror doors, you may see a line of the lighter primary material around the edge of the mirror, which is more noticeable on the darker painted finishes.

FRONTAL SPECIFICATION:

DOOR STYLE	Classic Shaker with Beading. 7 piece wardrobe door construction. 5 piece feature door construction
DOOR THICKNESS	19mm
DOOR WIDTH	397/447/497mm
SPECIFICATION:	Shaker profile with Beading

STILE WIDTH	85mm
MID RAIL WIDTH	95mm
CENTRE PANEL RECESSED	6mm

FINISH:	Alfatherm foil finish - woodgrain / paint effect 19mm wrapped MDF

MADE-TO-MEASURE RANGES & LEADTIMES

HOW-TO-ORDER MADE-TO-ORDER RANGES

- ORDERING WITH CODES FROM 'QUICK-GLANCE' SIZE LIST**
For quick ordering, accessories can be ordered with supplied codes - please see relevant pages in this section for more information.
- ORDERING BESPOKE DOOR SIZES**
The PWS Price List includes a 'next-size-up' pricing table for all made-to-measure ranges that can be used to understand instant pricing for bespoke sizes.

THE EASIEST WAY TO ORDER IS ON WWW.PWS.CO.UK/BEDROOMS

*MADE-TO-ORDER delivery dates will be confirmed with each order acknowledgment.

WHEN PLACING ORDERS FOR MADE-TO-ORDER DOORS, PLEASE BE AWARE OF THE FOLLOWING:

- Orders for made-to-order door ranges can be placed by email.**
Upon receipt of each order to PWS you will receive an itemised order acknowledgement.
- Due to the bespoke nature of made-to-order products, it is not possible to cancel or amend orders once placed.**
Additions to an order will be processed as a new order.
- Orders for made-to-measure product will be despatched upon completion of the full order.**
No part orders will be despatched.
- PWS cannot accept the return of surplus made-to-order product that may have been ordered incorrectly.**
- Although we strive to maintain consistency, there may be batch-to-batch variances with made-to-measure product.**
We cannot guarantee an exact colour match between orders.
- PWS made-to-order ranges depicted in our marketing materials are indicative of the colours, however colours may vary batch to batch.**

THE MADE-TO-MEASURE COLLECTION

UNITY

Unity is a made-to-measure collection of edged slab doors, available in an extensive choice of 23 finishes including high gloss, soft-touch supermatt, metallics, concrete effect and woodgrain effect, with a choice of two edge options. Manufactured in the UK, doors are available in any size (up to 2540mm high x 897mm wide) and with the additional flexibility of angled doors, it makes Unity ideal for bedrooms.

UNITY SHOWN IN SUPERMATT LIGHT GREY AND SUPERMATT PURE WHITE

KEY FEATURES

- Fully made-to-measure collection manufactured in the UK
- **23 stunning finishes in 5 different finish types**
- Two edge options
- Angled doors
- Drilling service
- 11 day lead-time
- Six-year guarantee
- Can now be ordered with an accompanying cabinet

UNITY COMPONENT

Made-to-Measure size guide

MADE-TO-MEASURE SIZES

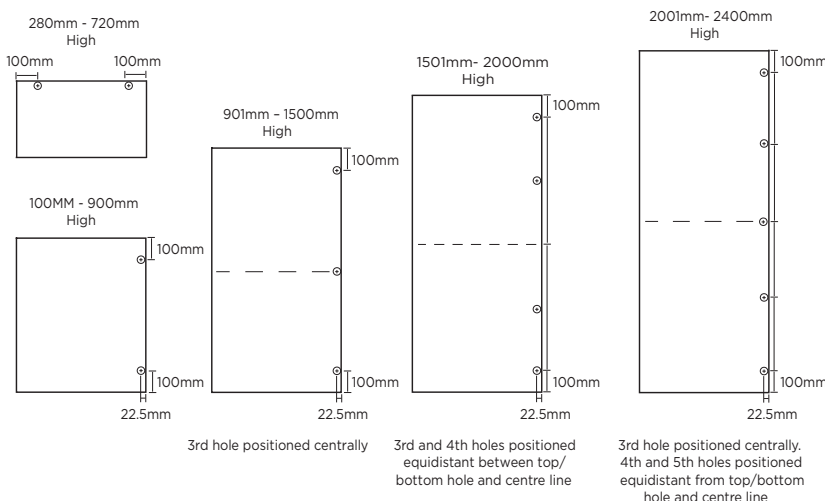

ANGLED DOORS

- Angled doors are available within the same door size parameters listed above (up to 2540x897mm)
- When ordering, please specify the type of angled door (A or B) and dimensions for Left Hand Height (LH), Right Hand Height (RH), Bottom Width (BW) and for stepped angled doors specify Top width (TW).
- Additional 5 day lead time will apply to orders that include angled doors.

DOOR DRILLING SERVICE

Default hinge holes by door size (based on standard PWS drilling pattern - see below)
Please note: illustrations shown are Left Hand.

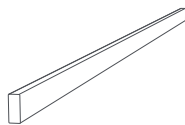

- A door drilling service for Unity is available, charged at £1 a hole.
- PWS's recommended standard drilling pattern is 100mm (+/- 1mm) from the ends with a 13.5mm deep hole (+/- 0.5mm), hole diameter of 35mm (+/- 0.2mm) and centre of hole 22.5 (+/- 0.5mm) from the side from side.
- Door drilling can be selected at the point of order on pws.co.uk or by completing the PWS 'UNITY ORDER FORM'.
- Additional hinge holes will be drilled by default depending on door height as indicated in the above illustrations.
- Top Box drilling is available for door heights between 280-720mm high (Top Box application must be specified at the point of order).
- Due to a directional finish, drilling on metallic doors should be stipulated left or right hand (please note illustrations shown above are left handed).
- Drilling is not available on angled doors or end panels.
- Please allow 2 days' additional lead-time to all orders that require drilling.

RECOMMENDED COMBINATIONS

Single

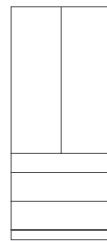

Double

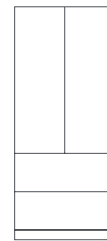

Stable door

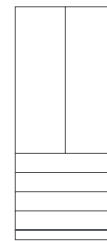

Feature door

2 door,
1 x small drawer
2 x medium drawer

2 door,
2 x large drawer

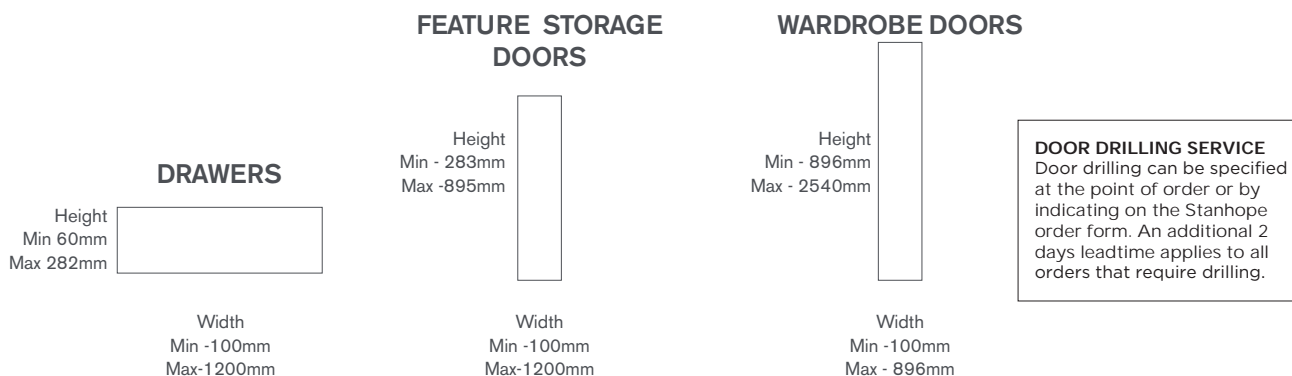

2 door,
4 x small drawer

A stable door will be possible but you will need to be aware of the parameters e.g. Stile/rail on your chosen door style.

DOOR/DRAWER SIZE PARAMETERS

Size parameter exceptions:

BOLAM:

Minimum door width with internal Shaker design - 275mm

ACOMB:

Minimum drawer/door width - 240mm. Integrated handle profile on drawer fronts and doors below 1699mm high have a 200mm long groove on the top. Doors above 1700mm high have a 900mm long groove on the left/right hand side.

ELSDON:

Minimum drawer height with internal Shaker design - 160mm

Min drawer width with internal design - 230mm

Min door width with internal design - 230mm
Bedroom door 1495 high panels will be sized to match in line with 2155 door.

- 1 Panel door/drawers below 649mm
- 2 Panel doors 650-1699mm
- 3 Panel doors 1495 only
- 4 Panel doors 1700+ over

3 panel doors are available for <1699mm. Please state at time of order.

Please state at time of order If cross rails need to align across all bespoke sizes.

Grain Direction

- Drawer fronts are supplied with horizontal grain as standard
- Standard and Tall doors are supplied with vertical grain in all finishes except Gloss Haze which is horizontal on all drawers/doors.

Doors for corner cabinets

Doors can be supplied with either left or right side edge square. Available up to Max. 1699mm high.

Wardrobe doors

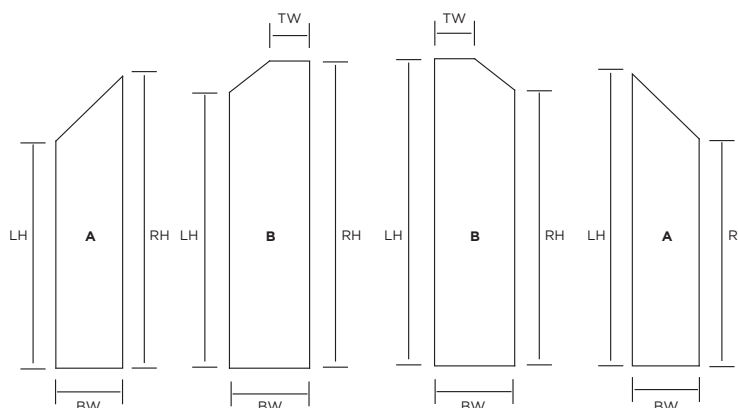

Wardrobe door designs with two panels will be supplied with the mid rail at 655mm from the bottom edge to the centre of the mid rail as standard unless otherwise specified.

ANGLED DOOR OPTIONS

Only available in Bolam, Whitfield and Henshaw.

Angled doors are available in a wide variety of angles and shapes as shown in left illustration and the PWS Stanhope order form.

- Angled doors are available within the same door size parameters listed above (up to 2540x896mm)
- Angled doors are not available in gloss
- When ordering, please specify the type of angled door (A or B) and dimensions for Left Hand Height (LH), Right Hand Height (RH), Bottom Width (BW) and for stepped angled doors specify Top width (TW).
- Additional 5 day lead time will apply to orders that include angled doors.
- Door sizes above 1700mm high in Bolam, will be supplied with a mid-rail as standard. Mid-rail height is 6x5mm as standard unless otherwise specified at order.

ACCESSORIES

OPEN FRAME DOORS

Open frame doors are available in all door styles in any size.

3 frame options are available on doors:

Min height 1700mm - Max height 2540mm. The top open and top & bottom open frames are available with any mid rail height (655mm supplied unless other requested). Min width 296mm - Max width 650mm.

When ordering, use the prefix codes for the relevant colour in place of ****BESPOKE**

SLIDING

HOW-TO-PLAN YOUR SLIDER

Measure your space

Ensure you are fully equipped to start planning. Measure your space wall to wall, including ceiling heights. Remember to note down things like:

- ✓ Sockets
- ✓ Switches
- ✓ Window ledges
- ✓ Radiators
- ✓ Doors

Create a wardrobe run

You will need to decide how many doors you would like for your run. Whether its 2, 3 or 4.

Please bear in mind if you are using internal storage how this would work with the number of doors you require.

- * Minimum door = 600mm
- * Maximum door = 1100mm

STEP 1

Choose your Aluminium frame profile

Depending on the look you are aiming to achieve with your sliding wardrobe will depend on the frame you may choose. We have five frame types and six frame colours to choose from; some may be easier for you to open than others as each frame type has a different shape.

Its best that you take the time to select the frame that is best for you as once selected it cannot be changed.

Your tracks will be supplied in the same colour as your chosen frame profile.

STEP 2

Choose your door designs

Choosing your desired door design may come hand in hand with choosing how many doors you require; If you would like your wardrobe to look a certain way it may depend on the width of your space determining how many doors you will require.

When you know, you can choose any mix of door designs within your wardrobe run, with any mix of colours or materials.

SLIDING

STEP
4

Choose your end panels and liners

If your wardrobe is going wall to wall you will only require liners but if you require one or two ends open, you will need to choose an end panel as well as a liner. You can choose from matt and gloss coloured board or woodgrain board to frame your wardrobe.

If you need a bit of help on what colours complement each other, why not take a look at our painting guide on page 1.94.

STEP
5

Choose your shelf and hanging rail

Whether you simply want a shelf and hanging rail or something a bit more, you can tailor the internals depending on your storage needs.

**HANGING RAIL**

The shelf is supplied at 2800mm (length) x 620mm (depth) with 2 x support batons.

The hanging rail has a maximum width of 2500mm. Please be aware of this when planning internals.

SLIDING RANGE TO BOARD MATCH

HOW TO USE THE BOARD MATCH CHART

Whether you are looking for a board match on the sliding collection alone, or would like to see which colour chests or bedframes you can mix with the sliding collection, this sliding board match table should have all the matches you require.

	SECTION 1 WARDROBE/CHESTS		SECTION 2 SLIDING		
	Glass Colour 8mm	Satin Glass Colour 8mm	Board Colour 8mm	End Panels & Liners 18mm	Internal Colour 18mm
These finishes are relating to the MODERN COLLECTION: - Modern Chests - Sculpt - Parity - Flow - Esker	Modern - Matt

Stone	CASHMERE	SATIN CASHMERE	CLASSIC STONE	CLASSIC STONE	N/A

TO MATCH;

Wardrobe/Chest finishes with sliding finishes.

Use both sections. Use the left column to choose your finish. View horizontally to see which Sliding door finishes, end panels/liners and Internal colours are the best match for your chest finish.

TO MATCH;

Sliding door finishes with end panels and internals.

Only use Section 2 - Sliding. View horizontally to see what recommendations we have to the closest match when choosing your sliding doors and accessories finishes.

EXAMPLE:

If you have chosen a Modern Matt Cashmere Chest, we think the closest colour match to this finish for sliding doors would either be (1) Gloss Cashmere door, (2) Satin Glass finish would be Satin Cashmere or (3) Matt Cashmere board finish. If you were looking for the end panel match for your slider, this would be Matt Cashmere (4), as well as the internal colour (5).

SLIDING RANGE TO BOARD MATCH

We do not recommend using gloss or woodgrain colours as internals as they are prone to marking and damage. However these are available should your customer want them.

SLIDING HOW TO MEASURE GUIDE

Follow our measurement guide to accurately complete your order form.

To receive an order form please contact the sales team by emailing sales-support@pws.co.uk or calling 01325 329 050

Measure your space

It is very important that you take accurate measurements before ordering your sliding wardrobe.

Use a **spirit level** to check the walls, ceiling and floor is level.

If the floor is very uneven, the doors may slide unintentionally!

We hope to eliminate any instances where the floor and walls may be slightly out with the liners that the tracks and doors fit too on both the floor and the top of the wardrobe.

MAXIMUM

The maximum tolerance we are likely to be able to adjust is 15mm when the walls are not straight.

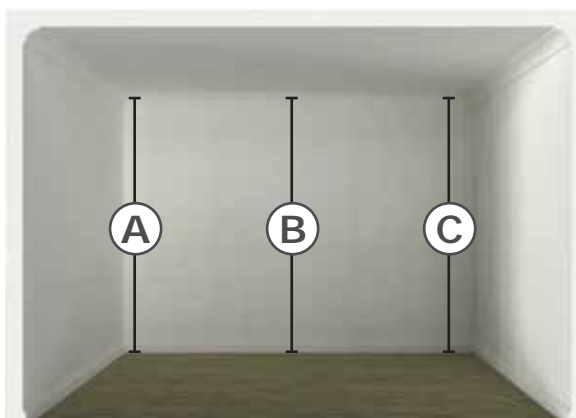

You can have full floor to ceiling sliding doors on any height opening, up to a maximum of 2500mm.

MINIMUM

Our smallest recommended opening width for sliding doors is 1100mm.

WALL TO WALL

Measuring height

1A

Measure the height of your opening in at least three places.

We recommend measuring both outside uprights (A & C) and from the centre (B)

IMPORTANT: Please always provide us with the smallest measurements

Remember to include factors that may affect the position of your wardrobe such as sockets, switches, window ledges or pipes etc.

Measuring width

1B

WALL TO WALL

It is important to check the walls with a spirit level to see if they bow or curve. Our liners will eliminate any instances up to a maximum of 15mm. If the walls are out by more than this, we will add additional liners or end panels depending on the difference to ensure the opening can be made straight.

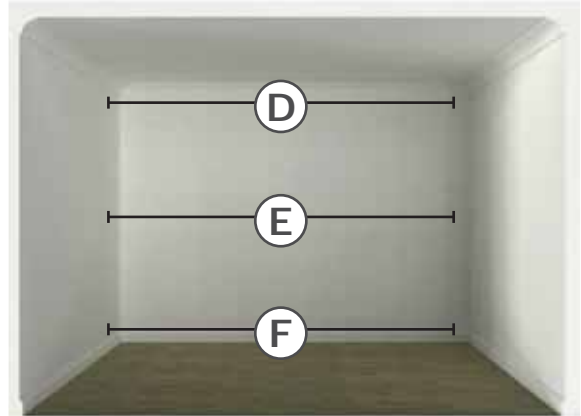

If you have coving and skirting, we will need to remove a section to fit the liner to during the installation

Again, we recommend you measure the width of your opening in at least three places. We recommend measuring the top (D) bottom (F) and from the centre (E)

Please ensure you measure (F) above any skirting board and (D) below any coving that may hinder wardrobe installation.

IMPORTANT: Please always provide us with the smallest measurements

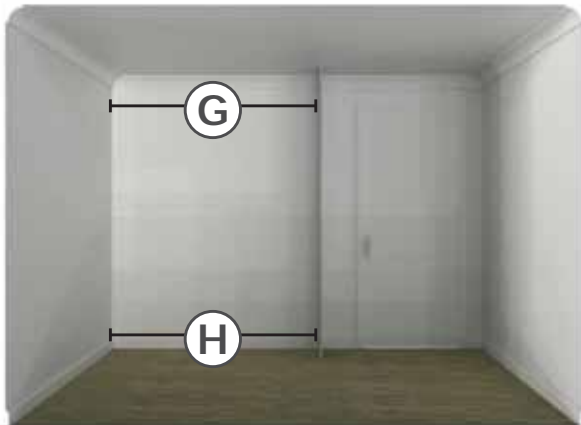

Single end panel

2

If your wardrobe cannot go from wall to wall because of obstructions such as a door, or your room does not require a wall to wall wardrobe you can use an end panel on one end.

We still recommend you measure the width of your opening in at least two places. We recommend measuring the top (G) bottom (H)

IMPORTANT: In the case of wall to end panel measure the dimension from the wall you would like the wardrobe to fix to along to the proposed end where the end panel will be.

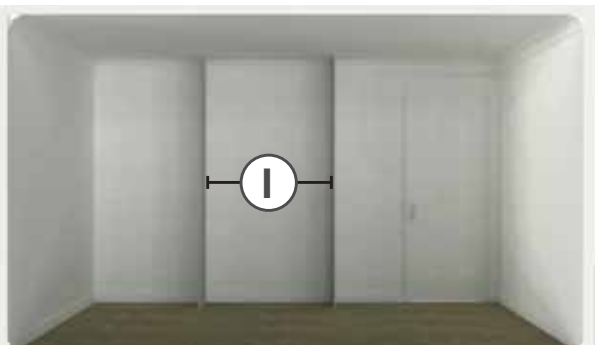

Double end panel

3

If your wardrobe cannot go from wall to wall or you do not want to have it fixed to a wall at one side; you can create a free-standing sliding wardrobe in an open space. *As long as the back of the wardrobe can fix to a flat wall.*

You will need to measure the entirety of the open space you would like to have a sliding wardrobe. (I)

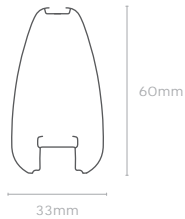

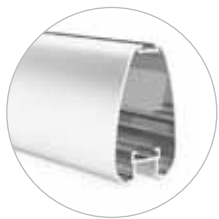

IMPORTANT: provide the maximum width you want your wardrobe to be.

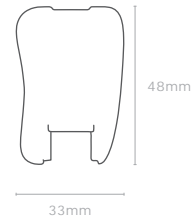

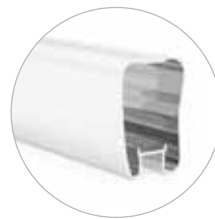

SLIDING

FRAME OPTIONS

The look you are aiming to achieve with your sliding wardrobe will depend on the frame you may choose. We have five frame types and six frame colours to choose from; some may be easier for you to open than others as each frame type has a different shape. Its best that you take the time to select the frame that is best for you as once selected it cannot be changed.

DOOR DESIGNS

Truly bespoke in function, we offer seven designs to choose from. You could choose to have all of your doors within one or multiple door designs.

Choosing your desired door design may come hand in hand with choosing how many doors you require; If you would like your wardrobe to look a certain way it may depend on the width of your space determining how many doors you will require.

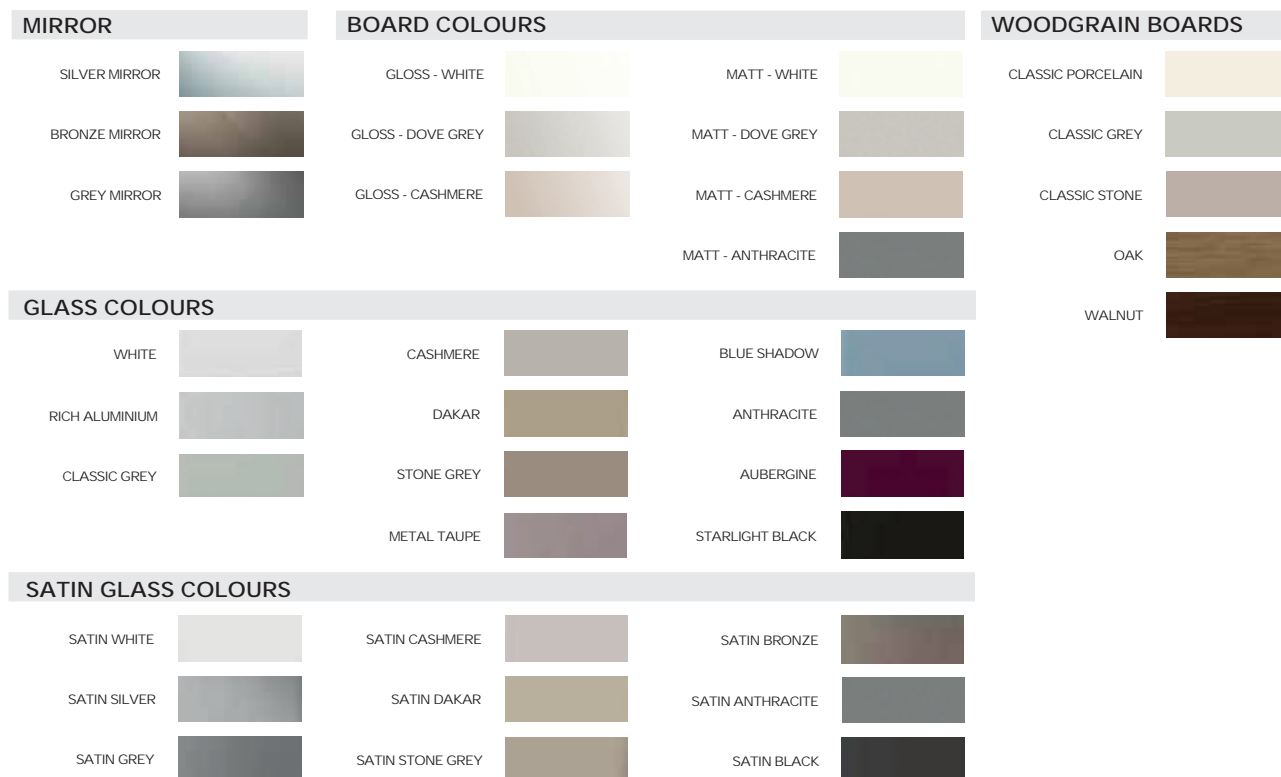

You can choose any mix of door designs within your wardrobe run, with any mix of colours or materials.

DOOR COLOURS

Choose from over 35 door colour options ranging from glass, satin glass, mirror, matt, gloss and textured woodgrain boards.

Depending on the door design you can mix and match up to three materials.

SLIDING ACCESSORIES

END PANELS AND LINERS

In a wall to wall wardrobe we always recommend using 4 x liners to create a finished edge for the doors to run into. These also help to disguise imperfections where walls, floors and ceilings are uneven.

End panels are great to use if you don't have a wall to wall space, or to reduce the height left at the top of the wardrobe in instances with high ceilings.

END PANEL

SLIDING INTERNALS

SHELF AND HANGING RAIL

The shelf and hanger rail provides a practical standard hanging solution.

It can be used individually or as multiples, combined together with the use of an end panel between for larger widths; additionally to this you could use end panels to create shelves.

The shelf is supplied at a 2800mm (width) x 620mm (depth) and comes with two baton lengths for support. It is important to note that the maximum length of a hanging rail is 2500mm. The hanging rail comes with a central vertical support, two end brackets and two ceiling fixture supports as standard. Please speak to a member of our team for further information on alternative options.

SHELF AND HANGER

Standard storage fits a maximum width of 2800mm and are 620mm deep

COLOURS FOR SHELF AND HANGING RAIL

Panel thickness 18mm

We do not recommend gloss panels for shelves and hanging rails as they are more likely to scratch and mark.

BOARD COLOURS	WOODGRAIN BOARDS		TEXTURED
MATT WHITE	CLASSIC PORCELAIN	OAK	BEIGE LINEN
MATT CASHMERE	CLASSIC STONE	WALNUT	GREY LINEN
MATT DOVE GREY	CLASSIC GREY		
MATT ANTHRACITE			
HANGING RAIL			
SILVER			

Additional hanging rail end brackets and central bracket for vertical supports are available on request.

CO-ORDINATING MFC BOARD OPTIONS

The below MFC board options are only suggested matches to our door colours and do not necessarily offer a direct match. We strongly recommend that you order board samples and compare against the door before making your final cabinet finish selection.

A modern wardrobe with a dark wood finish and gold-colored hardware. The wardrobe is open, revealing a hanging rail with several items of clothing, including a white checkered shirt, a red dress, a white shirt, and a dark jacket. Below the hanging rail are shelves with various accessories, including a black belt, a black bag, and a pink box. At the bottom of the wardrobe are three drawers with gold-colored handles. The wardrobe is illuminated by a warm, ambient light strip along the top edge.

REMINDER

- To complete your stackable drawer a set, 1 x shelf pack of the same width needs to be added to your order.
- Each stackable drawer is supplied with x2 fillers which will require cutting. These conceal the drawer runners.
- This means when using more than one drawer per wardrobe there will be excess fillers.
- Comes supplied with fixings.

 SE9009	HD LED Link Cable - 2.5m - Extends the cable on fitting This extension cable can be used with all products which are run via a green driver

See page 4.07 for Drivers

DRIVERS

HOW TO CALCULATE YOUR DRIVERS

In order to power Sensio light fittings the following drivers are required. Each driver's main cable length is 1.5m. It is important to note that our drivers have a limited number of ports to connect your lights to. For example a driver with 6 ports is limited to a maximum of 6 lights.

Each driver can run a number of lights. Simply divide the wattage of the driver by the wattage of a single light and this will tell you exactly how many lights can be run by the driver.

Example: 15W driver with 3W lights, 15 / 3 = 5 lights

TITAN 6W/24V Low Profile Driver

Code	Power	Description
BSE490950	6W	Driver with 4 ports

TITAN 15W/24V Low Profile Driver

Code	Power	Description
BSE491950	15W	Driver with 6 ports

TITAN 30W/24V Low Profile Driver

Code	Power	Description
BSE492950	30W	Driver with 6 ports

DIMMABLE 24V/60W DRIVER

Compatible with Leading/Trailing Edge Dimmers

Sensio mains dimmable constant voltage driver can supply up to 60W of Sensio LED fittings.

The driver is compatible with the majority of trailing/leading edge dimmers and can be wired in the normal configuration with the dimmer switch in the live feed to the driver.

The device is class 2 and accordingly does not need an earth connection. It is suitable for indoor use only and feature a 230V input for UK or European use.

- Energy Efficient (High Powder Factor >0.95)
- Suitable for the supply of up to 60W Sensio LED fitting
- Fully isolated
- Dimmable range 5% to 100%

Code	Description
BSE40699	Dimmable 24V/60W Driver

HD LED LINK CABLE

2.5m

- HD LED Link Cable - 2.5m - Extends the cable on fitting
- This extension cable can be used with all products which are run via a green driver

Code	Description
BSE9009	HD LED Link Cable

SENSORS

250W MOTION SENSOR SWITCH

WATTAGE: 250W
USE WITH: 12V, 24V OR 240V PRODUCTS
CUT-OUT: 20mm
CABLE LENGTH: 1.5M
DETECTION RANGE: 0.5M-2.5M

This can be mounted inside a cabinet unit and will detect once the door is opened and will switch the light fitting on.

Code	Description
BSE40515	250W motion sensor switch

CABINET SENSOR SWITCH

WATTAGE: 250W
USE WITH: 12V, 24V or 240V products
CUT-OUT: 13m
CABLE LENGTH: 2m
DETECTION RANGE: 5-10cm

Recess into the front of an interior shelf inside the cabinet. On opening the door the connected internal lights will switch on, when the door is closed the lights will switch off.

Code	Wattage	Qty	Driver
BSE40518	250W*	1	Required

* Maximum

WARNING:

All light fittings must be fitted by a qualified electrician. Care must be taken where lights are enclosed in a cabinet, ensuring there is adequate ventilation. Light fittings should not be fitted in the vicinity of flammable surfaces.

BACKFLIP

The Evoline BackFlip sits nearly flush on a worksurface. At a touch of a finger, it turns 180 degrees to reveal two power sockets and a USB charger. With a total installation height of just 53mm, the BackFlip can be fitted above most drawers. Perfect to use on custom desks.

*European socket is shown for display purposes only. This product will come with a UK socket.

AVAILABLE FINISHES

Black Glass (Gloss)
Product Code: BBF2BK

Stainless Steel
Product Code: BBF2SS

White Glass (Gloss)
Product Code: BBF2WH

A modern, well-organized walk-in closet. The closet features glass-fronted cabinets with dark wood frames. Inside, there are wooden shelves holding folded clothes, handbags, and perfume bottles. Several coats, including a leopard print one, are hanging on hangers. The floor is made of light-colored wood, and a tufted ottoman is visible in the foreground.

DOOR BUFFERS & PADS

CHAMELEON DOOR BUFFER

Standard

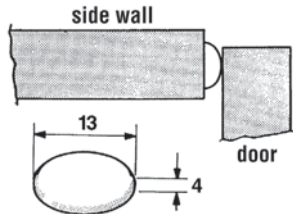

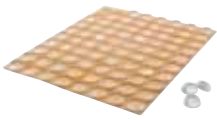

- Translucent finish
- Self-adhesive clear plastic buffer
- Suits any carcass colour
- Absorbs the impact of doors when using self-closing hinges
- 10mmØ x 3mm thick
- Supplied in sheets of 96 pieces
- For quantities, please refer to the price list

Order code
B3203

CHAMELEON DOOR BUFFER

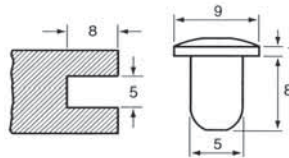

Heavy duty

- Translucent finish
- Self-adhesive clear plastic buffer
- Suits any carcass colour
- Absorbs the impact of doors when using self-closing hinges
- 13mmØ x 4mm thick
- The increased surface area ensures greater adhesion
- Supplied in sheets of 80 pieces
- For quantities, please refer to the price list

Order code
B0038

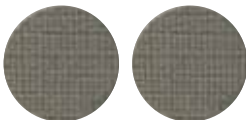

DOOR BUFFER

- Translucent finish
- Plastic door buffer
- Fits into a 5mmØ hole
- Suits any carcass colour
- For quantities, please refer to the price list

Order code
BDB2TR

LINEN STICKERS

Order code

ZZKDVA0480	9mm linen cover stickers (shelf drawer runner holes) - Approx 60 per sheet
ZZKDVA0481	14mm linen cover stickers (used on cam holes) - Approx 20 per sheet

SELF-ADHESIVE PADS

- 300 white polyethylene foam pads
- Adhesive on both faces
- Supplied in a dispenser box
- Suitable for positioning items prior to screw fixing
- Dimensions: 25mm x 12mm x 2mm

Order code
BDSP300

POWERSTICK 2 PACK ADHESIVE

- Bonds in seconds. This quick tool-free system is suitable for jointing a wide variety of timber, plastic, and metal products
- Aerosol CFC free
- POWER1 - 12 month shelf life

Order code Description

BDPOWER1	Pack of 50g adhesive/200ml activator
BDBPOWER1	Box of 12 powerstick, shrink wrapped pack of 200ml activator and 50g adhesive

ADJUSTABLE LEGS & SOCKETS

One-piece or two-piece legs

- One-piece legs offer the most economical system. However, using a separate fixing socket gives considerable handling advantages.

Which fixing system?

- Bolt fix or screw fix for low/medium level production
- Dowel fix for large scale production

Plastic, steel, or decorative legs?

- Plastic legs are economical and strong
- Steel legs are more suitable for heavy duty applications - use with steel fixing sockets
- Decorative legs are used where no plinth is used

Which height?

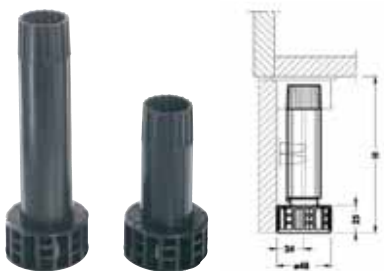

- 150mm for kitchens, 100mm for bedrooms. 140mm are available for special circumstances (e.g. uneven flooring)

End panel support

- All the sockets & leg fixings are designed to overlap the base/end panel joint, reducing joint loading

SERIES 450 Plastic

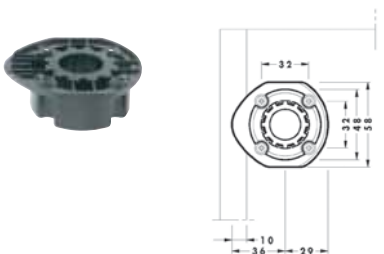

- Adjustable leg plastic
- Foot Ø: 48mm
- Leg height: 100mm or 150mm
- Adjustment range -5mm, +20mm
- Bulk packs of 2000 available

Socket compatibility: Plastic only

Order code	Description
B450 10 P2 OX O2	100mm high leg
B450 15 P2 OX O2	150mm high leg
B450 15 B2 OX O2	150mm bulk packed leg only

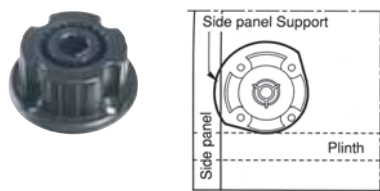

BOLT/SCREW FIX SOCKET Plastic

- Fix using 4x4mm chipboard screw (not supplied)
- Dimensions: 58x65mm, reduced flange
- End panel support
- For quantities, please refer to the price list

Order code	Description
B840 00 P2 H5 00	Bolt or screw fix, 58x65mm, plastic

BOLT/SCREW FIX SOCKET Plastic

- Fix using 10mmØ, bolt or 4x4mm chipboard screws (not supplied)
- Bolt fixing allows adjustment from inside or outside of the base unit
- Dimensions 60x60mm
- End panel support
- For quantities, please refer to the price list

Order code	Description
BDNO	Single bolt/screw fix socket

PLINTH CLIPS

Plinth Clips

- 24mm offset should be used when the leg is required to give end panel support. The plinth should be rebated to avoid a gap between the gable panel and plinth
- To fit the leg in this way the centre leg should be positioned 24mm from the edge of the base panel (assuming the plinth and the gable panel are the same thickness and the plinth rests flush with the gable). If the leg is to support the base panel only, the centre of the leg should be at least 30mm from the base end panel edge
- A 30mm offset plinth clip can be used to bring the plinth flush with the gable panel (no rebate required) or a 24mm offset clip with the plinth by 6mm

Adjustment

- Hollow bolt fixing allows leg adjustment from the inside of the carcass, making carcass levelling easy
- Screw or dowel fixing also allows internal adjustment by drilling a 10mm hole centrally over the leg and plug with a 10mm plug cap

Hidden mounting

- Cover caps are visible from the inside of the carcass, however screw or dowel fixing methods are unseen when installed with no internal adjustment

 **CAMAR**[®]
the art of innovation

SERIES 228 Steel and plastic

- Adjustable plinth clip
- Height: 30mm
- Offset: 24mm
- Fixing: screw fix, 3mm x 4mm chipboard screws (not supplied)
- For quantities, please refer to the price list

Leg compatibility: 350, 418, 415, and 450 series

Order code	Description
B228 30 24 VI T2	Adjustable plinth clip

TABLE & WORKTOP SUPPORT LEGS

SERIES 615 & SERIES 620

- 570kg load capacity
- Both series 615 and 620 feature an adjustable foot
- Leg fixes to the underside of the worksurface using a screw-fix patented die-cast socket on both series
- 60mm and 80mmØ options

Order code	Finish	Dia	Height	Adj	Packing
B615 70 C1 O4 RN	Chrome	60mm	710mm	+30mm	set of 4

B806 00 NS 00 SX	Nickel	Cover cap, left hand
B806 00 NS 00 DX	Nickel	Cover cap, right hand

When using a concealed wall hanging bracket, a wall hanging rail will be required and should be secured to the wall using appropriate wall plugs and screws depending on the wall construction.

WALL FIXINGS

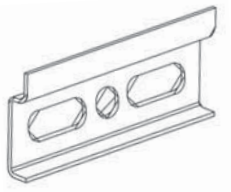

SLIMLINE STEEL HANGING RAIL

- 26mm steel rail which supports the wall unit cabinet hangers at any point along its length
- Especially suitable for hollow plasterboard walls
- Rail thickness 1.8mm
- For quantities, please refer to the price list

Order code	Description
B875 AC Z1 20 32	2032(L) x 26(H) x 6(D)mm

SLIMLINE STEEL HANGING PLATE

- 27mm steel plate
- Economical method of mounting cabinet hangers
- Plate thickness is 1.8mm
- For quantities, please refer to the price list

Order code	Description
B875 AC Z1 00 60	60(L) x 27(H) x 6(D)mm

AVENTOS HK-XS LIFT MECHANISM

AVENTOS HK-XS

AVENTOS HK-XS is a compact lifter for wall cabinets. Thanks to the narrow style, **AVENTOS HK-XS** offers a high level of design freedom.

AVENTOS HK-XS proves itself with the familiar **AVENTOS** quality of motion. Stay lifts open and close with seemingly weightless movement. They close silently and effortlessly in combination with **CLIP-TOP BLUMOTION** hinges.

- Specifically for small top wall cabinets or those with low internal depths
- Symmetrical lift mechanism, can be used on one or both sides for heavier frontals.
- Silent and effortless closing, thanks to **BLUMOTION**
- Stops at any opening position
- Easy assembly and adjustment

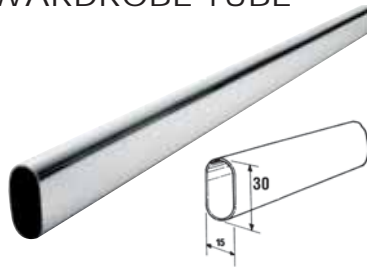

Order code	Description
BAVHKXS1000	AVENTOS HK-XS 200 - 1000 power factor
BAVHKXS1800	AVENTOS HK-XS 800 - 1800 power factor

Note
The power factor is doubled when used on two sides

FITTINGS

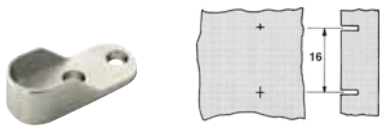

WARDROBE TUBE

- Steel oval section tube, 0.7mm thick steel
- Suitable for use with SL322D, SL10 & SL20 tube supports
- Standard length 2500mm with a welded joint
- For quantities, please refer to the price list

Order code	Size
BT1130NP	Steel tube 30 x 15mm, nickel plated

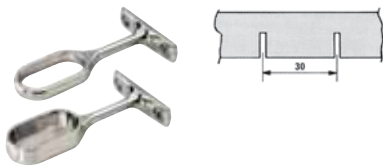

TUBE SUPPORT

- Nickel plated finish
- Die-cast support for oval wardrobe tubes
- Screw-fixing with 3x No. 6 wood screws (not supplied)
- For quantities, please refer to the price list

Order code
BSL322DNP

CENTRE & END TUBE SUPPORT

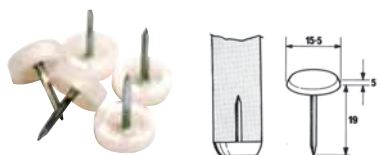

Centre tube support

- Chrome finish
- Die-cast support, easy installation
- For use where an 800mm+ span is encountered
- Screw fixing with No. 6 wood screws
- Blanked end which can be used as a matching end support
- For quantities, please refer to the price list

Order code	Description
BSL10NP	Tube bearing centre support
BSL20NP	Tube bearing end support

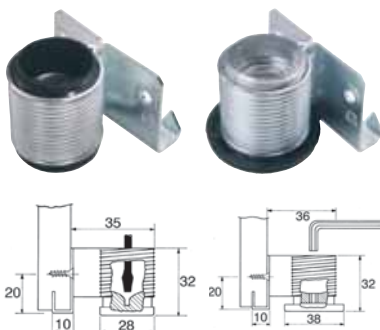

FOOT TACK

- Steel tack with a nylon head
- Can be used as a furniture glide to protect the furniture during manufacture and transport
- Can also be used to prevent moisture absorbing into end panels
- For quantities, please refer to the price list

Order code
B10560

SERIES 300 FURNITURE LEVELLER

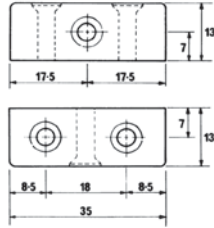

- Steel bodied leveller, adjustment up to +20mm
- Fastens to the bottom edge of the carcass with two integral knock-in spikes and is secured with two 3.5mm chipboard screws (not included)
- Can be adjusted internally by drilling a hole in the bottom of the base panel
- Plastic foot to be adjusted by a slotted screwdriver
- Die-cast version for heavy duty use adjusted by a 6mm allen key
- For quantities, please refer to the price list

Order code	Description	Loading capacity
B300 00 Z2 00 A2	Plastic foot	100kg
B300 00 Z2 00 Z2	Die-cast foot	150kg

CONNECTOR BLOCK

CONNECTOR BLOCK

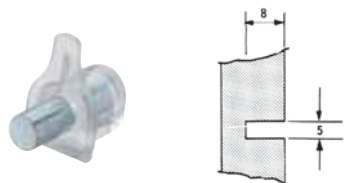

- Almond (RAL9001) finish
- Plastic KD block
- For quantities, please refer to the price list

Order code	Description
BKD1AL	Plastic connector block

SHELF SUPPORTS

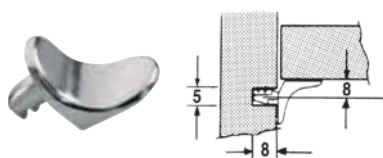

SAFETY SHELF SUPPORT

- Translucent plastic body with steel peg
- Suitable for conventional shelves
- Requires a 5mmØ hole
- For quantities, please refer to the price list

SHELF SUPPORTS

HEAVY DUTY CONCEALED WALL SHELF SUPPORT

- One piece design, suitable for shelf panels 22mm thick upwards
- Fixes into the face of the panel and through to the wall for additional support with 5mmøx50mm screws
- Suitable for shelf panels from 22mm thick (heavy duty only)
- Load bearing capacity up to 85kg per m² equally distributed
- The support is height and tilt adjustable
- Finish: bright zinc plated

THE 'HOW TO' GUIDE

This document has been designed to help you familiarise yourself with the correct product to use in all scenarios, as featured in our brochures when using complete or component stocked product.

We have tried to explain every situation you may come across when planning a space; whether it's a simple run or something a little more complex.

If you encounter something difficult to plan that we have not covered please call your representative to speak direct with someone who can help.

'HOW TO' PLAN YOUR DESIGN - HINGED COMPLETE COLLECTION

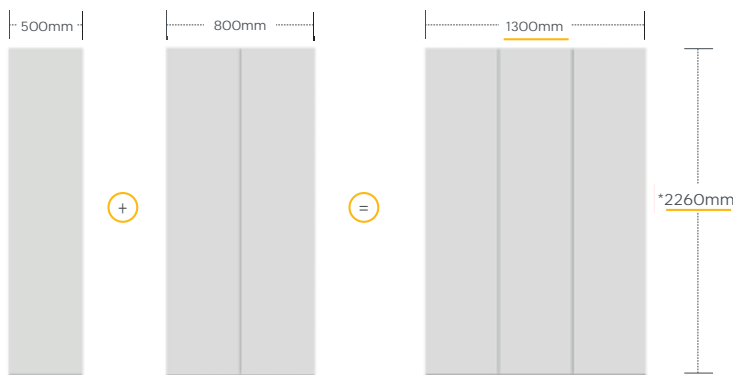

STEP
1

MEASURE YOUR SPACE

Ensure you are fully equipped to start designing. The bedroom planning paper prompts things you need to think about when measuring a space including:

- ✓ Sockets
- ✓ Switches
- ✓ Window ledges etc

STEP
2

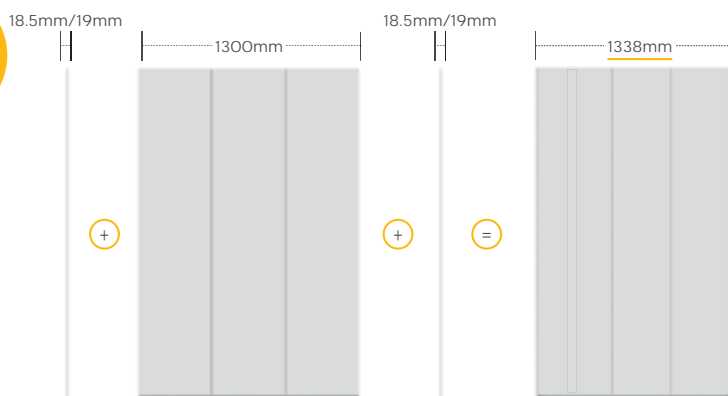

CREATE A WARDROBE RUN

Although our wardrobes are rounded numbers sometimes the cabinets can creep in size. Please remember a tolerance of + / - 1mm per wardrobe when planning a design; especially if the wardrobe run is to go wall to wall.

Please allow 1mm + / - per wardrobe

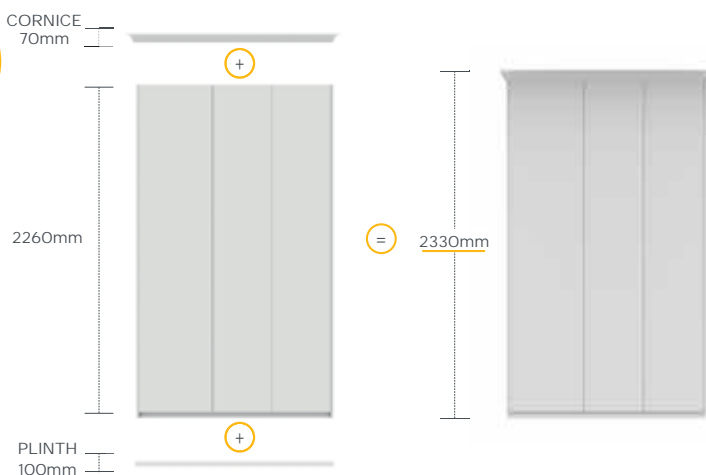

STEP 3

ADD END PANELS AND FILLERS

Depending on whether your design is wall to wall or open ended you will need to add either an end panel or a custom fit plinth to cover the linen coloured cabinet. For advice on what product to choose please see our next section.

STEP 4

ADD CORNICE & PLINTH

You will always need to use a length of plinth to cover the structural base of the wardrobe and depending on whether your design has the space you can either add a cornice or an infill to ceiling to finish off the display.

STEP 5

ADD YOUR INTERNALS

Depending on the storage requirements we have multiple internal storage options for our wardrobes. You can choose from predetermined bundles or get creative and design your own. Please refer to section 2 for our full internals section.

IS IT GOING UP AGAINST A WALL?

FLUSH

If your wardrobe run is going up against a wall you can use a length of plinth to give the same effect as an end panel without wasting unnecessary product.

CLASSIC

PRODUCT NAME	DIMENSIONS
Moulded plinth	3050mm L x 100mm H x 25mm D
Classic plinth	3050mm L x 100mm H x 19mm D
Custom fit plinth	3050mm L x 160mm H x 19mm D

MODERN

PRODUCT NAME	DIMENSIONS
Plinth	3050mm L x 36mm H x 18.5mm D
Custom fit plinth	3050mm L x 160mm H x 18.5mm D

WITH GAP

If your wardrobe is going up against a wall but has a gap larger than 18.5mm/19mm; you can choose whether to make a filler from any of the following items.

CLASSIC

SIZE FILLER	PRODUCT NAME	DIMENSIONS
Up to 36mm	Moulded plinth	3050mm L x 100mm H x 25mm D
Up to 100mm	Classic plinth	3050mm L x 100mm H x 19mm D
Up to 160mm	Custom fit plinth	3050mm L x 160mm H x 19mm D
Up to 650mm	End panel	2400mm L x 650MM W x 19mm D

MODERN

SIZE FILLER	PRODUCT NAME	DIMENSIONS
Up to 36mm	plinth	3050mm L x 36mm H x 18.5mm D
Up to 160mm	Custom fit plinth	3050mm L x 160mm H x 18.5mm D
Up to 650mm	End panel	2400mm L x 650MM W x 18.5mm D

DO YOU HAVE AN OPEN END?

If your wardrobe has an open end you will need an end panel or custom fit plinth to cover the full visible depth of the wardrobes and any voids at the back.

FULL DEPTH

To cover the full depth of the wardrobe and any voids at the back, it's best to use an end panel.

CLASSIC

PRODUCT NAME	DIMENSIONS
End panel	2400mm L x 650MM W x 19mm D

MODERN

PRODUCT NAME	DIMENSIONS
End panel	2400mm L x 650MM W x 18.5mm D

INFILL PLINTH

To cover smaller depths into alcoves or between other objects choose from below:

CLASSIC

SIZE FILLER	PRODUCT NAME	DIMENSIONS
Up to 36mm	Moulded plinth	3050mm L x 100mm H x 25mm D
Up to 100mm	Classic plinth	3050mm L x 100mm H x 19mm D
Up to 160mm	Custom fit plinth	3050mm L x 160mm H x 19mm D
Up to 650mm	End panel	2400mm L x 650MM W x 19mm D

MODERN

SIZE FILLER	PRODUCT NAME	DIMENSIONS
Up to 36mm	Plinth	3050mm L x 36mm H x 18.5mm D
Up to 100mm	Custom fit plinth	3050mm L x 160mm H x 18.5mm D
Up to 650mm	End panel	2400mm L x 650MM W x 18.5mm D

DO YOU WANT TO ADD A FEATURE POST?

You can use a feature post to create a detail on the end of a wardrobe run. It can be up against a wall or on an open end. It can also be 50mm or 100mm facing depending on your preference and overall width.

MODERN

Pushed back

CLASSIC

Flush

Pushed back

WHAT PLINTH DO YOU NEED?

You will always need a plinth to cover the structural base of the wardrobes. Depending on whether you want to achieve a specific look or whether the floor runs out we have multiple options of plinth to choose from.

CLASSIC

The classic plinth is a simple design with a small edge detail that can be used in all scenarios.

The moulded plinth is slightly more decorative for a more classic look. It is also slightly thicker in depth.

CLASSIC PLINTH OPTIONS	
Moulded plinth	3050mm L x 100mm H x 25mm D
Classic plinth	3050mm L x 100mm H x 19mm D
Custom fit plinth	3050mm L x 160mm H x 19mm D

**as you can see the moulded plinth requires the return of the plinth around the wardrobe and the end panels cut to sit on top are to plinth thickness.*

MODERN

Both modern plinths give the same look aesthetically, the difference is only that the custom fit plinth can be cut in height if the floor runs out of level.

MODERN PLINTH OPTIONS	
Plinth	3050mm L x 36mm H x 18.5mm D
Custom fit plinth	3050mm L x 160mm H x 18.5mm D

DO YOU NEED A CORNICE?

Depending on what look you want to achieve or what height you have remaining we have various cornice options.

CLASSIC

If you would like to take a contemporary approach to the classic collection we recommend using the feature post or classic cornice. Although the classic cornice is a traditional shape it has a very linear design.

For a more ornate feature we would recommend the moulded cornice with a swallow neck profile.

CLASSIC CORNICE OPTIONS	
Feature post	3050mm L x 50mm H x 100mm D
Classic cornice	3050mm L x 66mm H x 76mm D
Moulded cornice	3050mm L x 70mm H x 109mm D

*FEATURE POST
as Cornice*

CLASSIC Cornice

MOULDED Cornice

MODERN

For a simple contemporary look we suggest the modern cornice, or for more of a statement we suggest the feature post as cornice.

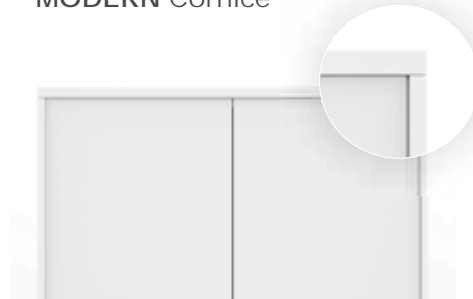

If you want to create an ultra contemporary look you could leave the cornice off altogether.

MODERN CORNICE OPTIONS	
Feature post	3050mm L x 50mm H x 100mm D
Cornice	3050mm L x 28mm H x 50mm D

**FEATURE POST
as Cornice**

MODERN Cornice

WHAT IF YOU DON'T HAVE THE CORRECT HEIGHT FOR A CORNICE?

If you have not got the full height needed to use a modern or classic cornice you have the option to use either a modern or classic plinth as cornice instead.

CLASSIC

When using either the classic plinth or custom fit plinth as cornice you will achieve the same aesthetical appearances. The difference will be in the height of the product remaining to fix it to the wardrobe. However, if you use the moulded plinth as cornice you have the option to use the scalloped edge detail on the plinth to create a feature around the wardrobe run as shown above.

SIZE FILLER	PRODUCT NAME	DIMENSIONS
25mm	Moulded plinth	3050mm L x 100mm H x 25mm D
19mm	Classic plinth	3050mm L x 100mm H x 19mm D
19mm	Custom fit plinth	3050mm L x 160mm H x 19mm D

MODERN

You can use either of the modern plinths for the same aesthetical appearances. The difference will be in the depth of the product remaining to fix it to the wardrobe.

SIZE FILLER	PRODUCT NAME	DIMENSIONS
18.5mm	Plinth	3050mm L x 36mm H x 18.5mm D
18.5mm	Custom fit plinth	3050mm L x 160mm H x 18.5mm D

WHAT IF YOU WANT TO INFILL TO CEILING?

If you do not want to use cornice but you also do not want a gap at the top of your wardrobe you can infill to the ceiling. Depending on the size of the gap we have varying products that can be used.

CLASSIC

HEIGHT REMAINING	PRODUCT NAME	DIMENSIONS
Up to 100mm	Classic plinth	3050mm L x 100mm H x 19mm D
Up to 160mm	Custom fit plinth	3050mm L x 160mm H x 19mm D
160+mm	End panel	2400mm L x 650mm H x 19mm D

MODERN

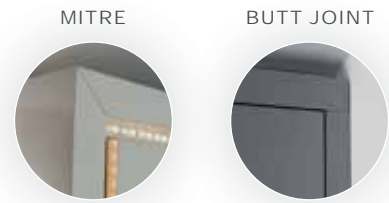

HEIGHT REMAINING	PRODUCT NAME	DIMENSIONS
Up to 100mm	Custom fit plinth	3050mm L x 160mm H x 18.5mm D
100mm +	End panel	2400mm L X 650mm W X 18.5mm D

DO YOU WANT A FEATURE POST INSTEAD?

You can create a decorative feature around the wardrobes by using a Passepartout.

When using a feature post to create a Passepartout around the wardrobe run, you can choose to either mitre or butt joint the posts in the corners.

If the Passepartout is on an open end, you then have the option of putting the end panel flush with the back of the feature post, or pushed back in line with the recess at the back of the post.

DO YOU HAVE ADDITIONAL HEIGHT?

If you have a ceiling height of 2710mm or above you can use feature storage units on top of wardrobes to fill the additional height.

Wardrobe 2260mm
 Feature storage unit 450mm

FEATURE STORAGE UNIT WITH CORNICE

Following that you can then use cornice, infill straight to the ceiling or create a feature with an additional section between the wardrobes and the feature storage units. To see how this works please see the next pages.

CLASSIC

HEIGHT REQUIRED	PRODUCT USED
2780mm	Wardrobe, feature storage unit & moulded cornice
2776mm	Wardrobe, feature storage unit & classic cornice
2760mm	Wardrobe, feature storage unit & feature post

MODERN

HEIGHT REQUIRED	PRODUCT USED
2746mm	Wardrobe, feature storage unit & cornice
2760mm	Wardrobe, feature storage unit & feature post

FEATURE STORAGE UNIT WITH INFILL

CLASSIC

MODERN

WHAT IF YOU HAVE EVEN MORE HEIGHT

If you have an even taller ceiling height there is an option to add in an additional feature by using a length of plinth or feature post between the feature storage unit and the wardrobes before adding a cornice or infill to ceiling.

INFILL BETWEEN ROBE AND FEATURE STORAGE UNIT

CLASSIC

MODERN

The classic collection has a lot more variation due to the varying heights between the classic and moulded cornice and plinth options. Please be aware of the height you have available when selecting the best solution for your design.

HEIGHT NEEDED	PRODUCT USED
2799mm	Wardrobe, feature storage unit, moulded cornice & classic plinth
2805mm	Wardrobe, feature storage unit, moulded cornice & moulded plinth
2795mm	Wardrobe, feature storage unit, classic cornice & classic plinth
2801mm	Wardrobe, feature storage unit, classic cornice & moulded plinth
2826mm	Wardrobe, feature storage unit, classic cornice & feature post (50mm facing)
2830mm	Wardrobe, feature storage unit, moulded cornice & feature post (50mm facing)

HEIGHT NEEDED	PRODUCT USED
2757mm	Wardrobe, feature storage unit, cornice & plinth (19mm facing)
2774mm	Wardrobe, feature storage unit, cornice & plinth (36mm facing)
2788mm	Wardrobe, feature storage unit, cornice & feature post (50mm facing)

HOW TO CHOOSE THE CORRECT PLINTH FOR A CORNER WARDROBE

When choosing the correct plinth for your wardrobe you must decide how you would like it to look first as each plinth may have a different application.

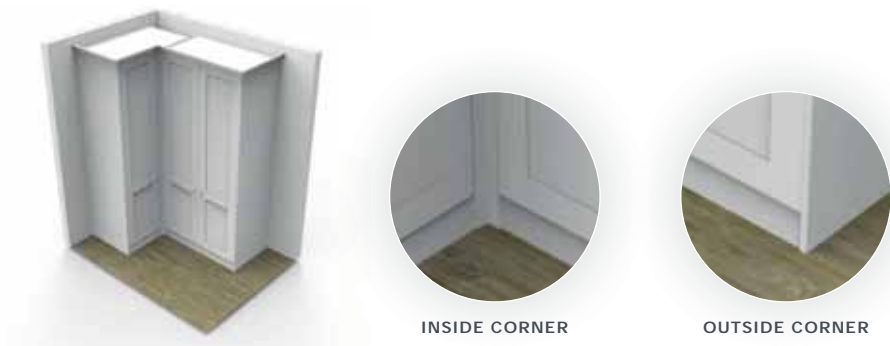

CLASSIC

MOULDED Plinth

When using the moulded plinth with a corner wardrobe you will need to remember that the corner post will need to be cut to the height of the doors so the plinth can sit beneath it.

The plinth should also be return mitred around the wardrobe with the end panel cut to the length of the doors and sat on top of the plinth. This is due to the thickness of the plinth – If you did not want to return mitre the plinth around the wardrobe you would need to pull the end panels forward – proud of the doors to cover the cut end of the plinths as the plinth is 25mm thick.

CLASSIC Plinth

When using the classic plinth you do not need to cut the corner post to the height of the door.

You can fit the corner post all the way to the floor and the classic plinth will run flush into it. You also do not need return mitre the plinth around the wardrobe as it will sit inside the end panels when fitted normally.

MODERN

INSIDE CORNER

OUTSIDE CORNER

MODERN Plinth

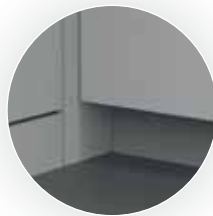

When using the modern plinth you do not need to cut the corner post to the height of the door.

You can fit the corner post all the way to the floor and the plinth will run flush into it. The plinth will also sit inside the end panels when fitted normally.

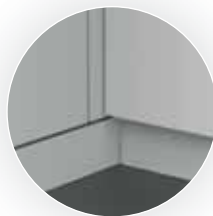

DO YOU USE A PLINTH WITH THE STABLE ROBE?

When designing with a stable robe you have an additional option to finish the front of the run with an additional piece of plinth.

MODERN

The stable robe is designed with a blanking panel that runs directly into the floor that allows you to push a modern chest into it. When the blanking panel runs to the floor and the chest is pushed into it the modern chest will have slight shadow gap beneath it.

If you want to avoid the shadow gap at the bottom you can cut the blanking panel to the height of the door next to it and run the wardrobe plinth the full length of the run. You can then use a length of plinth under the modern 4 drawer chest up to the plinth on the wardrobe run and any gaps in the corner of the stable robe will now be hidden.

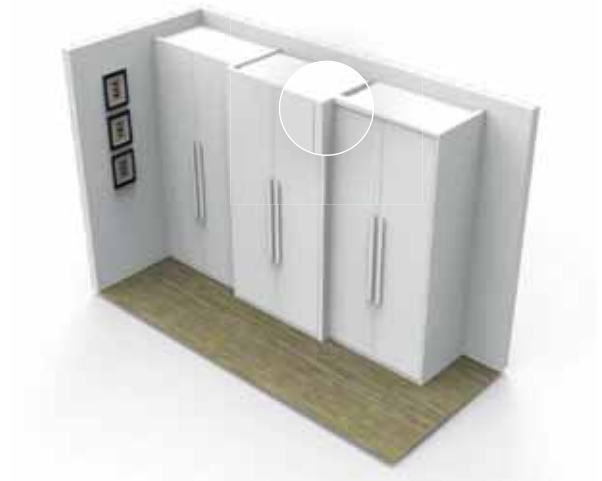

HOW TO DO A BREAKFRONT

If you want to create an additional design feature within the bedroom run, a popular feature is to create a breakfront with feature posts.

CLASSIC

MODERN

TO CREATE A BREAKFRONT YOU REQUIRE:

2X FEATURE POSTS
2400mm for standard wardrobe height
3050mm for wardrobes with top boxes

The most efficient way to create a breakfront is to use the post 50mm facing.

This allows you to pull the 'feature' wardrobes up to 100mm forward from the wardrobes on the back wall.

To ensure stability of the breakfront we suggest you baton the back of the wardrobe to the wall or; before placing the base into the wardrobe, baton to the floor which can then be hidden under the wardrobe base.

Oak finish no longer available

'HOW TO' GUIDE ADDITIONAL FEATURES

HOW TO CREATE A 'FLOATING' SHELF

To add an additional storage feature you can create a 'floating' shelf. These consist of a selection of feature posts as the front and two pieces of end panel, top and bottom enclosing the feature post giving it a 'chunky' appearance.

CLASSIC and MODERN

TO CREATE A FLOATING SHELF YOU WILL NEED:

QUANTITY DEPENDANT ON SHELF WIDTH + DEPTH
Feature post 2400 or 3050 - depending on length
End panel or custom fit panel - depending on colour

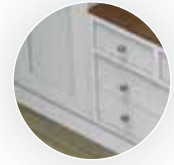

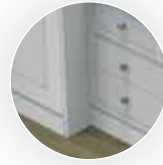

When working out your quantities please remember that you will need a piece of end panel for both the top and bottom of the reverse of the feature post - we call this double skinning the shelf.

HOW TO INTEGRATE CHESTS INTO A WARDROBE RUN

CLASSIC

PUSHED BACK

PULLED FORWARD

PUSHED BACK

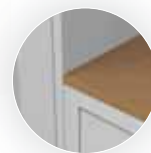

Pushing the chest back will require the removal of the chest plinth to allow the piece to integrate seamlessly – this will need to be replaced with the same plinth that is used on the wardrobe run. To do this you will need to raise the chest on blocks or adjustable feet to the same height as the wardrobe plinth. (Not supplied)

The chest top with coving detail will still work when integrated but will need adjusting on the sides to remove the mitre return and scalloped edge profile.

PULLED FORWARD

OAK TOP

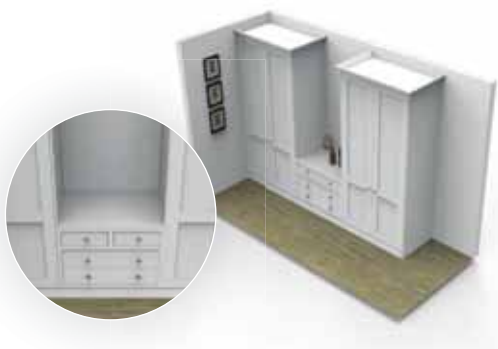

Pulling the chest forward will also require the removal of the chest plinth to allow the piece to integrate seamlessly – this will need to be replaced with the same plinth that is used on the wardrobe run but will now run completely across the front. To do this you will need to raise the chest on blocks or adjustable feet to the same height as the wardrobe plinth. (Not supplied)

The chest top with coving detail will no longer work; and will require a panel to create a top. The panel should then sit between the two end panels used on the sides of the wardrobes for a fully fitted look.

COLOUR MATCHED

When pulling the chest forward and if you require a colour matched top you will need an additional panel in the colour of choice. You then have the option to reduce the width by 36mm by sitting the top under the end panels used on the sides of the wardrobe. However you could still follow the application shown above if you have the width.

MODERN

PUSHED BACK

There will be no changes required if you push the chest back and it will fit seamlessly between the two end panels on each side of the wardrobes. It is best to be aware of the drawers when fitting to ensure they will still open.

There is an option to cover the structural plinth of the chest with the 36mm modern plinth to remove the shadow gap at the bottom.

PULLED FORWARD

NO TOP BOXES

Pulling the chest forward will require an additional end panel on the top of the chest to cover the void the back. If you are not using top boxes you can reduce the width by 36mm by sitting the top of the chest under the end panels used to cover the gables on the sides of the wardrobes and then continuing the wardrobe plinth all the way across the front of the wardrobe run.

WITH TOP BOXES

If you are using top boxes whilst integrating a chest you will need to sit the chest inside the end panels on the sides of the wardrobes - and then continuing the wardrobe plinth all the way across the wardrobe run, rather than setting the chest 36mm closer and under the end panels on the sides of the wardrobe. This is to allow for the top box width. Additionally if pulling the top boxes forward flush with the chest you will require a panel for the underside of the top boxes.

CREATING A CUSTOM FIT DESK

CLASSIC

OPEN END

When using the classic custom fit desk with an open end you have up to a length of 2400mm and a depth of 488mm with no changes. If you require the desk to be deeper you will need to consider over panelling the back of the chest to cover the gap made when you pull the chests off the wall, but you will also need to change the plinth.

AGAINST A WALL - No change

When using the classic custom fit desk against a wall. You have up to a length of 2400mm and a depth of 488mm with no changes. However due to the chest plinth detail you will end up with a small gap against the wall. To remove the gap please see the swapped plinth option below.

Again if you require the desk to be deeper you will need to consider over panelling to cover the gap at the back of the chest, but you will also need to change the plinth.

AGAINST A WALL - Swapped plinth

When using the classic custom fit desk against a wall without a gap you will need to remove the existing chest plinth and raise the chest on blocks or feet and swap the plinth to the same as what is being used on the rest of the wardrobes. You have up to a length of 2400mm and a depth of 488m for the chest top. (The blocks/feet are not supplied)

Again If you require the desk to be deeper you will need to consider over panelling to cover the gap at the back of the chest.

MODERN

OPEN END

To create a modern desk with an internal stackable drawer and an open end you need to order additional products to make a structural and supporting leg.

By using a feature post (50mm facing) and cladding, the back of the post with end panels, will create an independent and solid leg you can then fix the drawer runners to. The opposing side will fix directly into the end panel on the gable end of the wardrobe. You then have the option of using a colour matching or contrasting top for the desk top. Bear in mind the modern collection does not have edging tape so finished edges will need to be used where can be seen.

AGAINST A WALL - Without Feature Storage Units

To create a modern desk with an internal stackable drawer against a wall you need to ensure you have the correct fixings for the type of wall you are fixing to. If the wall is plasterboard we recommend using the batons and filler strips that come with the stackable drawer to fix to the walls - the widths of these drawers are as follows.

STACKABLE DRAWER	DRAWER WIDTH DIMENSION
500 stackable drawer + fillers	464mm
800 stackable drawer + fillers	764mm
900 stackable drawer + fillers	864mm
1000 stackable drawer + fillers	964mm

If you have a brick wall you have the option of removing the batons and filler strips and fitting the drawer flush to the wall. -the widths of the drawers without the fillers are as follows.

STACKABLE DRAWER	DRAWER WIDTH DIMENSION
500 stackable drawer	414mm
800 stackable drawer	714mm
900 stackable drawer	814mm
1000 stackable drawer	914mm

AGAINST A WALL - With Feature Storage Units

To create a modern desk with an internal stackable drawer against a wall with feature storage units above – your width will be determined by the size of the feature storage units you are using. Because feature storage units are external widths and the stackable drawers are designed for internal widths (inside wardrobe cabinet) you will need to remember to order something to make the larger fillers for either side of the drawers.

DIFFERENT USES FOR FEATURE STORAGE

BRIDGING UNIT

CLASSIC or **MODERN**

PUSHED BACK

When pushing the feature storage units back between two wardrobes you must remember that if you are using a cornice you will need to allow for the cornice around the wardrobes and the feature storage units, and also include end panel on the underside.

PULLED FORWARD

When pulling the feature storage units forward flush with wardrobes, the cabinets will need to be battened to the wall for stability. In this case the cornice will run along the front of the wardrobes in a straight run and will still require an end panel on the underside.

WINDOW SEAT

CLASSIC

To create a window seat in the classic collection you will need to divide the width by the amount of storage boxes required or that will fit. You may need to create fillers from end panels for additional width that will not work with our door sizes. To modify the cabinets to suit any shape, remember to order a linen panel to modify the robe. We have also raised the feature storage units from the floor on blocks and used a 100mm plinth to match the classic wardrobe collection.

MODERN

To create a window seat in the modern collection you will need to divide the width by the amount of storage boxes required or that will fit. You may need to create fillers from end panels for additional width that will not work with our door sizes. To modify the cabinets to suit any shape remember to order a linen panel to modify the robe. We have also raised the feature storage units from the floor on blocks and used a 36mm plinth to match the modern wardrobe collection.

In both instances we recommend that for the top of the window seat, you employ a professional upholsterer to create you a bespoke seat pad to fit the size, density and fabric options to suit your requirements.

DIFFERENT USES FOR FEATURE STORAGE

MEDIA UNIT AGAINST ROBES

CLASSIC

To create a media unit on the floor in the classic collection you have the option to create the top in either a colour matched panel or custom fit oak top. In the visual shown we put the finished edges to the front and side and cut edges to the wall and against the wardrobe. We have also raised the feature storage units from the floor on blocks and used a 100mm plinth to match the wardrobes. (Blocks are not supplied)

MODERN

To create a media unit on the floor in the modern collection you will need to remember that the modern collection does not have a matching edging tape. In the visual shown we put the finished edges to the front and side and cut edges to the wall and against the wardrobe. We have also raised the feature storage units from the floor on blocks and used a 36mm plinth to match the wardrobes. (Blocks are not supplied)

MEDIA UNIT STAND ALONE

CLASSIC

To create a media unit on the floor in the classic collection you have the option to create the top in either a colour matched or oak end panel or using the custom fit tops with the scalloped coving profile. In the visual shown we have used a custom fit top with scalloped coving profile. We have also raised the feature storage units from the floor on blocks and used a 100mm plinth to match the classic wardrobe collection. (Blocks are not supplied)

MODERN

To create a media unit on the floor in the modern collection you will need to remember that the modern collection does not have a matching edging tape. In the visual shown to create a top we have used modern 36mm plinth to create a frame and then sat the cut panel inside to create a finished edge. We have also raised the feature storage units from the floor on blocks and used a 36mm plinth to match the modern wardrobe collection. (Blocks are not supplied)

STAND ALONE DRESSING TABLE

MODERN

If you want to create a stand alone dressing table you can use the same method as the modern stackable drawer desk but to make it fully free standing you will need to duplicate the leg on both sides.

You need to remember that the width of the dressing table will be determined by the size of the stackable drawer you are using. Because the stackable drawers are designed for internal widths (inside wardrobe carcass) that the drawer front sizes are not standard.

You **do not** need to use the fillers that come with the stackable drawer, as the runners can fix to the new legs.

If you do not use this fillers the widths will be as follows.

DESCRIPTION	DRAWER WIDTH DIMENSION	OVERALL WIDTH
500 stackable drawer without fillers	464 mm	564 mm
800 stackable drawer without fillers	764mm	864mm
900 stackable drawer without fillers	864mm	964mm
1000 stackable drawer without fillers	964mm	1064mm

If you want your free standing dressing table to equal an even width you will need to use the fillers either side of the drawer.

PUTTING 2 CHESTS TOGETHER

CLASSIC

If you want to put 2x classic 2 + 2 chests together you can make them look like one complete unit by using a custom fit top and moulded plinth.

To join 2x classic chests together you will need to fully remove both of the structural plinths from the free standing chests and replace them with a length of moulded plinth. You may need to raise the chests on blocks in order to do this as the chests do not have additional feet.

You will also need to fully remove both chest tops and replace them with a custom fit top in either oak or colour matched to your chest. The top will require some custom work with the coving profile and edge banding.

**It may help to also take the chests flat-packed)*

PRODUCT REQUIRED
1x custom fit top
1x moulded plinth
1x coving profile (additional)

If you want to avoid having a joint line between the two chests you can remove the two chest edge pieces that will be side by side and replace with one piece of cut colour matched end panel. Please note the panel will need to be edged with matching edging tape as it will be seen when the drawers are opened.

**It may help to also take the chests flat-packed)*

MODERN

If you want to put 2x modern 4 drawer chests together you can make them look like one complete unit by using end panel and plinth.

You will need to put 2 cut pieces of end panel down each side of the modern chest – Finished edge to the front and also a finished edge 18.5mm higher than the top of the chest.

A piece of end panel can then be used to create a top which will sit inside the two raised edges of panel used on the ends of the chest. This will cover any cut panel edges – however you will need a finished edge to the front of the chest.

A length of plinth can then be ran across the front of the chests to hide any joins on the base.

PRODUCT REQUIRED
1 x Plinth
2 x End panels

A photograph of a bedroom corner. On the left, grey curtains are tied back with a thick rope. A white dresser with a light wood top and silver handles stands in the center. Above it is a wooden cabinet with glass doors, containing various decorative items like a star and a shell. A hanging lamp with a wire cage is visible in the upper left. The wall is white with horizontal wood paneling.

- 4 1 x 18mm top (linen)
- 5 1 x 18mm base panel (linen)

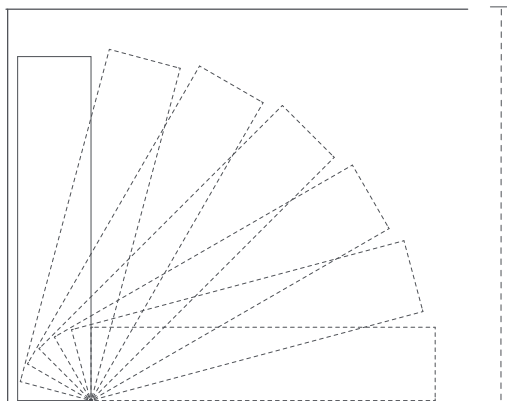

- 1 1000mm double wardrobe
 - 2 Corner post 2260mm (H)
 - 3 Blanking panel (linen)
 - 4 Spacer Rail (raw chipboard)
- Corner Conversion Kit

(For corner wardrobe shelf pack please see page 2.16)

ASSEMBLY OF ROBE:

Before assembling the wardrobe cabinets, it is essential that the overall room height and floor space is determined. Horizontal assembly requires a minimum ceiling height of 2336mm and a minimum floor space (Length) of 4600mm in order to insert the back panel. If you are assembling in a small space, it is recommended that you follow the vertical assembly instructions providing you have a minimum ceiling height of 2300mm. Horizontal and vertical assembly guidelines can be found in the assembly instructions.

HORIZONTAL ASSEMBLY:

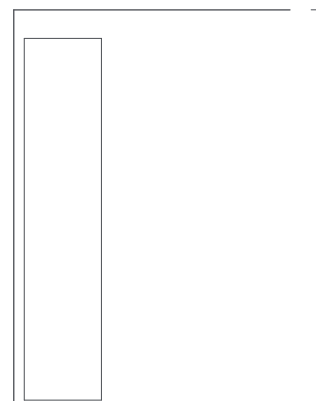

Minimum Ceiling Height: 2336mm

If cornice is to be applied minimum height requirement:

Modern 2366mm
Classic 2406mm

Minimum Floor Space: 4600mm

VERTICAL ASSEMBLY:

Minimum Ceiling Height: 2300mm

If cornice is to be applied minimum height requirement:

Modern 2330mm
Classic 2350mm

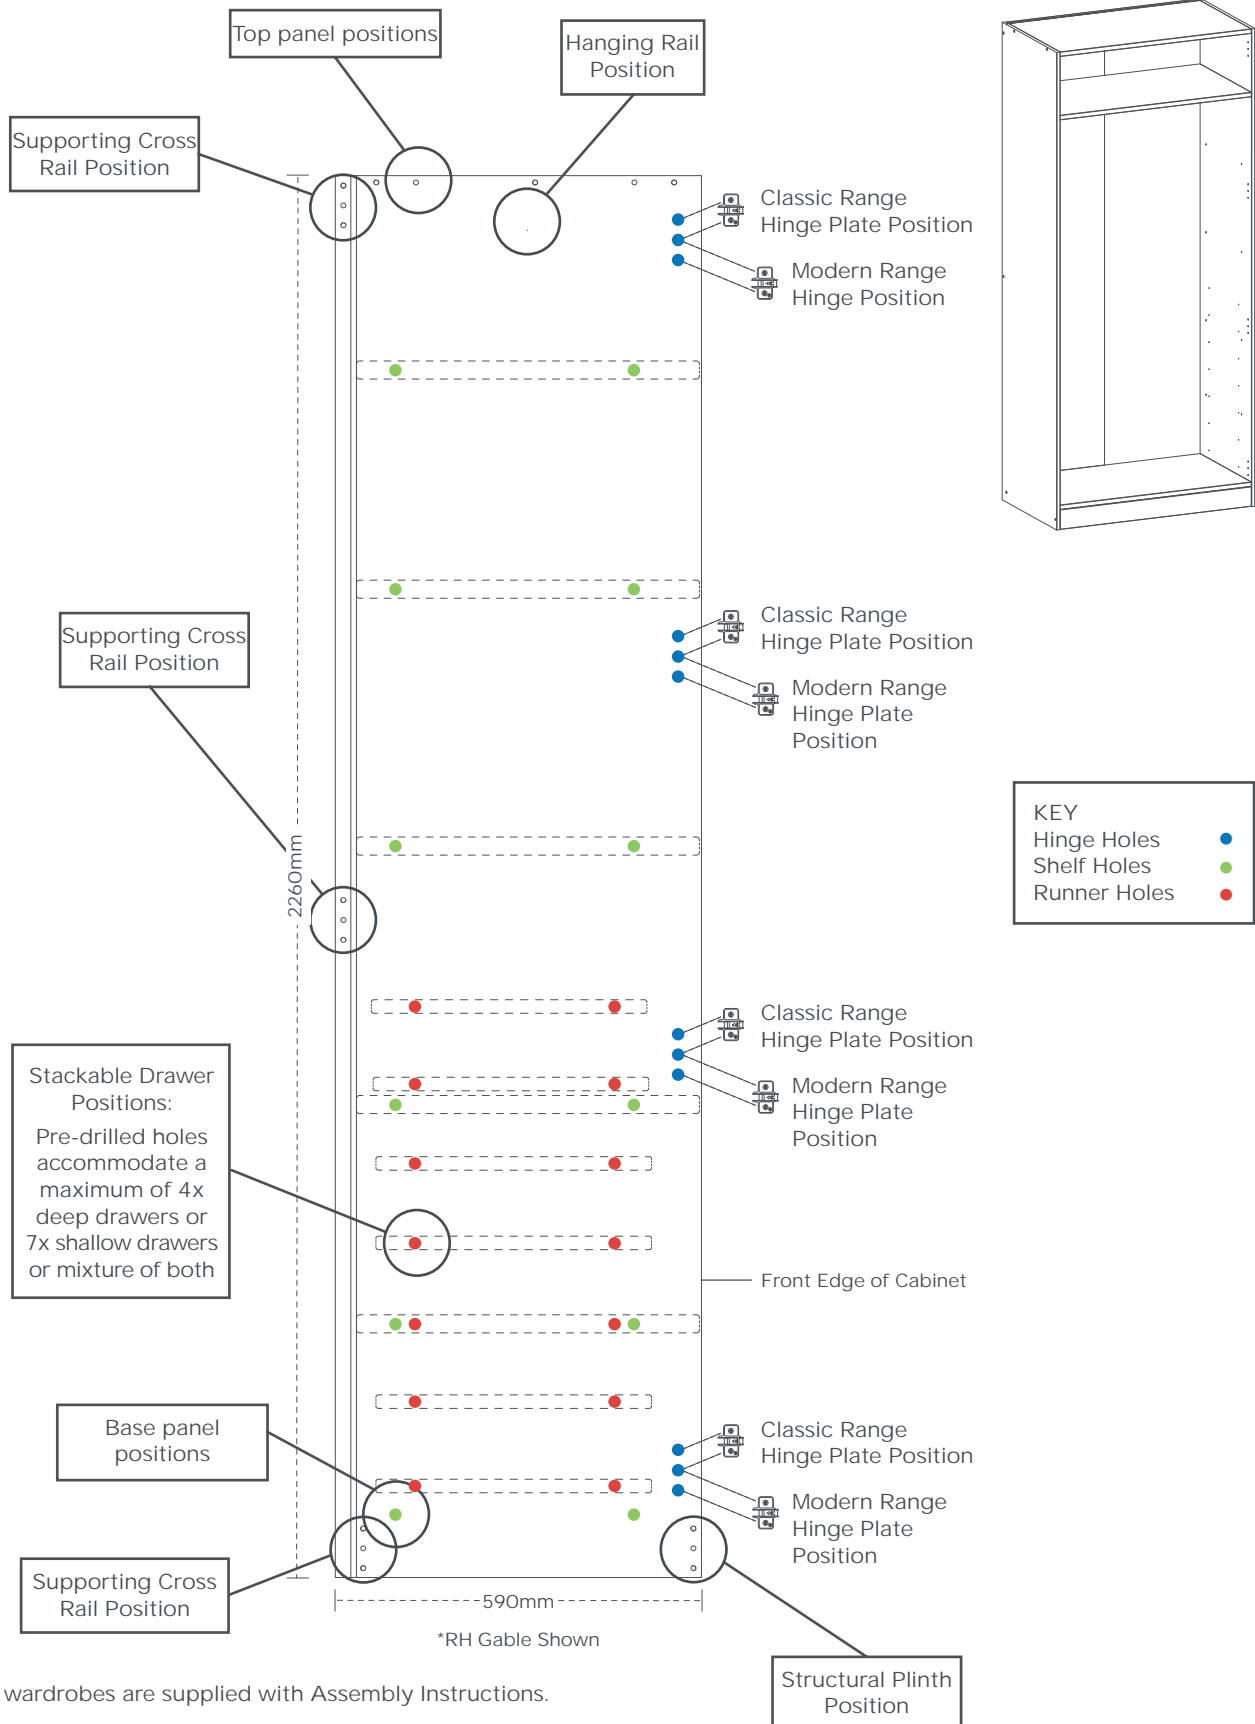

Vertical assembly requires an additional ceiling height clearance of 30mm for Modern cornice and 50mm for Classic cornice.

Horizontal assembly requires a clearance of 76mm in order to lift the wardrobe into an upright position. If cornice is to be applied, additional ceiling height is required depending on cornice style.

ALL PRE-DRILLED HOLES

All wardrobe cabinets (single and double) have the same side panel dimensions and drilling positions. Wardrobe cabinets are pre-drilled with 3mm diameter holes for internal pre-drilled holes that suit a variety of functions.

The below diagram illustrates the hole position with details of each function, please refer to key below. Subsequent pages contain details with critical dimensions relevant to each function

All wardrobes are supplied with Assembly Instructions.

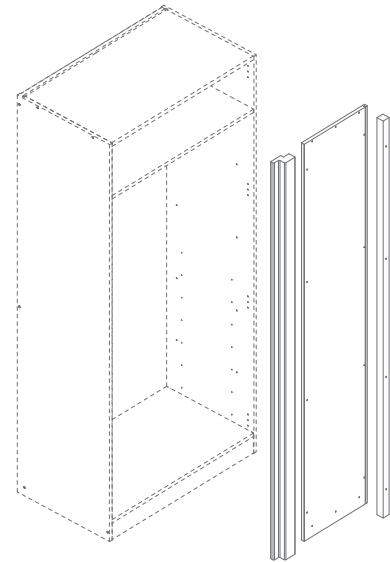

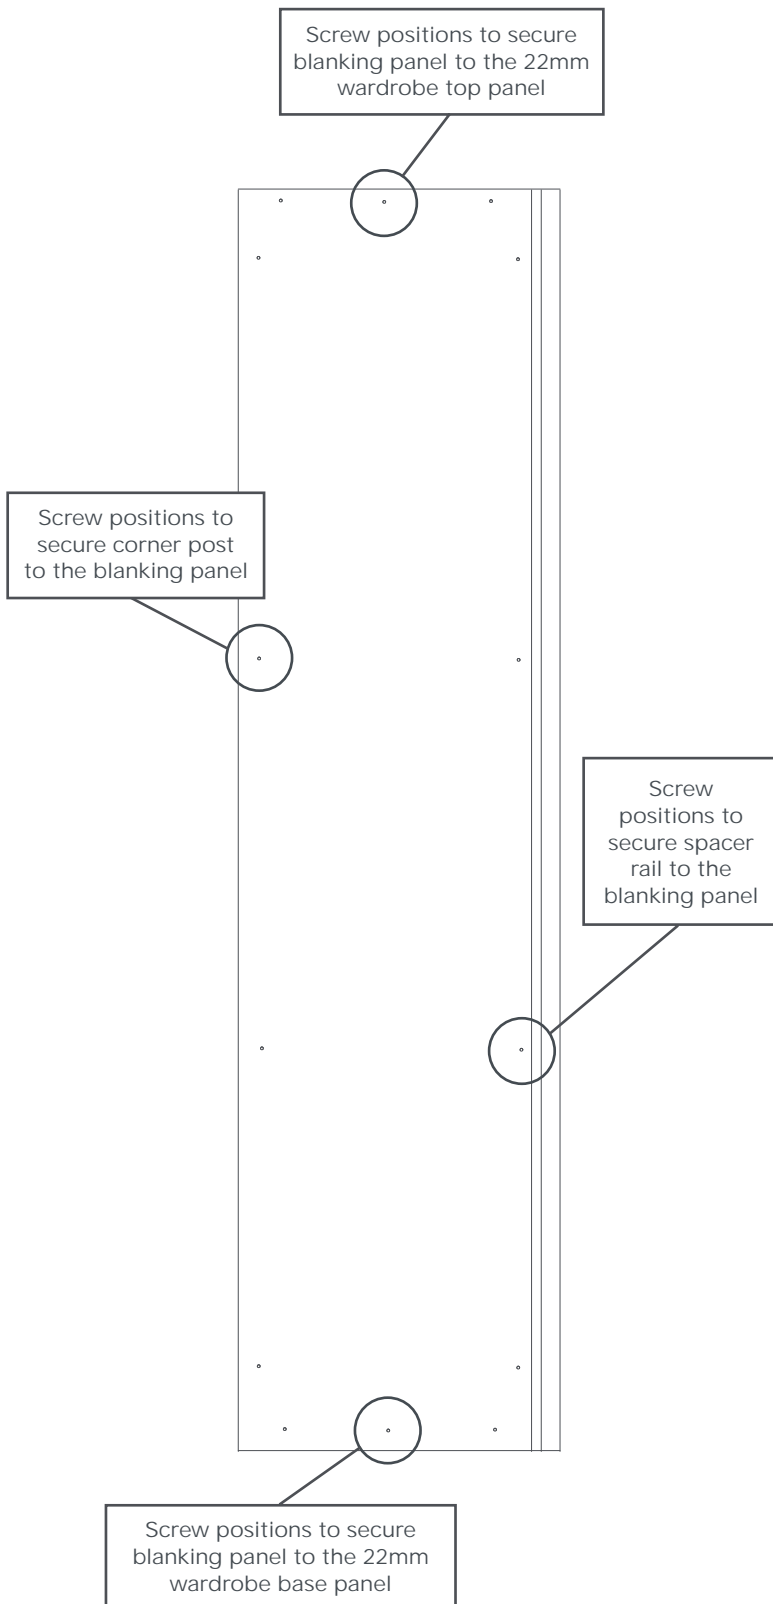

CORNER CABINET FIXING POSITIONS

The blanking panel supplied with a corner wardrobe conversion kit comes pre-drilled for fixing.

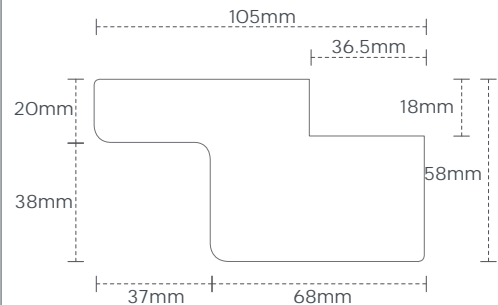

The door supplied with a corner wardrobe bundle is drilled to fix to the wardrobe carcass - not the corner post

The corner post is fixed.

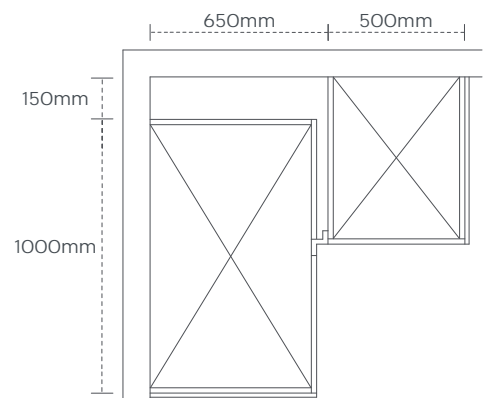

The spacer rails are also pre-drilled to align with the drilling positions on the blanking panel. The blanking panel is not handed and can therefore be flipped to accommodate left and right hand scenarios.

- Drawer box and frontal total 468mm deep
- Brushed bronze handle adds 2mm onto drawer front height

CHESTS

CLASSIC | CHEST SPECIFICATIONS

Chests are supplied with option of **ASSEMBLED** or **FLAT PACKED**

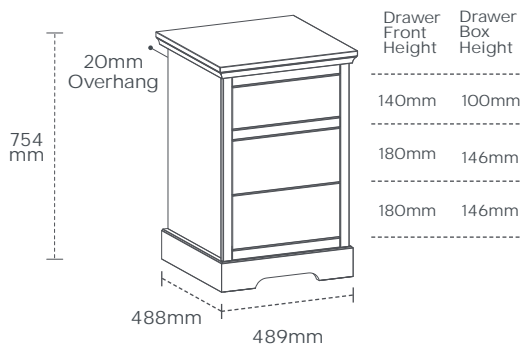

Flat packed option, tops are supplied separately.

2 DRAWER BEDSIDE

- Chest dimensions (including top profile): H 576 x W 489 x D 488mm (with 20mm overhang at back)
- Available assembled or unassembled
- Blum soft close drawer runners
- Alfatherm foil - woodgrain/paint effect
- Available finishes: Partridge Grey / Porcelain / Stone / Oak Effect
- Matching or textured Oak effect top options available
- Drawer boxes are finished in linen effect foil
- 8mm thick drawer box bases
- Small drawer takes 4.8kg load capacity

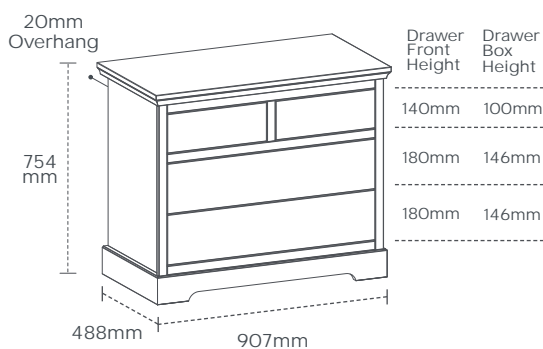

3 DRAWER BEDSIDE

- Chest dimensions (including top profile): H 754 x W 489 x D 488mm (with 20mm overhang at back)
- Available assembled or unassembled
- Blum soft close drawer runners
- Alfatherm foil - woodgrain/paint effect
- Available finishes: Partridge Grey / Porcelain / Stone / Oak Effect
- Matching or textured Oak effect top options available
- Drawer boxes are finished in linen effect foil
- 8mm thick drawer box bases
- Small drawer takes 4.8kg load capacity

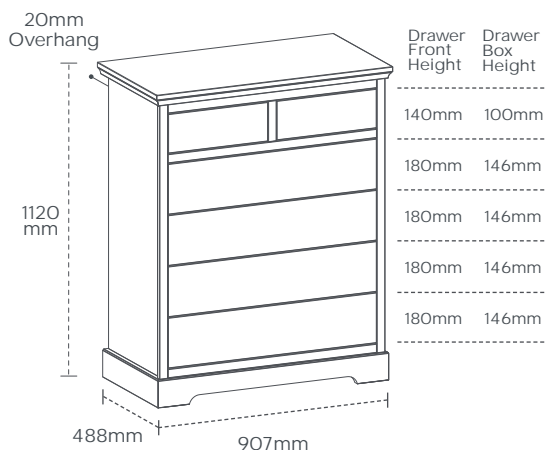

All chests are supplied with Assembly Instructions.

2 + 2 CHEST

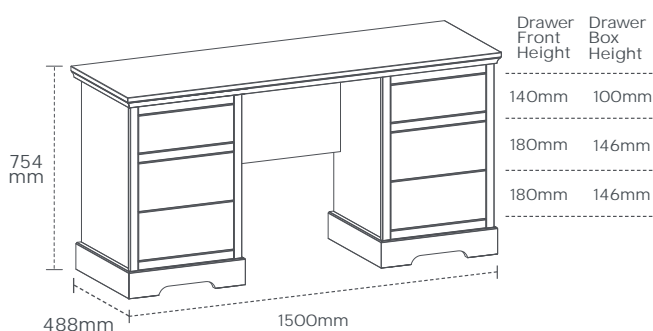

- Chest dimensions (including top profile): H 754 x W 907 x D 488mm (with 20mm overhang at back)
- Available assembled or unassembled
- Blum soft close drawer runners
- Alfatherm foil - woodgrain/paint effect
- Available finishes: Partridge Grey / Porcelain / Stone / Oak Effect
- Matching or textured Oak effect top options available
- Drawer boxes are finished in linen effect foil
- 8mm thick drawer box bases
- Small drawer takes 4.8kg load capacity
- Large drawer takes 9kg load capacity

4 + 2 CHEST

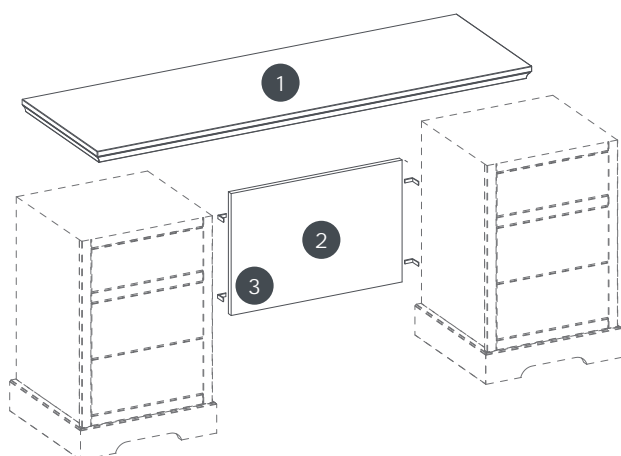

- Chest dimensions (including top profile): H 1120 x W 907 x D 488mm (with 20mm overhang at back)
- Available assembled or unassembled
- Blum soft close drawer runners
- Alfatherm foil - woodgrain/paint effect
- Available finishes: Partridge Grey / Porcelain / Stone / Oak Effect
- Matching or textured Oak effect top options available
- Drawer boxes are finished in linen effect foil
- 8mm thick drawer box bases
- Small drawer takes 4.8kg load capacity
- Large drawer takes 9kg load capacity

DRESSING TABLE

- Chest dimensions (including top profile): H 754 x W 1500 x D 488mm
- Available assembled or unassembled
- Blum soft close drawer runners
- Alfatherm foil - woodgrain/paint effect
- Available finishes: Partridge Grey / Porcelain / Stone / Oak Effect
- Matching or textured Oak effect top options available
- Unique dressing table profiled top (no cutting required)
- Modesty panel included (supplied with brackets colour matched to top)
- 566mm wide leg space
- Modesty panel and dressing table top are supplied in matching colours

DRESSING TABLE CONVERSION COMPONENTS

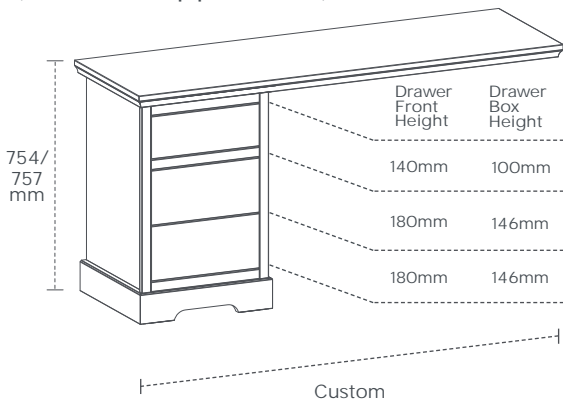

- 1 Dresser profiled top (no cutting required)
- 2 Modesty panel (matching colour top)
- 3 Brackets provided

CHESTS

CUSTOM FIT Desk

(For desk application)

TO COMPLETE THE CUSTOM FIT DESK:

- 3 drawer chest with top
- Dressing table profiled top (cutting required)
- Colour matched desk top W 2400 x D 650 x H 19mm
Overall height of desk with colour matched top 754 mm and coving profile included (cutting required)
- Oak effect table top W 2260 x D 750 x H 22mm Overall height of desk with colour matched top 757 mm and coving profile included (cutting required)
- Available finishes: Partridge Grey / Porcelain / Stone / Oak Effect
- No modesty panel

Colour Matched Top

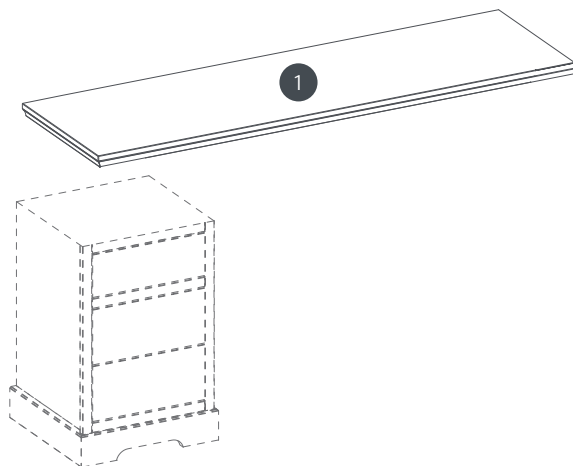

Textured Oak Top

All chests are supplied with Assembly Instructions.

TOP (for desk application)

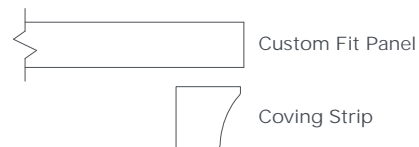

CUSTOM FIT TOP COMPONENT LIST:

- 1x choice of desk top
- 1x coving strip
- 1x MDF filler
- 1x edge banding strip

Coloured top: 2400 x 650 x 19mm

Oak top: 2260 x 750 x 22mm

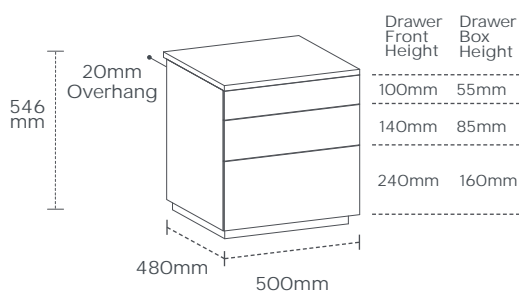

(supplied with coving strip)

MODERN | CHEST SPECIFICATIONS

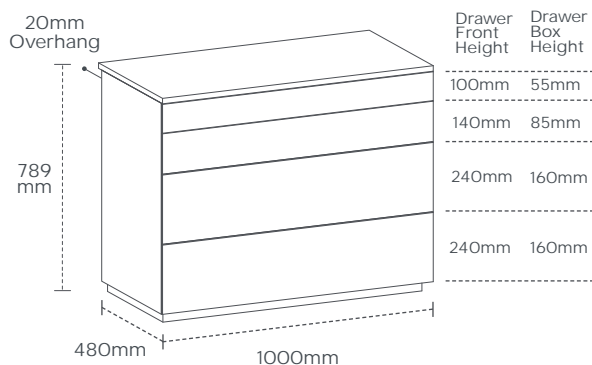

All Modern chests are supplied ASSEMBLED and have handles included in the price.

3 DRAWER BEDSIDE

- Chest dimensions: H 546 x W 500 x D 482mm (including 20mm overhang at back)
- Supplied assembled
- Blum soft close drawer runners
- Solid 36mm MDF plinth base
- Chest top and side panels are only available in Matt finishes
- Drawer fronts are available in Matt & selected Gloss finishes
- Chests and drawer frontals are painted polyurethane finish
- Drawer boxes are finished in linen effect foil
- 4mm thick drawer box bases
- Small drawer takes 11kg load capacity
- Large drawer takes 23.8kg load capacity

4 DRAWER CHEST

- Chest dimensions: H 789 x W 1000 x D 482mm (including 20mm overhang at back)
- Supplied assembled
- Soft close Blum drawer runners
- Solid 36mm MDF plinth base
- Chest top and side panels are only available in Matt finishes
- Drawer fronts are available in Matt & selected Gloss finishes
- Chests and drawer frontals are painted polyurethane finish
- Drawer boxes are finished in linen effect foil
- 4mm thick drawer box bases
- Small drawer takes 11kg load capacity
- Large drawer takes 23.8kg load capacity
- Strengthening metal strip on underside of top

SLIDING WARDROBE SPECIFICATION

Within this sliding wardrobe specification section you can find the key information needed when installing a sliding wardrobe. If you require any additional information please speak to a member of the sales team for our full installation guide.

CONTENTS

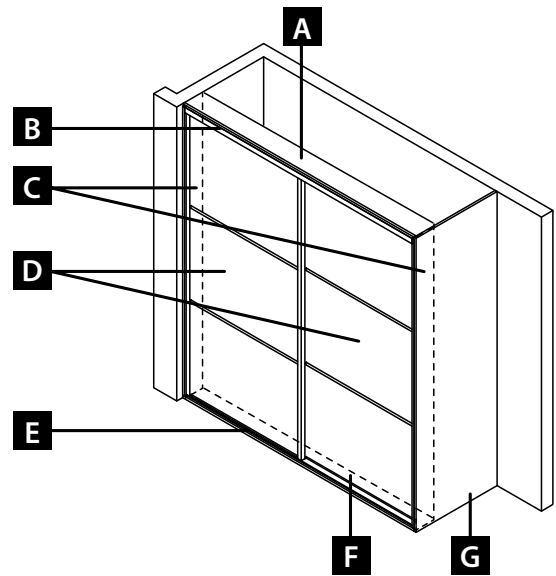

Sliding wardrobe information	47
— Overview	47
— Adjustment	47
— Soft close quantity options	47
— Fixing the door positioners	48
— Positioner dimensions	48

SLIDING WARDROBE INFORMATION

OVERVIEW

Typical Sliding Wardrobe Door Layout

- A Top Liner
- B Top Track
- C Liners
- D Sliding Doors
- E Bottom Track
- F Bottom Liner
- G End Panel (optional depending on design)

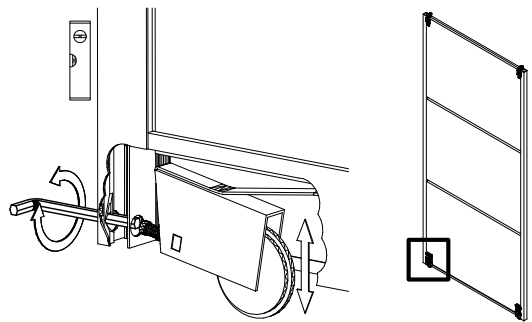

ADJUSTMENT

Bottom roller

The bottom roller can be adjusted using the allen key provided by turning the adjustment bolt through the hole in the side profile.

- To move the doors down – turn anti-clockwise
- To move the doors up – turn clockwise
- After adjustment, plug the hole with the plastic hole covers provided.

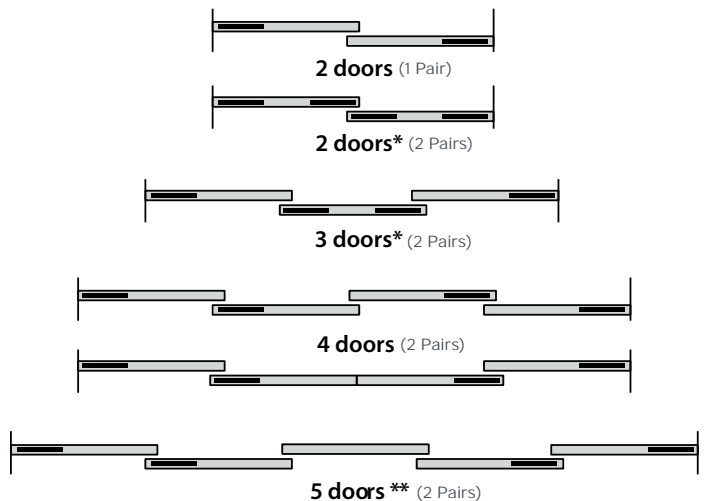

SOFT CLOSE QUANTITY OPTIONS

Soft close mechanisms will come fitted to the top of your doors. You can choose how many soft close pairs you require depending on how many doors are in your design.

Each mechanism requires a liner, wall or end panel to work against.

The maximum number of doors possible in a two-track arrangement using soft closers is four (two front doors and two rear doors). In 5-door arrangements the central door cannot be fitted with a soft close mechanism.

The diagram opposite shows the positions of the soft close mechanisms, depending upon which door arrangement is ordered so you can add the correct quantity to your order.

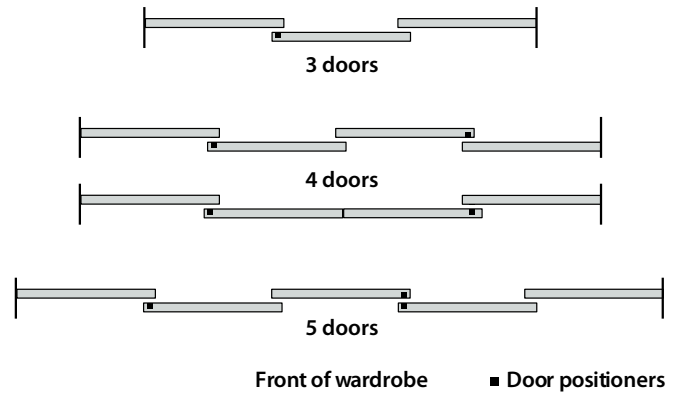

SLIDING WARDROBE INFORMATION

FIXING THE DOOR POSITIONERS

Bottom track door positioners

Aluminium door positioners need to be inserted into the bottom track.

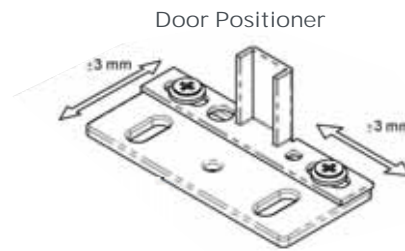

Pull the doors to the closed position and mark on the bottom track the centre point between the doors. Slide the door positioners along the front and rear channels until the centre of each is at the centre point you have marked on the track. No screwing is necessary. For multi-door arrangements refer to the diagram opposite for correct placing of the door positioners. Or use the table below for dimensions.

POSITIONER DIMENSIONS

Depending on the frame profile you have chosen will depend on the dimension the door positioner will need to be in relation the liner, wall or end panel.

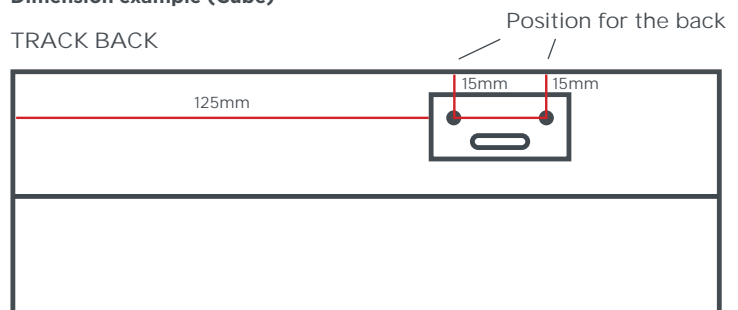

Use the below table to find the dimension required for the frame type you are using.

DIMENSION GUIDE	
Frame type	Dimension
Figure	145mm
Prism	150mm
Curve	120mm
Shape	120mm
Cube	125mm

Dimension example (Cube)

400mm

450mm

500mm

DOUBLE

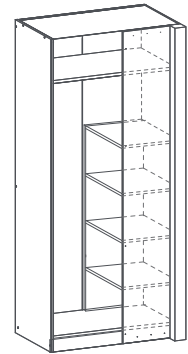

800mm

900mm

1000mm

CORNER

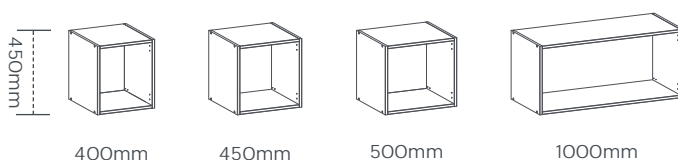

1000mm
(1150mm to allow for voids)

(Showing corner wardrobe shelf pack - sold separately. See page 2.16)

RECOMMENDED CABINET SPECIFICATION:

- 18mm Chipboard
- 2260mm high (including structural plinth 100mm)
- Cabinet depth 610mm (internal 558mm, void at back 22mm)
- Depth of internal space 560mm
- Total depth including stocked door 610mm
- Widths: 400 / 450 / 500 / 800 / 900 / 1000mm
- 1 x 22mm thick shelf set at 278mm from the top of the cabinet
- 8mm back panel
- 4 x Metal height adjustable feet

FEATURE STORAGE UNIT:

400mm

450mm

500mm

1000mm

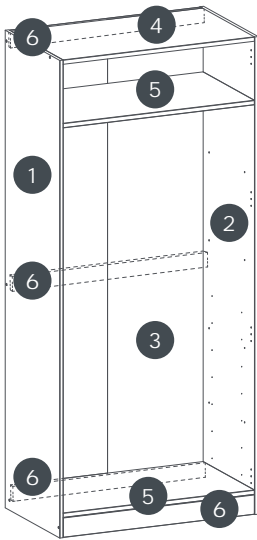

RECOMMENDED CABINET SPECIFICATION:

- 18mm Chipboard
- 450mm high

WARDROBE CABINET SPECIFICATION

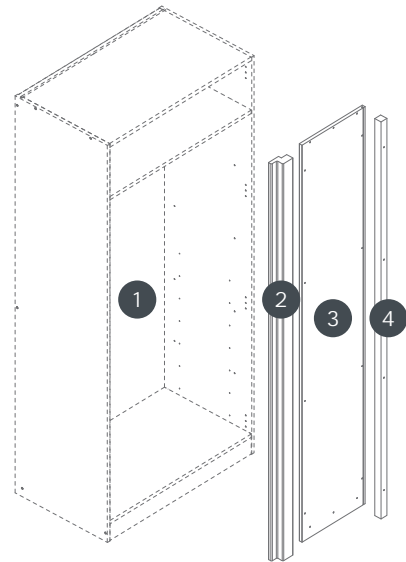

WARDROBE CABINET BREAKDOWN:

SINGLE / DOUBLE WARDROBE CABINET

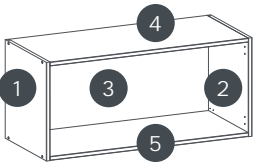

- 1 1 x 18mm left hand side panel
- 2 1 x 18mm right hand side panel
- 3 1 x 8mm back panel
- 4 1 x 22mm top
- 5 1 x 22mm shelf and 1 x base panel
- 6 4 x Structural batons (1 x acts as structural plinth /3 x cross rail)

CORNER WARDROBE CABINET

- 1 1000mm double wardrobe
 - 2 Corner post 2260mm (H)
 - 3 Blanking panel (linen)
 - 4 Spacer Rail (raw chipboard)
- } Corner Conversion Kit

SINGLE / DOUBLE FEATURE CABINET

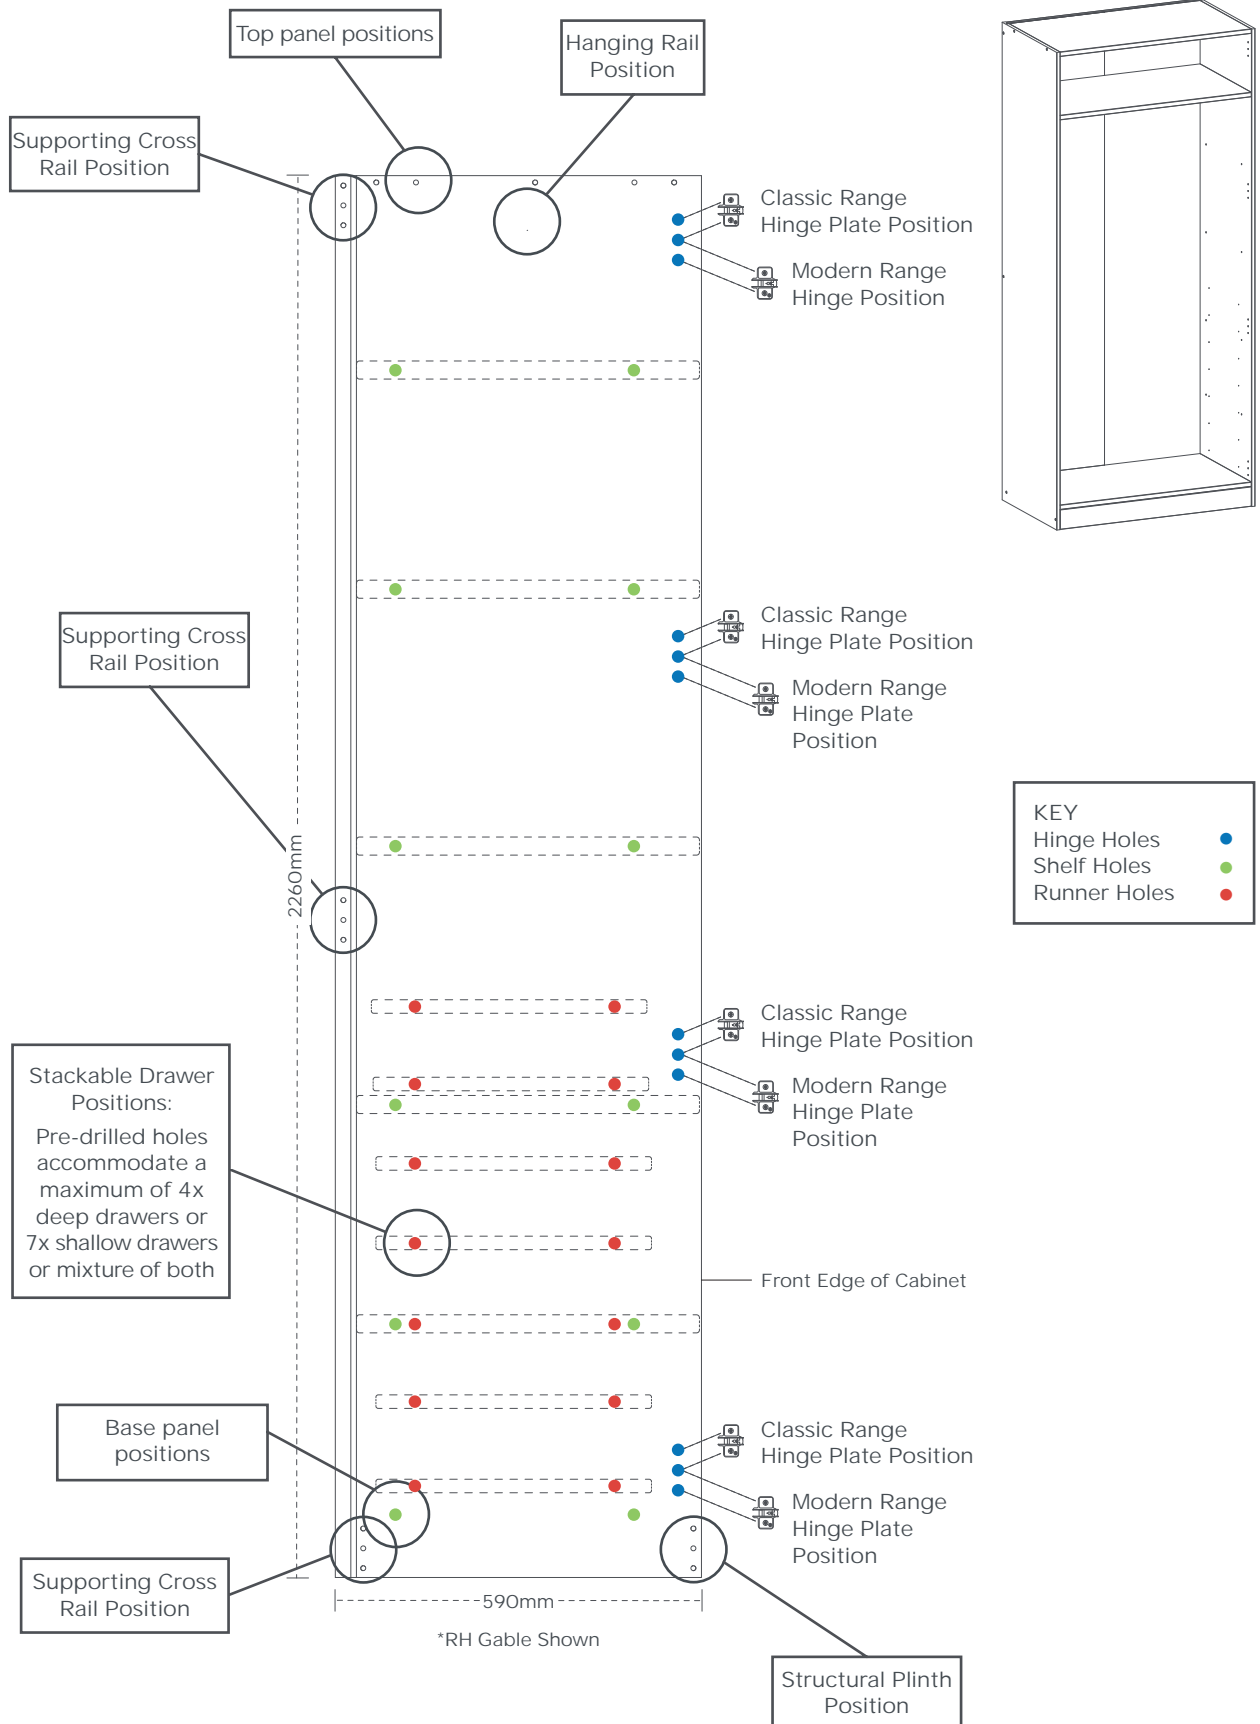

- 1 1 x 18mm left hand side panel
- 2 1 x 18mm right hand side panel
- 3 1 x 8mm back panel
- 4 1 x 18mm top
- 5 1 x 18mm base panel

(For corner wardrobe shelf pack please see page 2.16)

DRILLING SPECIFICATION

Our wardrobe cabinets are pre-drilled with 3mm diameter holes for internal pre-drilled holes that suit a variety of functions. The below diagram illustrates the hole position with details of each function, please refer to key below. Subsequent pages contain details with critical dimensions relevant to each function

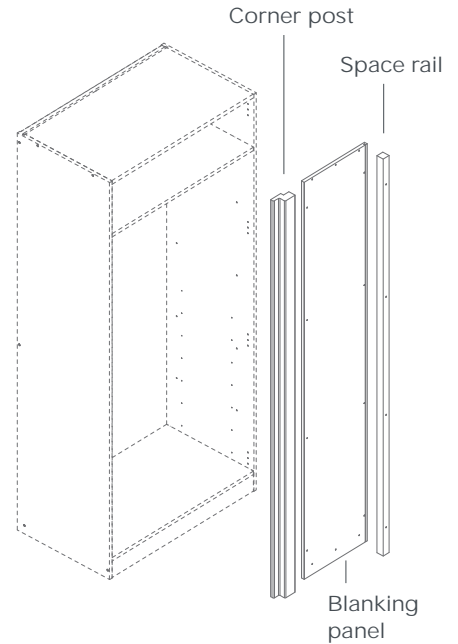

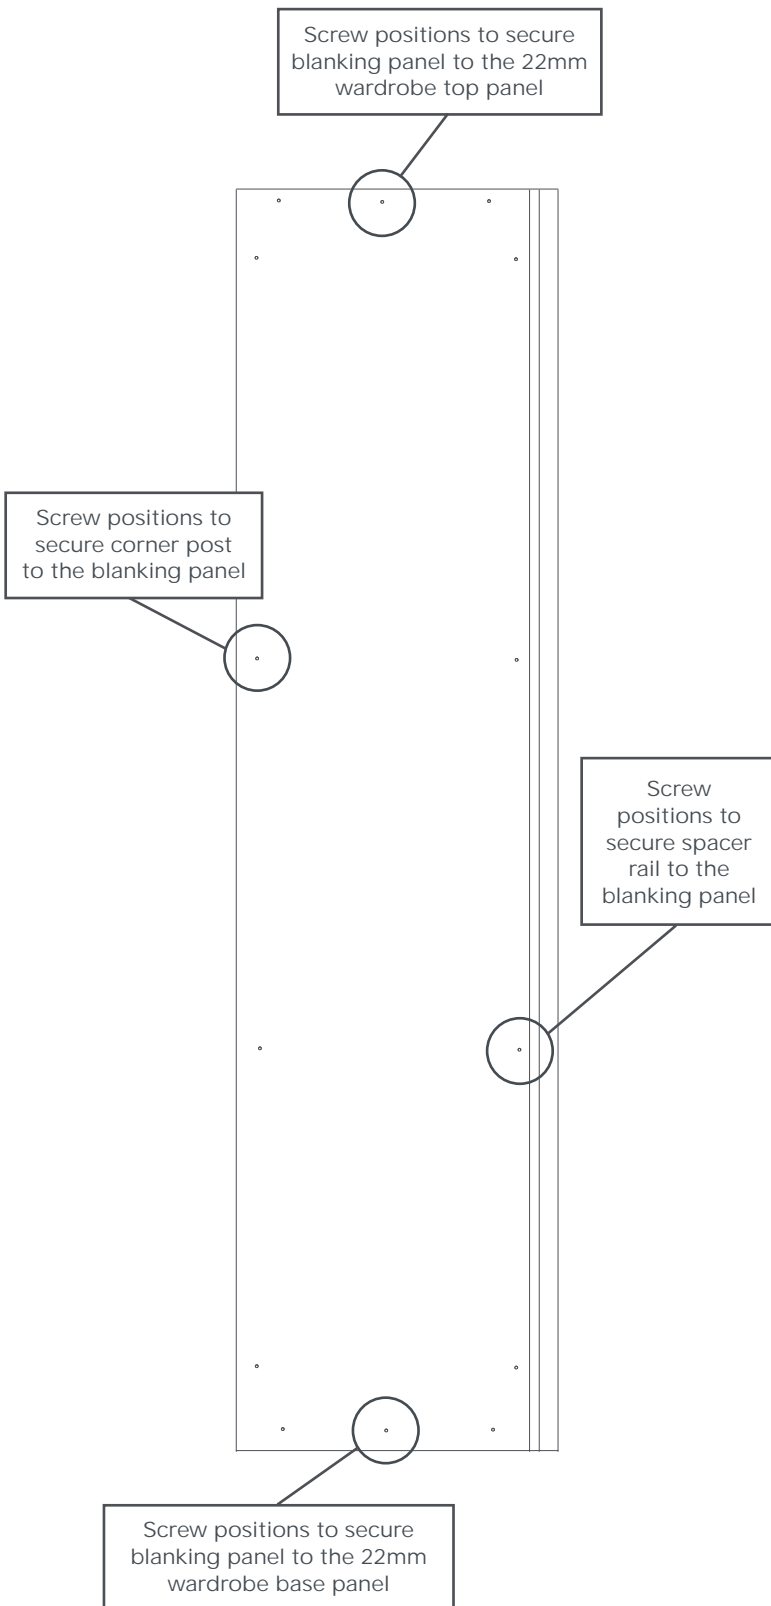

CORNER CABINET CONVERSION

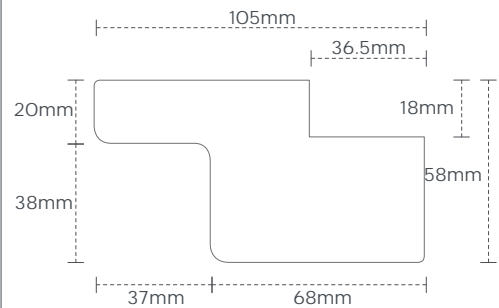

We use a 22mm blanking panel and corner post to convert double robes into a corner wardrobe.

The door used on a corner wardrobe should be hinged from the wardrobe cabinet - not the corner post.

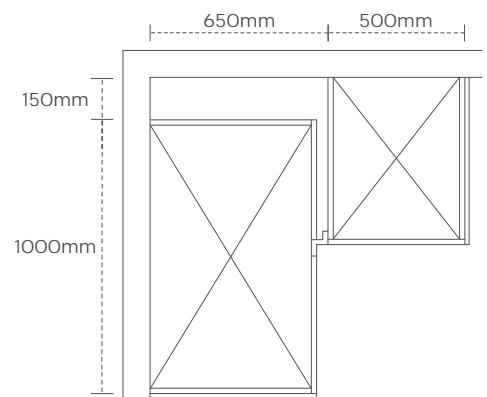

The corner post should be fixed and spacer rails used.

DELIVERY

Standard delivery of goods works on a 48/72 hour delivery service from dispatch and applies to all products delivered within mainland UK.

Orders for stocked products placed before 5pm will be dispatched within 48/72 hours from receipt of your order confirmation. Delivery for non-stocked and processed products (such as paint-to-order or bespoke sizes) are subject to advertised lead times.

ORDER COLLECTION

Collection of goods from our Trade Counter in Newton Aycliffe can be arranged through the customer centric team. Pre-arranged collection slots are also available when you order online at www.pws.co.uk.

Collections by third-party carriers are not permitted.

Minimum order values, carriage terms and charges are stated at the time of order.

REPUBLIC OF IRELAND AND NORTHERN IRELAND

A separate form of this information is available for Republic of Ireland, please contact customer services.

UK GLOBAL TARIFF (UKGT)

Due to new Rules of Origin regulations related to the UK's Trade and Co-operation Agreement with the EU, it is possible that some of our items may incur tariffs in the future. In such instances, PWS reserves the right to pass any such tariffs onto the customer.

UK OUTSIDE MAINLAND UK, INCLUDING OFFSHORE

Orders for delivery outside mainland UK, excluding Republic of Ireland, will be charged carriage at cost and advised prior to despatch.

HIGHLANDS & ISLANDS, OFFSHORE MAINLAND UK

Carrier services to these areas are normally extended and their premium services not always available. Whilst the Company will despatch in accordance with your requests, delivery services may be extended. Please contact customer services for further information, including price.

ITEMS TO FOLLOW

Customers will be advised of any items to follow and the expected availability date.

MINIMUM ORDER AND BOX QUANTITIES

Please note we cannot despatch less than box quantities of screws, priced per unit and not per box. Where possible there is no minimum order quantity.

ENHANCED PREMIUM SERVICE

PWS Bedroom Collection are pleased to offer an enhanced delivery service, which can be made direct to the consumers home if required:

- All orders will benefit from a delivery pre-call confirming AM/PM.
- A further call will be made on the day within the final hour of delivery.
- Delivered to room of choice (up to 3rd floor).

Additional delivery costs apply.
