STP FITNESS PRODUCTS

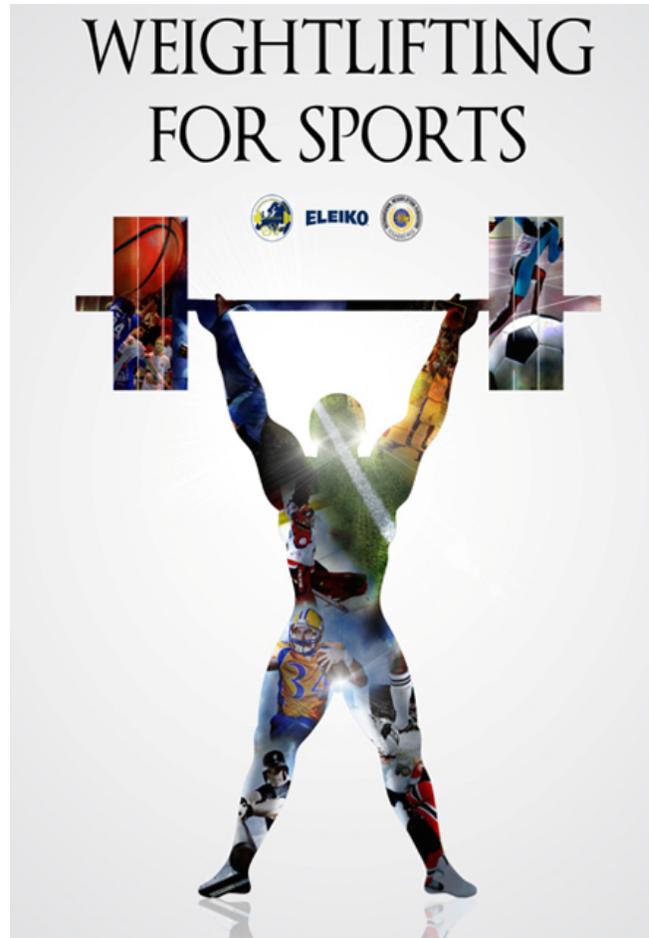

Mission Statement: Our goal is to supply your fitness products needs offering a broad range of top quality products from a growing and proven group of manufacturers that are considered the best in the industry. Finally, one serious stop to get it all .

We specialize in volume plates, barbells, kettle bells, dumbbells, slam balls, medicine balls, rigs and most every other item in the gym or workout setting. We help match the need and the right product for long term use and satisfaction. We help solve problems you are having and strive to become a valued partner. Feel free to browse through our new site, after Thanksgiving, to see a small example of various products from specific vendors. There are hundreds more, so don't be shy about telling us about every item you need. We will promptly respond with delivered pricing, mix or match from multiple vendors.

Some of our vendor group include such names as Eleiko, Werksan, York, Ivanko, Hi-Temp, Lacertusus from Italy, Dynamax, Concept 2, Assault, Bells of Steel, Lone Moose, Rage, Crossrope, RxSmart Gear, D Ball, Spud Sleds and Powerband to name a few.

Our brands are truly a way selecting the product group that's needed from top producers for true one stop supply. We develop our quotes based on need, then match up the mix from our group. We take the headache out of guessing what product is best for what use, day by day, and can provide a consistent blend of perfect results, keeping your club up to date with current equipment trends. For those who are "franchise clubs,

we can help you create an approved base product group for your company as well as offer specific options to the individual clubs, based on their size and unique needs, while keeping within the agreed upon framework you require. One thing we have learned is quality and appearance does count when it comes to creating long term value as well as creating the right "client feel" when they work out. If you have ever walked into a gym that you know "went cheap", you can tell immediately and you tend to look elsewhere for your membership. We create value by providing top quality at a fair price.

UFC / MMA Ring

It all will start with determining long term and short term needs. Steel rigs / racks, benches, mens and women’s barbells, colored or black plates with racks, collars, dumbbells and racks, kettlebells, ropes, jump ropes, boxes, wall balls, weighted slam balls, pulling sleds, covered “STP Powerband” warm up bands, to prevent injuries, floor workout pads and numerous other options to complete your gym.

With enough volume, our custom logo program can get your logo on the end of dumbbells and on larger plates. Many chain clubs are now also choosing to update and include 3 or 4 “Olympic Workstations” (below), in their gym, involving platforms, Oly bars and weights, specific for Olympic lifting, to compliment their current equipment offerings and help retain clients.

We are very grateful for your time and that you are considering new options for success and in the end, we hope to create a “Team” approach, along with you, for mutual success to create a true long lasting and desirable fitness solution.
