

- Soft Kill Agenda Pt. 2 -

The last installment left on in midstream citing examples of “soft-kill” agendas being perpetrated against humanity. While these programs are targeting ALL of us, it is well understood by science that Rh negative individuals have greater sensitivity to toxins in general inasmuch as they are typically more sensitive in many other areas, particularly psychic energies as well. To continue this list, bearing in mind that EACH of these items could well be (and probably SHOULD be) an entire book on it’s own....

ALUMINUM POISONING:

Pick up just about any deodorant and you will find aluminum as the active ingredient. Aluminum is another highly toxic agent to human biology. In addition to causing drastic and dire disease processes to the brain, aluminum is also very much highly absorbed by breast tissue in women. Studies have shown that women with breast cancer have higher levels of aluminum in their nipple aspirate fluid (NAF), a fluid present in the breast duct tree. In terms of the diseases of the brain, there are many toxic effects aluminum has on this tissue and it is, in fact, considered a neurotoxin by medical professionals. Scientists have long been aware of the high levels of aluminum in the brains of Alzheimers patients and are very clear on the link between the two, as well as a very high number of other behavioral problems and while there are other factors which lead to Alzheimers, aluminum poisoning is one of the fastest, surest ways to bring this disease about. Considering that most people are using aluminum-laced deodorants on a daily basis, it’s no surprise these diseases are on the rise.

PESTICIDES:

This is a sinister aspect of the chemicals using in food production which leech into human biology. As of now, there are GMO crops that produce their OWN pesticides which cannot be washed off but are part OF the vegetable. In California, the chemical METHYL IODIDE has been “approved” in strawberry production in SPITE of it being directly linked to cancer, late-term miscarriages, thyroid disease and neurological damage in humans. While this chemical was “pulled” a little over a year ago, the long-term consequences of ingesting this poison will not be evident in all aspects for some years away yet. Workers who apply certain pesticides to farm fields are twice as likely to contract melanoma, a deadly form of skin cancer. Yet we are told that non-organic foods are safe to eat. Likewise, researchers find higher levels of common household pesticides in the urine of children with acute lymphoblastic leukemia, a cancer that develops most commonly between three and seven years of age. No doubt, this is just one more card in the deck of depopulation programs implemented against us.

## PARABENS:

Cancer-causing chemicals have been added to our personal hygiene products. Parabens are a chemical compound found in everyday toiletry products including moisturizers, make-up, shaving foam, tanning lotions and toothpaste. They are also found in numerous brands of underarm deodorant. A study of 160 women with breast cancer revealed that parabens were present in the tumors of all the women. "In total, 160 samples were collected, four from each woman. They found 99 per cent of the tissue samples contained at least one paraben and 60 per cent of the samples had five." While the action by which parabens influence cancers is not entirely clear, what can be said is that cancers "feed" off of these chemicals.

## SUNSCREENS:

A whopping 92.2% of all the sunscreens on the market today are chock full of ingredients known to spur the growth and spread of skin cancer cells, which defeats their stated purpose of preventing skin cancer and actually is linked to CAUSING IT! Interestingly enough also, the FDA has been entirely aware of this horrific irony for over 10 years now but has refused to take any action against it! Is this pattern becoming clearer to all of you now?

Sadly... this isn't all but enough for this post for now to avoid being too lengthy.... It is my hope that this information is helping to wake people up as to the level of attack they have been under, particularly those more sensitive to these things who operate in the gifts of the Spirit...
