

~ The Narcissist/Empath Victimology ~

In the everyday flurry of life, it's easy for many of us to become distracted and/or misinterpret "signals" from others. Even the many here who are reading this that already have 'enhanced' intuitions, empathy skills and probably a myriad of other 'unusual' skill sets, it's always incumbent upon us to stay situationally aware as well as Spiritually engaged...

The paradigm we are looking at here in the title is a sad but common dynamic. Narcissists/Sociopaths have difficulty finding ANYONE who will put up with them for very long. Being innately gifted healers and helpers, an Empath may easily fall into a mutual, yet immensely toxic predator/prey scenario and being master manipulators and typically pathological liars, the Empath (victim) may actually BELIEVE this ugly landscape is love!

To that end, this article may help to distinguish between mixed "signals" and who actually may be involved in malevolent spiritual energy...

Psychologists use the term "Sociopath" for certain individuals, and as these tend to be the most dangerous, both to others and actually themselves, it may help to put a list together of what may be seemingly disconnected dots suddenly coalesce into patterns....

Let's take a look at SOME of these traits...

This may well help identify those either in need of help, IF they can receive it, or WARN you of their attempted influence over you..

Having had the misfortune of knowing how directly a sociopath can totally rob you of your peace, your dreams, even your inner stability, I humbly submit this list of observations in the hopes of helping those here dealing with "problem people."

These folks tend to exhibit the following traits:

* Glibness and Superficial Charm

* Manipulative and Conning

They never recognize the rights of others and see their self-serving behaviors as permissible. They appear to be charming, yet are covertly hostile and domineering, seeing their victim as merely an instrument to be used. They may dominate and humiliate their victims.

* Grandiose Sense of Self

Feels entitled to certain things as "their right."

* Pathological Lying

Has no problem lying coolly and easily and it is almost impossible for them to be truthful on a consistent basis. Can create, and get caught up in, a complex belief about their own powers and abilities. Extremely convincing and even able to pass lie detector tests.

* Lack of Remorse, Shame or Guilt

A deep seated rage, which is split off and repressed, is at their core. Does not see others around them as people, but only as targets and opportunities. Instead of friends, they have victims and accomplices who end up as victims. The end always justifies the means and they let nothing stand in their way.

* Shallow Emotions

When they show what seems to be warmth, joy, love and compassion it is more feigned than experienced and serves an ulterior motive. Outraged by insignificant matters, yet remaining unmoved and cold by what would upset a normal person. Since they are not genuine, neither are their promises.

* Incapacity for Love

* Need for Stimulation

Living on the edge. Verbal outbursts and physical punishments are normal. Promiscuity and gambling are common.

* Callousness/Lack of Empathy

Unable to empathize with the pain of their victims, having only contempt for others' feelings of distress and readily taking advantage of them.

* Poor Behavioral Controls/Impulsive Nature

Rage and abuse, alternating with small expressions of love and approval produce an addictive cycle for abuser and abused, as well as creating hopelessness in the victim. Believe they are all-powerful, all-knowing, entitled to every wish, no sense of personal boundaries, no concern for their impact on others.

* Early Behavior Problems/Juvenile Delinquency

Usually has a history of behavioral and academic difficulties, yet "gets by" by conning others. Problems in making and keeping friends; aberrant behaviors such as cruelty to people or animals, stealing, etc. Many serial killers, for example, will exhibit cruelty to animals while young. This is "practicing" stage for what they will do later in life.

* Irresponsibility/Unreliability

Not concerned about wrecking others' lives and dreams. Oblivious or indifferent to the devastation they cause. Does not accept blame themselves, but blames others, even for acts they obviously committed.

* Promiscuous Sexual Behavior/Infidelity

Promiscuity, child sexual abuse, rape and sexual acting out of all sorts. This is often veiled with subtle language references as well. That “tongue in cheek” joke, really is no joke at all, for instance....

* Lack of Realistic Life Plan/Parasitic Lifestyle

Tends to move around a lot or makes all encompassing promises for the future, poor work ethic but exploits others effectively.

This is a SHORT and abbreviated list of PHYSICAL realities that surround certain people with deeply seated spiritual diseases..

Yes, the term STD can also stand for Spiritually Transmitted Disease...

We all operate in Spiritual Gifts here, but we cannot ignore our physical senses and observations either. Once “identified” by whatEVER means, we THEN can begin to focus our energies more directly and effectively...

Highest Regards and Much Love,

Kevin
