

~ TRUE "VISION" ~

(Part 1)

Forget the very narrow bands of light, sound and energy the five "senses" are capable of. The overwhelming majority of frequencies are not able to even be perceived by them. "Visible" light, as perceived by us only exists in the very narrow bandwidth of 400 and 790 terahertz (THz). Considering the entire band of electromagnetic waveforms, this is merely only a SLIVER of the actual content which is present all around us! The question is, do we already have within us, the capacity to truly "SEE" all of these other "realms" of energy? That answer is YES!

Science, for many years has taught us that we only have retinal cells known as "rods" (for low-light) and "cones" (for color vision) in our anatomy, but this actually is NOT true! We actually have ANOTHER type of light-sensitive component within us. These are known as "Melanopsin" and are sensitive to an incredible range of frequencies. These cells send messages directly to the suprachiasmatic nucleus (SCN) of the hypothalamus. Many mystics have referred to the glandular array of the Pituitary, Hypothalamus and Pineal, as the "Crystal Palace" and it truly is precisely through these regions that true "sight" is manifested.

Our circadian rhythm is directly tied to these glands actually! When the hypothalamus receives information on whether or not light is present, it signals the pineal gland to either produce melatonin, (for sleep, when dark) or not to when light is present. Also, when light is present, the pineal gland produces cortisol, which many recognize as the "stress" hormone, but all it truly does, when in proper balance, is help us to be alert and awake. In addition to these two glands being light-sensitive, the pituitary gland also responds to light and produces vasopressin which also influences the SCN and helps balance our circadian rhythm.

Sadly, for most people, the pineal gland (also known as the conarium or epiphysis cerebri) is rendered all but incredibly underactive. The largest problem with the pineal gland is "calcification." This toxic buildup is directly attributed to exposure to flouride in one form or another. There is a reason this toxic substance has been pumped into our water supply, our toothpastes and many other items one would never think to look for it at. For example, MANY pharmaceutical drugs have flourine compounds in them as well!

The ancient philosopher, Descartes, declared the pineal gland to be the "Principal Seat of the Soul." Interesting to note, for an organ for which "science" says is likened to an appendix, with little or not verifiable "function" that per cubic mass, the pineal gland has the largest blood supply of our entire body! The only other organ approaching this level of circulation is our kidneys! (I'm sure THAT organ is "useless" too, right?) The pineal gland, also is not isolated from the body by the blood/brain barrier! It is this anomaly, which makes it clear that when "activated" and "full of light" that the Scripture is proven true! Matthew 6:22 KJV: "The light of the body is the eye: if therefore thine eye be single, thy whole body shall be full of light." SINGLE "eye" when God created us to have TWO? What ELSE would this Scripture be referring to?

Certainly, this is why we are being systematically poisoned. Flouride is not the only toxic substance to the pineal gland, but the only one I am bringing up at this time. This series will detail in future installments, how to "open" the pineal, DEVELOP it and learn to use this true gift from God in our lives.

Highest Regards and Much Love,

Kevin
