Requirements And Industry Best Practices  
Use Of Paddles And Effective Communication  
Components Of Temporary Traffic Control Zone  
Essential Tools And PPE For Flagging Operations  
Evaluate Traffic-Control Scenario  
Hands-On Equipment Use

### Course Description

Learn how to safely and effectively direct traffic, use hand signals and flagging devices, identify hazards and respond during emergencies. Flagger certification is required for any worker who directs or controls traffic in or near public roadways.

This is a national training course that teaches flagger safety guidelines from OSHA and the MUTCD. These standards apply to all jobsites nationwide. Some states require additional flagger training based on state-specific supplements to the MUTCD.
