

INNOVATIVE RENTAL SUPPLY

Fall Protection Authorized-User 8-hr

Course Overview

- Fall Protection Basics
- Regulation
- Performance Standards
- System components
- Fall Clearance
- Equipment Familiarization
- Inspection
- Scenario-based installation & use

Course Description

This full-day course will provide an overview of fall protection principles and equipment components used in personal fall restraint and arrest systems. The course includes review of regulations and standards, equipment capabilities and limitations, work planning with existing conditions, knowledge challenge, and self-perform installation and use.

This course is designed for all workers that utilize fall protection systems in the field. By learning the basics and challenging comprehension with scenario-based system installation and use, the students leave with a high level of comfort and confidence.
