

# INNOVATIVE RENTAL SUPPLY

## Scaffold Competent Person 8-hr

### Course Overview

Identify Common Types  
Recognize Hazards  
Safety Requirement & Best Practices  
Design of Systems  
Fall Protection  
Critical Thinking  
Erection & Dismantle  
Planning  
Hands-on Practical (Erection/Dismantle)

### Course Description

Companies may be required to designate an OSHA-compliant competent person to minimize scaffolding hazards. The competent person has the knowledge and authority to identify, control and correct hazards associated with the construction, use and disassembly of scaffolding structures.

This course gives you a strong understanding of scaffolding safety, regulations, design, erection and dismantling procedures. Functioning as an educational tool, employers are ultimately responsible for determining whether an employee is designated as a "Competent Person."
