BRUSHLESS VEHICLE WASH

DESCRIPTION:

BRUSHLESS VEHICLE WASH is a concentrated heavy-duty alkaline cleaner designed as a one-step brushless vehicle wash. It is fast acting and is low foaming to blast away dirt, grime, bugs and road film from fleet trucks, buses, heavy equipment and cars without manual brushing!

DIRECTIONS:

BRUSHLESS VEHICLE WASH can be applied either with a pump up garden sprayer or using the low pressure side of your pressure washer. Always allow time for the product to penetrate the soils but do not allow it to dry on the surface. Rinse the vehicle well using the high pressure of your pressure washer. Always apply **BRUSHLESS VEHICLE WASH** to a dry surface, working from side to side and bottom to top. Allow a brief penetration period, then pressure wash off without manual brushing. For best results, apply at high temperature (140°F - 160°F) and at high pressure.

When using this as the 2nd Step Neutralizer in a Two-Step Brushless Wash, dilute the product at the same rate as the 1st Step ACID WASH, such as BRIGHT AND CLEAN, then apply directly onto the vehicle from bottom to top, wait a brief time and pressure wash off thoroughly.

Use dilution of 1:25 (4.5 oz. per gallon) for brushless cleaning. Use dilution of 1:60 (2 oz. gallon) to 1:10 (12 oz. per gallon) for general cleaning depending on type and amount of soil to be removed.

TECHNICAL DATA:

pH CONCENTRATE.....	10.5
VISCOSITY.....	THIN LIQUID
COLOR.....	AMBER
FOAM PROPERTIES.....	LOW CONTROLLED FOAM
SURFACTANTS.....	NON-IONIC
SPECIFIC GRAVITY.....	1.03
BIODEGRADABILITY.....	100%

PACKAGING:

Available in 250 gallon totes, 55 gallon drums, 5 gallon pails and 4 gallon cases.

PRODUCT CODE:.....BVW01
