

Recommendation Letter for Vertical Garden

Kalaari Capital provided Capacloud an opportunity to install vertical garden in the start-up incubation center ReSpace under its flagship KStart business incubation program. The vertical garden site was located in Ascendas Mall, next to Ascendas IT Park, ITPL, Whitefield, Bengaluru. The installation happened during December 2015.

We found team Capacloud easy to reach, immensely supportive in aftersales services and extremely reliable in addressing any troubleshooting issue. Overall, we envisage a bright future for team Capacloud in vertical landscape business. We wish Capacloud all the best for their future business endeavors.
