Results

Wellbore Cleanouts

By Placing quality, reliability and Service at the core of our operations, Onsite Energy Services flawlessly milled 85 plugs on 2 wells in La Salle County saving the operator time and money. More importantly, we were able to do it with out down time, Little chemical, and left a Clean Well Bore job Duration. (Same Motor and handling tools on both wells did a bit swap while moving over to new well) Sure, we could talk about the success of our custom milling BHA or our tried and tested technique but our real satisfaction comes with the satisfaction of our customers.

Money saved & headaches Avoided
