

## **Permanent Learning Solutions LLC---Who, What and Why?**

Personally, I have never met a person who did not dream of being successful; however, I have met many people who have given up on that dream, especially when they sense that others have given up on them. This became very real to me when my own daughter struggled in school. I watched as a once excited confident girl became uncertain of herself. Homework was a nightmare! Despite the efforts of working closely with her teachers trying every method available to help my daughter read, nothing was working. It broke my heart to watch her self-confidence deteriorate to almost nothing. Countless hours were spent on homework, only to end in tears and frustration. Being a teacher myself, I was even more frustrated knowing that I did not have the tools to help my own daughter. After much prayer and searching for answers, I one day stumbled onto an ad in the yellow pages. Curious I gave them a call. This call changed both my daughters and my life. We were introduced into the world of Neurological-Physical Connections Therapy. It took only a few weeks of therapy to begin noticing changes in behavior and confidence levels. After only 26 weeks, my daughter, who began this therapy program reading at a third-grade level, was now reading at an eleventh-grade level. Her grades once D's and F's were now A's and B's. Her confidence grew and I watched her soar. This became my passion and as an educator, taught me to see my students differently. When I watched a student zone out, I knew I was not reaching them and I needed to change my teaching. When a student became a class clown, I quickly learned, this too was a way of coping with their lack of understanding.

This is what sent me on a journey which led to the amazing world, which I call Neurological-Physical Connections Therapy. NPCT combines physical and mental exercises, proven to build and connect the neurological pathways in the brain, thereby developing the ability to learn and comprehend in all learning environments. By using NPCT, we can help people of all ages who struggle with: Dyslexia, problems remembering, poor reading skills, poor comprehension, ADD, ADHA, Mild Autism, inability to focus, Dysgraphia, and so much more.

There are many programs that help kids with bits and pieces of these problems, however, they are very expensive and many cannot afford to get the help they desperately need to succeed in school and life. Permanent Learning Solutions, LLC., is comprehensive and affordable. It tackles all areas of the brain used to process information which we call, Aspects of Learning. ex. Focus, Spatial Relations, Rhythmic Response, Size, Shape, Direction etc. Our goal is to help everyone, who has the desire, succeed.

Not only do we develop the Neurological-Physical Connection, we also teach valuable life skills, which we call Empowerment Skills. These skills teach the importance of goal setting and understanding that your mood often determines your outcome. Furthermore, we teach the importance of perseverance and the need to face tough challenges.

Everyone deserves the right to find success. Many problems can be solved when a person can learn and believe in them self. Permanent Learning Solutions LLC will provide every child/adult possible that opportunity for success!

## **Biography**

KaeLyne Pendleton graduated from Utah State University with Bachelor of Science degrees in Physical Education and Secondary Education with a minor in music. She received her Masters of Science Degree from Touro University Nevada in Educational Leadership and Administration. KaeLyne spent 18 years teaching in the public-school system where she was a three-time recipient of Who's Who Among American Teachers. She was also voted Fifth District Music Teacher of the Year in Idaho, and Region Soccer Coach of the Year in Nevada. In 2011 KaeLyne started Permanent Learning Solutions, LLC., a Neurological-Physical Connection Therapy Program. In 2012, she left her teaching career to dedicate herself to helping others succeed in and out of the classroom. In 2014, she started a preschool program where Neurological-Physical Connection Therapy was integrated into the curriculum. After tracking her first graduating class through the 3<sup>rd</sup> grade, it was discovered that 99% student left 3<sup>rd</sup> grade with straight A's. The 1% who did not still received B's and was invited to participate in private sessions. However, due to a divorce the mom just did not have the time or energy to follow through. In 2016, she co-founded GO EXL a non-profit Private Christian School which will open it's door in 2018.
