

President's Message

November 2025

It has been a whirlwind ride since coming back from National Convention in Florida and it doesn't seem to want to stop, didn't think the ride was going to be that bumpy, hopefully the road ahead will get smoother soon.

As I started my travels, with my riding partner Dawn Davidson, special project chairman our first stop was at Unit 8 in Casa Grande. We were gracefully welcomed and met a group of wonderful auxiliary members. My husband and I attended the Bike and Car Show at Post 105, it was awesome to see so many different styles of bikes and cars, met a lot of ALR members and Auxiliary members and of course my husband won some of the raffles being held by the auxiliary, we had a great time visiting.

Dawn and I made a trip up to Payson for installation of a new unit. We had an awesome lunch and welcomed the new unit, Rose and Stacey did a wonderful job installing the new members, even got a junior member installed.

Made my 1st official visit to District 5 in Safford in late October, had a nice visit with old friends and met several auxiliary members of District 5, we had a wonderful lunch that was provided by unit 32. Dawn did a presentation on my special project.

Made my 2nd official visit to District 8 in Cottonwood, we were welcomed with open arms and had a great lunch provided by unit 25. This was a great and meaningful trip because my husband and I got to stay and visit with a dear cousin in Camp Verde who is not doing well.

Then it was off the Tucson for the Fall Conference, I didn't realize that there was so much that goes into putting this conference together. It was great to see so many auxiliary members dressed in their district membership theme, some awesome outfits, what a fun time and awesome display boards on auxiliary programs and a great luncheon we had.

Thank you everyone who attended the Fall Conference, I was so overwhelmed, Arizona Auxiliary Rocks!!! I wish everyone a safe and Blessed Thanksgiving.

For Service, NOT SELF

Dolores Chavez

AZ Dept. President
