We've worked with Andrew for about 5 years now. He's proven to be a reliable partner for our lighting installation projects. Together, we've done a large-scale re-lamp project of over 200 shops across dozens of states. This required timely installation and perfect accuracy. Andrew and his team were quick, communitive, and efficient.

As for any project, there were last minute issues that came up from other parties, but Andrew and his team were very flexible and adaptable during those times. I would highly recommend Andrew and Amp Lighting for any lighting installations or related work.

- Reuben Scott, Commercial Client Manager
