

Our mission is to facilitate the **speedy and equitable** transition to a zero-emissions school bus fleet in Texas, and beyond.

Why are Electric School Buses (ESBs) Important?

- More than 95% of school buses in the United States run on diesel fuel.
- Diesel exhaust is a known carcinogen and is linked to asthma and heart disease.
- Exposure to diesel exhaust has serious impacts on cognitive development.
- Children are especially at risk.
- Studies show disabled students, students of color, students from low-income families are more likely to ride school buses; ride them for longer.

Where does Texas fit in?

Texas has the largest school bus fleet in the nation!

1.4 million or 28%

of kids ride the bus in the state

Powered By Our Members

Benefits of ESBs

- Zero tailpipe emissions!
- Improved student, driver & public health.
- Cost savings: fuel and maintenance.
- Energy independence and community resilience.
