Earlier today commentator and podcaster Tim Pool tweeted out YouTube's updated Coronavirus rules.

Youtube recently removed the rule barring claims that the vaccines do not reduce the risk of contracting COVID-19.

That was a lie. YouTube banned users for over a year for stating this obvious fact. Now they don't.

YouTube recently also removed the rule barring claims that masking was ineffective and actually destructive to children.

That was also a lie. YouTube banned users and censored their contact for over a year for stating this obvious fact. Now they don't.

Back in January Google-YouTube would censor you and ban your account if you questioned masking.

And back in January Google-YouTube would censor you and ban your account if you questioned the efficacy of the COVID vaccines.

That has all changed.

Today even Google-YouTube admits the vaccines didn't work and masking was ineffective and destructive, especially to children.

Of course, The Gateway Pundit has been censored and fact-checked repeatedly for publishing articles on masking and vaccines that are now regarded as factual.

When will we receive our apology from these ruthless and dishonest hacks?
