'Criminal': Confidential EU Documents Reveal Thousands of Deaths From Pfizer-BioNTech Shots

"Confidential" documents released by BioNTech to the European Medicines Agency reveal tens of thousands of serious adverse events and thousands of deaths among people who received the Pfizer-BioNTech mRNA COVID-19 vaccine during a time period when the vaccine makers insisted they saw no "safety signals."

By [Michael Nevradakis, Ph.D.](#)

Miss a day, miss a lot. [Subscribe to The Defender's Top News of the Day.](#) **It's free.**

Documents released by BioNTech to the European Medicines Agency (EMA) reveal tens of thousands of serious adverse events and thousands of deaths among people who received the Pfizer-BioNTech mRNA COVID-19 vaccine.

The documents, dated Aug. 18, 2022, and marked "confidential," show that cumulatively, during the clinical trials and post-marketing period up to June 18, 2022, a total of 4,964,106 adverse events were recorded. The documents included an [appendix](#) with further details about the specifics about the identified adverse events.

Among children under age 17, 189 deaths and thousands of serious adverse events were reported.

The documents present data collected between Dec. 19, 2021, and June 18, 2022 (the "PSUR #3 period"), in addition to cumulative data on adverse events and deaths that occurred among those who received the vaccine during clinical trials and during the post-marketing period, beginning December 2020 up until June 18, 2022.

During this time, Pfizer-BioNTech said it identified almost no safety signals and claimed the vaccine demonstrated over 91% "efficacy."

Remarking on the documents, [Brian Hooker, Ph.D., P.E.](#), senior director of science and research for [Children's Health Defense](#), told The Defender:

"These adverse event reports are 'off the charts,' with myocarditis reports at over 10,000 and pericarditis reports at over 9,000.

"Historically, we know that this would be an under-ascertainment of the actual numbers. It is criminal for the EMA to keep this vaccine on the market."

According to an analysis by commentator and author [Daniel Horowitz](#), the percentage of adverse events classified as serious was "well above the standard for safety signals usually pegged at 15%," and women reported adverse events at three times the rate of men.

Sixty percent of cases were reported with either "outcome unknown" or "not recovered," suggesting many of the injuries "were not transient," Horowitz said.

The highest number of cases occurred in the 31-50 age group, of which 92% did not have any comorbidities, making it very likely it was the vaccine causing "such widespread, sudden injury."

There were 3,280 fatalities among vaccine recipients in the combined cumulative period including the clinical trials and post-marketing, up to July 18, 2022.

According to Horowitz, the documents "show that Pfizer knew about a sickening level of injury early on," yet continued to distribute its COVID-19 vaccine.

The documents are not part of the ongoing court-ordered release of the so-called "[Pfizer documents](#)" in the U.S., but according to Horowitz, are pharmacovigilance documents requested by the EMA, the EU's drug regulator.

The documents were made available to an Austrian science and politics blog, [TKP](#), following "a FOIA [Freedom of Information Act] request from an anonymous reader." They were subsequently published on March 4. However, once published, no European English-language media outlet appears to have reported on them.

As a result, they remained under the radar until recently, when several independent English-language bloggers discovered and published the documents.

Thousands of pediatric serious adverse events and deaths

The main Pfizer-BioNTech document revealed 9,605 adverse events (3,735 serious) during the PSUR #3 and 25 cases during the clinical trials among children ages 11 and younger. These included 20 fatalities, in children as young as 5 years old.

Causes of these fatalities included [dyspnea](#), cardiac arrest, cardio-respiratory arrest, [pyrexia](#) and myocarditis, though "all events were assessed as unrelated" to the vaccine.

In one example listed in the document, an 11-year-old boy died of acute respiratory failure two days after the first dose of the vaccine. In another case, a 6-year-old girl died seven days following her initial dose of complications that included [renal impairment](#), epilepsy, apnea, seizure and "sudden death."

The document lists another case, that of a 6-year-old boy whose listed causes of death are myocarditis, cardio-respiratory arrest and [COVID-19](#). He died seven days after the first dose of the vaccine, and although autopsy results were "pending," "the reporter concluded that the death 'had nothing to do' with the administration of BNT162b2 [the Pfizer-BioNTech vaccine] and was due to natural causes."

For children ages 12-17, the document listed 21,945 adverse events (19,558 serious) in the post-marketing period and 15 cases during clinical trials. A total of 169 deaths were recorded, with listed causes including dyspnea, pyrexia, cardiac arrest, myocarditis, cardiac failure, seizure and shock.

Nevertheless, the document states "No new significant safety information was identified based on the review of the cases reported in the overall paediatric population."

'No safety signals' despite deaths, injuries of pregnant women and newborns

Pregnant and lactating women also were significantly affected. There were 3,642 post-authorization adverse events and 697 clinical trial adverse events in this population, including spontaneous abortion, fetal death, postpartum hemorrhage, premature separation of the placenta, premature labor or delivery, live birth with congenital anomalies and stillbirths.

Nevertheless, the documentation again states, "There were no safety signals regarding use in pregnant/lactating women that emerged from the review of these cases or the medical literature," despite two key admissions elsewhere in the documentation.

In one instance, the document stated, "The safety profile of the vaccine in pregnant and/or breastfeeding women was not studied in the pivotal clinical trial and the maternal clinical trial was terminated early due to participant recruitment difficulties."

And in another instance, Pfizer-BioNTech identified the following as "missing information":

"Use in pregnancy and while breastfeeding; Use in immunocompromised patients; Use in frail patients with co-morbidities ... Use in patients with autoimmune or inflammatory disorders; Interaction with other vaccines; Long term safety data."

Pfizer-BioNTech stated a "commitment" to track "pregnancy outcome[s] in clinical trials."

Myocarditis and pericarditis deaths among children, young adults

A notable discrepancy appears in terms of reported cases of myocarditis in the clinical trials as compared to the post-marketing period — one myocarditis case (0.15% of all cases) is listed for the clinical trial period, while 5,422 cases (1.1% of all cases) and 5,458 serious events were reported in the PSUR #3 period.

Of these, 87 cases were fatal and 1,608 were listed as "not resolved." Among children and young adults, 48 cases were reported for those between the ages of 5 and 11 (two deaths), 366 among 12-15-year-olds (three deaths), 345 among 16-17-year-olds and 968 among 18-24-year-olds (four deaths).

In one instance, an 11-year-old girl developed myocarditis two days after her first dose and subsequently died, with the listed causes of death including myocarditis, respiratory failure, acute cardiac failure and cardio-respiratory arrest.

Separately, a 13-year-old boy developed myocarditis five days after his second dose, and subsequently died of myocarditis, cardiac arrest, [multiple organ dysfunction syndrome](#), [ventricular tachycardia](#) and renal failure.

A 13-year-old girl with no medical history developed myocarditis six days after her first dose and also later died.

In the case of a 19-year-old male who developed myocarditis three days after his third dose and who eventually died, an autopsy "revealed extensive necrosis of the left ventricular myocardium ([myocardial necrosis](#)); myocarditis/fulminant myocarditis."

And a 26-year-old male who also took the flu vaccine developed myocarditis four days after his third dose of the Pfizer-BioNTech COVID-19 vaccine, and subsequently died. The listed causes of death included myocarditis, arrhythmia, inflammation and left ventricular dysfunction. Autopsy results "showed myocarditis."

Similarly, while no cases of pericarditis were recorded during the clinical trial, 4,156 were recorded during the PSUR #3 period, including 4,164 serious adverse events and 19 fatalities. This included 30 cases among 5-11-year-olds, 118 cases among 12-15-year-olds, 106 cases among 16-17-year-olds, 479 cases among 18-24-year-olds (and one death), and 417 cases among 25-29-year-olds, again including one death.

In one example, a 22-year-old male developed pericarditis 31 days after his second dose and eventually died of pericarditis and other causes, including multiple organ dysfunction syndrome, [pericardial mass](#), [pericardial effusion](#), [malignant pericardial mesothelioma](#) and right ventricular failure.

Numerous other cardiovascular adverse events were recorded, totaling 32,712 cases during the PSUR #3 period (496 fatal) and 27 during the clinical trials (two fatal — with none of the events listed as “related” to vaccination).

Causes of death included in this category include arrhythmia, cardiac failure and acute cardiac failure, cardiogenic shock, coronary artery disease, [postural orthostatic tachycardia syndrome \(POTS\)](#) and [tachycardia](#).

Nevertheless, “No new significant safety information was identified.”

Many ‘very severe and very rare’ adverse events identified

The 393-page confidential Pfizer document shows that Pfizer observed more than 10,000 categories of diagnosis, many “very severe and very rare,” Horowitz wrote.

These include 73,542 cases of 264 categories of vascular disorders from the shots, many of which “are rare conditions,” hundreds of categories of nervous system disorders, totaling 696,508 cases and 61,518 adverse events from well over 100 categories of eye disorders, “which is unusual for a vaccine injury,” according to Horowitz.

In addition, “there were over 47,000 ear disorders, including almost 16,000 cases of tinnitus,” “roughly 225,000 cases of skin and tissue disorders,” “roughly 190,000 cases of respiratory disorders” and “over 178,000 cases of reproductive or breast disorders, including disorders you wouldn’t expect, such as 506 cases of erectile dysfunction.”

“Over 100,000 blood and lymphatic disorders, for both of which there’s a wealth of literature linking them to the spike protein” were indicated, as well as “almost 127,000 cardiac disorders, running the gamut of about 270 categories of heart damage, including many rare disorders, in addition to myocarditis.”

There were also “3,711 cases of tumors — benign and malignant,” and “there were over 77,000 psychiatric disorders observed.”

“What is so jarring is that there are hundreds of very rare neurological disorders that reflect something so systemically wrong with the shots, a reality that was clearly of no concern to the manufacturers and regulators alike,” Horowitz wrote, referencing 68 listed cases of a rare diagnosis, [chronic inflammatory demyelinating polyneuropathy](#).

In another example, the [“Pharma Files” Substack](#) identified 3,092 [neoplasms](#), noting that “malignant neoplasms means cancer.”

Pfizer-BioNTech usually identified ‘no safety signal’ despite thousands of deaths

Numerous deaths and serious adverse events were recorded for a wide range of other conditions:

- Stroke: 3,091 cases and 3,532 serious adverse events during PSUR #3, including 314 fatalities, and 19 cases during the clinical trial (one death).

The document stated, "Cerebral venous sinus thrombosis ... and Cerebrovascular Accident/Stroke were evaluated as signals during the reporting period and were not determined to be risks causally associated with the vaccine ... No additional safety signals ... have emerged based on the review of these cases."

- Respiratory: 2,199 cases and 1,873 serious adverse events during PSUR #3, including 363 fatalities, and 33 cases during the clinical trial (four deaths). Serious adverse events included cardio-respiratory arrest, pneumonia, respiratory failure, acute respiratory failure, hypoxia and [acute respiratory distress syndrome](#). Yet, "No safety signals have emerged based on the review of these cases."
- Bell's palsy: 733 cases were reported during PSUR #3, in addition to 1,428 cases of facial paralysis. Six cases were fatal, with all victims over age 60. One additional case of [Bell's palsy](#), in a 75-year-old female from the U.S., was recorded in the clinical trial but was deemed "not related" to her vaccination. Again, "No new significant safety information was identified."
- Neurological: 5,111 cases and 4,973 serious adverse events during PSUR #3, including 67 fatalities, and 15 cases during the clinical trial. Once more, "No safety signals have emerged based on the review of these cases."
- Immune-mediated/autoimmune adverse events: 11,726 cases and 8,445 serious adverse events during PSUR #3, including 133 fatalities, and 19 cases during the clinical trial. Serious adverse events included [thrombocytopenia](#), [interstitial lung disease](#), cerebral hemorrhage, encephalitis, multiple organ dysfunction syndrome, renal failure, pneumonia and [pulmonary embolism](#). Yet, "No new safety signals have emerged."
- Multisystem inflammatory syndrome: 207 cases and 210 serious adverse events during PSUR #3, including 56 deaths, with 35 involving the elderly. In addition, 38 cases were reported in children. Nevertheless, "No new safety signals have emerged based on a review of these cases [or] literature."

Pfizer-BioNTech stated a "commitment" for "closely monitoring [multisystem inflammatory syndrome](#) in children and in adults ... and reporting of new cases."

- Thromboembolic adverse events: 6,102 cases and 6,724 serious adverse events during PSUR #3, including 265 fatalities, and 17 cases during the clinical trial (one death). Serious adverse events included pulmonary embolism, [thrombosis](#) and [deep vein thrombosis](#). Again, "No safety signals have emerged based on the review of these cases."

Elsewhere in the document, the case of a 14-year-old male who died of peripheral swelling after getting the COVID-19 vaccine was mentioned, with no additional details.

In another example, a 67-year-old male “with a history of diabetes and [idiopathic thrombocytopenic purpura](#)” suffered chest and gastrointestinal discomfort less than 30 minutes after receiving his third dose of the vaccine. A diagnosis of [anaphylaxis](#) was made, while an electrocardiogram showed “signs of a [myocardial infarction](#).” He later sustained cardiac arrest and died 12 days following his vaccination.

Moreover, 204 fatalities (and 24,077 cases) of vaccination failure, 81 deaths from “vaccination stress,” 24 deaths (and 1,402 cases) of suspected vaccination failure, two deaths from [glomerulonephritis](#) and [nephrotic syndrome](#), two deaths (1,326 cases) from “medication error” and 166 deaths from “other” adverse events — mostly pyrexia — were recorded.

Pfizer-BioNTech and EMA: ‘nothing to see here’

Pfizer and BioNTech claimed that the overall efficacy of their COVID-19 vaccine for the PSUR #3 period was 91.3% — and 100% for some populations.

Moreover, only one safety signal was definitively identified: hearing loss, with Pfizer-BioNTech committing to perform a “safety evaluation of tinnitus and hearing loss.”

Two other conditions, myocarditis and pericarditis, were determined to be an “important identified risk,” while irritability was determined to be an “identified risk (not important).”

“A statement regarding the reporting rates of myocarditis and pericarditis after primary series and booster doses” was added to their vaccine’s European product label.

Labeling was changed for [Guillain-Barré syndrome](#), but in Japan. The document stated:

“Although not considered by definition a regulatory action taken for safety reasons because it does not significantly impact the benefit risk balance of use of the product in authorised populations, due to the receipt of spontaneous reports of Guillain-Barre syndrome (GBS) after vaccination with mRNA COVID-19 vaccines including BNT162b2 ... Japan has required class changes to include GBS in the important precautions section of the Japan package insert.”

Despite the large number of deaths and serious adverse events, Pfizer and BioNTech wrote, “Based on the available safety and efficacy/effectiveness data from the reporting interval for BNT162b2, the overall benefit-risk profile of BNT162b2 remains favorable” and that “no further changes ... or additional risk minimization activities are warranted.”

The EMA appears to have agreed with this conclusion. In its “[assessment report](#),” its Pharmacovigilance Risk Assessment Committee (PRAC) wrote that “The benefit-risk balance for the use of Comirnaty in its authorized indication remains unchanged.”

“The PRAC considers that the risk-benefit balance of medicinal products containing tozinameran (Comirnaty) remains unchanged and therefore recommends the maintenance of the marketing authorisation(s),” the PRAC added.

However, Horowitz argues that the documents “show that Pfizer knew about a sickening level of injury early on,” yet continued to distribute its COVID-19 vaccine.

Earlier this month, [BioNTech was sued in Germany](#) by a woman alleging injuries from the Pfizer-BioNTech COVID-19 vaccine. The lawsuit demands at least 150,000 euro (\$161,500) in damages for bodily harm and unspecified compensation for material damages.

Cancer Is Exploding Because Of The CV19 Vaxxx - Dr. Betsy Eads w/ Greg Hunter (Video)

Dr. Eads says the number of deaths from the mRNA injections may be '1.2 billion per year world-wide'. Eads says, "If we allowed doctors to use Ivermectin, HCQ and CDS (Chlorine Dioxide Solution), we would not have 600,000 a year dead (from the CV19 injections), and I believe that is a low number. We would not have that, and that's the tragedy. This is a *democide*."

Using fresh data just on breast cancers alone posted by the American Cancer Society on [Cancer.org](https://www.cancer.org), Dr. Eads explains, "From [Cancer.org](https://www.cancer.org), in the year 2019 for those women under 45 years old (with breast cancer), it was 26,660. It 2020, it was 26,500. In 2021 when the CV19 vax rolled out, it was 26,561. . . . Cancer was not seen in the initial rollout because it took some time for the spike protein delivery. So, in 2022, those numbers went from 26,561 to 47,000. That is a two-fold increase. That's a direct result of the mRNA (CV19) shots. In 2023, it went up six-fold to 297,000 breast cancer cases, and we are not even done with 2023. "That may be as high as 500,000 breast cancer cases."

The fact that they stated "There were no safety signals regarding use in pregnant/lactating women that emerged from the review of these cases or the medical literature," despite two key admissions elsewhere in the documentation" clearly proves deliberate intent to mislead and coerce the world population into receiving these jabs under fraudulent means. Gates, Fauci, the CDC, FDA, and NIH all need to be held accountable for deliberate violation of Nuremburg agreements and charged with crimes. No plea bargaining, they need to be charged with willful and intentional fraud against humanity. They played with peoples lives, with mothers ability to carry and deliver healthy babies, and who knows what the future ability of these mothers will be to carry any pregnancy to term and deliver a healthy and viable baby. They deliberately lied to parents of young children about these jabs being safe and effective despite knowing the adverse events were stacking up, they lied to adults, young and old about the safety and efficacy of these jabs. They need to be held accountable, now, and not 20 years from now. They should face a year in prison for every adverse event cause, every death caused.

The article states that "Despite the large number of deaths and serious adverse events, Pfizer and BioNTech wrote, "Based on the available safety and efficacy/effectiveness data from the reporting interval for BNT162b2, the overall benefit-risk profile of BNT162b2 remains favorable" and that "no further changes ... or additional risk minimization activities are warranted." That's just one of many clear indications that these perpetrators of the worst crimes in history are not going to quit no matter how blatant and brought to light their crimes are and how hurt and angry the world's populations are. Would Hitler and the Nazis, for example, have quit if they had weapons so much to their advantage that nothing could stop them? Recall Harari's statement, among others equally as sick and heartless (abbr.) "Humans are hackable animals ... free will, that's over."

The video (link below) "The Human Mind as a Battlefield" and others like it describe horrible "brain space" neural technologies that are real, here and now. It is but one of several videos that describe these technologies. Our only hope here would be with the military and intelligence forces if they had the same technologies and were on the side of humanity. Also, we desperately need information as to how we can protect our minds, thus our and our loved ones' very lives from these invasive, manipulative and controlling neuro technologies. And can all be done

remotely and covertly on individuals as well as groups and populations. That's what's driving all

Thank you for sharing this astounding discussion featuring neuroscientist James Giordano, whose lecture on the same horrifying topic - "Brain Warfare", delivered at West Point Military Academy - has also now ricocheted via internet worldwide, been seen by rigorous researchers, seriously analyzed, and become the focus (due to sane suspicions "Brain Warfare" may indeed be the core/paramount operational factor in the 3+years [ongoing] COVID/mRNA injection global mass murder/assault-and-battery nightmare) of an increasing number of legitimate-concern meetings across the Earth.

One might suggest the distinct surge of tension-soaked casual meetings in public, marked by a very strange apathy and/or rejection of offers to delve into such serious matters, wholly relevant for this and future generations, observed in members of one's respective communities, confirms the following:

The (Giordano-coined) "decapablization" "Brain Warfare" triggers have already been pulled...

Actually, thanks to you Jerry for I followed your links to the other video of his you posted and I see that he has more. Another you've posted is "Dr. Charles Morgan on Psychoneurobiology and War." When I was kid some people were building bomb shelters in their backyards in the event of a nuclear attack. Now it seems we need brain shelters. Yet Faraday hats would be useless.

Apparently this technology can access neural function throughout the body. It would be like hiding under our desks with our hands covering the back of our necks as instructed to do by teachers in the early 60s as a drill in the event of a nuclear attack. If people started wearing these aluminum hats the NWO mass murderers would just laugh at us. They might even be the developers, manufacturers and distributors of these hats and make sure that the wearing of these useless products be highly recommended by healthcare agency officials and scientists and mandated by political leaders. Am I just being sarcastic?

This obfuscated information was conveyed to me (in response to a post on the

Back in the 1980s vaccine manufacturers were involved in many multi-million dollar lawsuits because of defective products that were injuring and killing recipients. They got our Congress to pass The National Childhood Vaccine Injury Act of 1986, which removed all their liability for injuries and deaths. This must be ended. The industry claimed that their vaccines lowered diseases. The truth is better sanitation and nutrition were responsible. Vaccines don't work!. if people understood how the immune system worked, they would know the truth. Our immune system is designed to wipe out any foreign matter that goes into our bloodstream so it would attack anything injected and try to get rid of it. Putting toxic matter into the bloodstream harms the immune system...it can injure or kill the recipient. Lies! Lies! and more of the same coming from those who are making billions or trillions now with their deadly products.

By now there is enough evidence to throw hundreds of people in jail. But will anybody go to jail? If not, then perhaps we have reached a point of diminishing returns in terms of finding more such information.

What would it take to send people to jail and what can ordinary people do to help the process?

What's really sick, and possibly terminally, is our society. In spite of a mountain of literally in your face evidence (which anyone paying attention already new BEFORE the launch) the majority of the public couldn't care less. It only been a few DAYS now that a non-resident can enter the United States without proof of having been injected with this poison. It's still mandated in some sectors of the economy. And if all goes according to plan you can shelve you travel plans once the UN digital vaccine passports are introduced (soon), unless you plan on taking shots like this.

As the author indicated, but not strongly enough IMO, the number of deaths is vastly understated. Assuming that the uptake of the bioweapon in the EU was comparable to the USA at about 65%, then as American insurance companies have published, the all cause mortality of the working public (under 66) was 40% higher than the average in the previous 5 years and it had nothing to do with the purported virus. Ed Dowd gives an excellent statistical analysis on this subject. Just more BS deception from governments.

The experimental drugs from the China Flu scandemic are NOT vaccines. By the CDC's corrupt redefinition of "vaccine", aspirin would qualify.

Divide coinvid by at least 10 and you have a more accurate number. Multiply vaxx deaths by at least 10 and you are closer to there true number.

Excellent article on Pfizer published this week over at HFDF. Most comprehensive article to date on the company chronicling their long and sordid history.

Starts with the origins of Pfizer in 1849 and and through meticulous documentation covers the long laundry list of crimes and corruption.

Pass it around.

The Story of Pfizer Inc. – A Case Study in Pharmaceutical Empire and Corporate Corruption

Nuremberg trials come to mind and we should start with Bill Gates, Klaus Swab, then move on to the Pfizer and Moderna CEO's then to the rest of these traitors and killers.

The Gaslight was the phrase, "safe and effective." Therefore no safety signals were going to be found, despite the obvious evidence of them in VAERS. The CDC knew according to their own safety signal trigger criteria, that the death safety signal had triggered by the end of January 2021, within a month or so of the vax release to the public. The CDC hid knowledge of the signal from the public for some two years, until after Steve Kirsch put up a billboard near CDC headquarters stating that the death safety signal had triggered. When the CDC finally admitted that it was true, they also announced that 770 safety signals had triggered.

The U.S. public health agencies are corrupt.

Thank you for this article. So revealing. Just unbelievable.
I know someone just diagnosed with interstitial lung disease. Of course hospital won't say HOW that happened, just a fluke autoimmunity issue. Jesus God Almighty.
So many people I know with these crazy diagnosis', And the stage four cancers.
I hope there is more attention paid to this article. I hope there are discussions on CHD TV.
Thanks again. I am keeping this for proof.

"The benefit-risk balance for the use of Comirnaty in its authorized indication remains unchanged." Did the EMA ever take a statistics course? I guess it's true that MD's today don't bother to read the research.
Thank goodness for the bloggers who discovered these documents. I've come to appreciate government watchdogs more than ever.

"vaccination failure" and "vaccine stress" must be European diagnoses. American doctors can't even choose a vaccine cause on their death certificates. What I'm seeing most of is rapid dementia descent, more common than turbo tumors, possibly caused by microstrokes or other brain impairments.

Jun 24, 2023 Leading Doctor Exposes TRUTH About Anti-Ivermectin Propaganda Campaign

Dr. Pierre Kory was among the earliest members of the U.S. medical community to raise his voice in opposition to the nation's response to the coronavirus pandemic. Now that he's become something of a pariah for speaking the truth, he's consolidated his experience and wealth of information into a new book, The War on Ivermectin.

From Pfizer et al:
Get the 'vaccine' ... There is only a minor chance that many will suffer a blood clot, stroke, heart attack or any of the many many many, possibly twelve hundred other so called 'rare' side effects. People drop dead for no reason all the time. Deal with it.

Anyone still wondering how this GENOCIDAL HOLOCAUST happened?

Went for mind first. Then the body.

The "Gates Bait" may still be plaguing Americans' with the "CHEM-TRAILS" his planes are dumping Chemicals into the atmosphere to stop Climate Change! Look at ALL the Weird Weather happening around America! Maybe, it's due to "Mr. Gates Bait"! He's going to lower the WORLDS POPULATION one way or another!!

"Massive Military Global Depopulation"

2020 predictions by US Military Intelligence; DOD's covid planning role; Pfizer's secret documents being exposed; dramatic and accelerating excess mortality, and our early warnings all fit.

The Deagle Corporation is a minor branch of US Military intelligence. In 2020 they predicted massive population reduction in many countries around the world. Please recall that the bioweapon injection that has been misrepresented as a "safe effective vaccine", was managed officially in the possession of the US Department of Defence. The DOD was also deeply involved in the planning of theplandemic as demonstrated by their dominant presence at Event 201 in the fall of 2019....

I cannot get this horrible feeling out of my head when i read the US Military Dept of Defense was part of this horrendous plandemic and they were sent into nursing homes here in Canada..God knows what those poor senior victims no longer with us, all alone no family members went through under their so called care.
