Background:

UCoD (Underlying Cause of Death) refers to *"the disease or injury that initiated the train of events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury"*

MCoD (Multiple Causes of Death) refers to *"the immediate cause of death and all other intermediate and contributory conditions listed on the death certificate"* (everything else)

Since we are duly informed by the venerable CDC that they scrutinize, interrogate, and invalidate conditions documented by coroners as a CoD, we can presume that of course the CDC is merely following their own rigorous and objectively applied standards.

Well. . . .

Hmmmmm. . . .

Yeah, they're not. Duh.

I am sorting through the conditions listed on death certificates as the UCoD that mention covid in some way that the CDC assigned the U07.1 ICD code [for covid] as the UCoD.

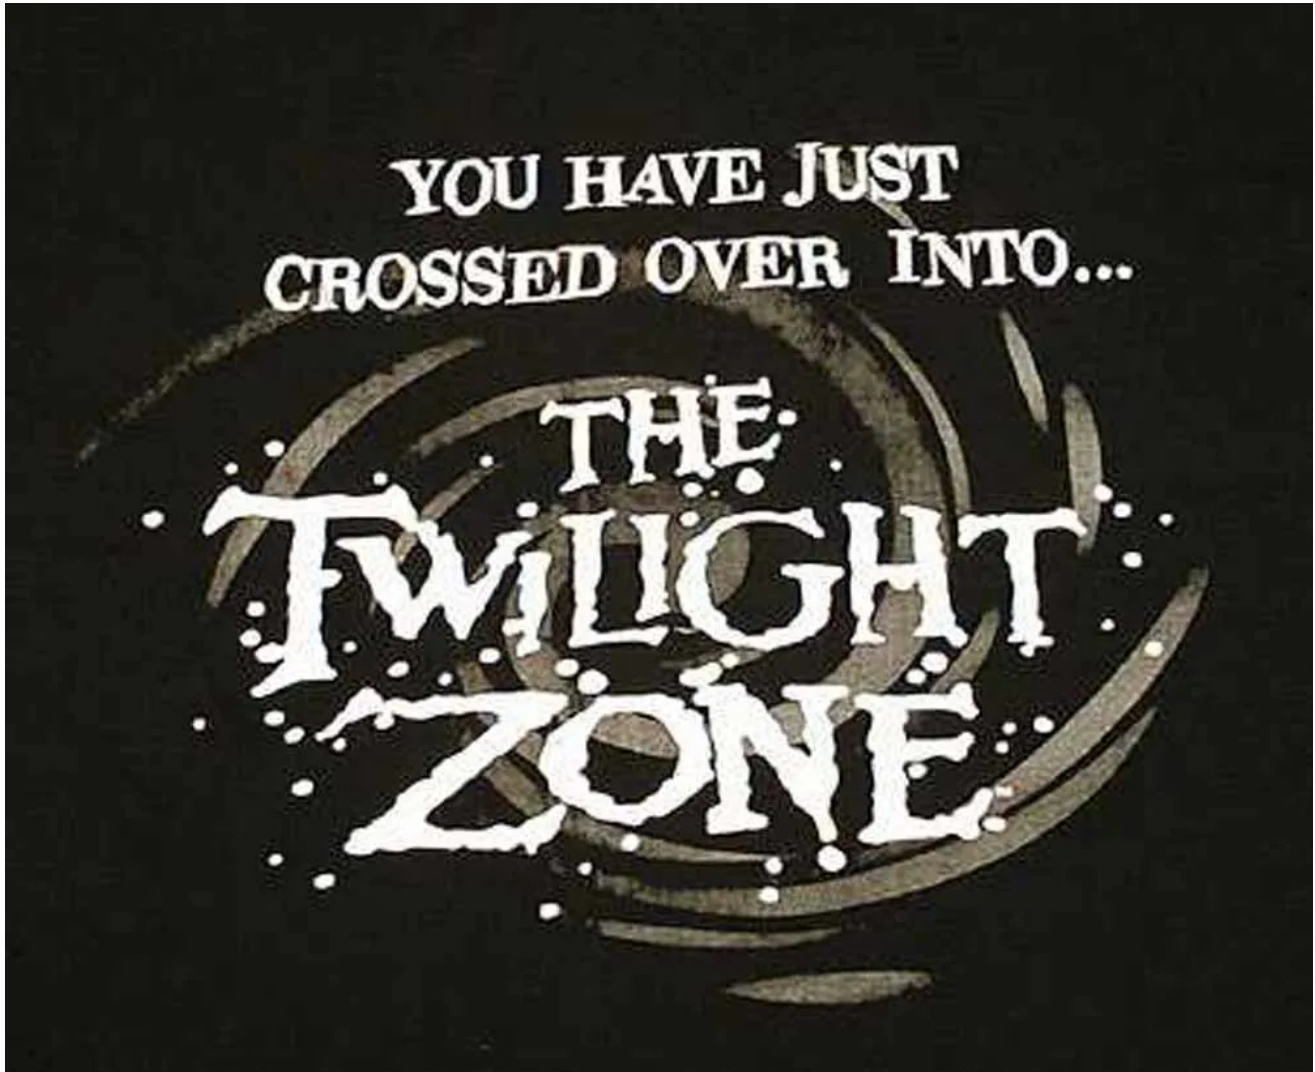

Since it is necessary to highlight these on an individual level to appreciate the . . . ‘shortcomings’ (we’re being nice) of the CDC’s adjudicative processes here, we’re going to have to break this up into a number of presentations, as there are hundreds of death certificates from each state to waddle through.

The categories I am sorting the questionable assignments of U07.1 as the UCoD where the death certificate UCoD references covid into are:

- **Wackadoodle**
- **Covid AND _____**
- **Covid in Setting of _____**
- **_____ in Setting of Covid**
- **"Suspected" / "Presumed" covid**
- **"History of"**
- **Misc**

For today, we will look at the 19 death certificates in the category the elegantly christened ‘wackadoodle’ category, where the CDC’s application of U07.1 for the UCoD seems unduly egregious.

Remember, the UCoD isn’t just “one of” the CoD’s, it’s THE CoD identified as *the primary catalyst or cause* of the death.

MINNESOTA LOONY COVID UCoD DEATH #1

LOONY COVID UCoD DEATH #1	
Certificate ID:	2020-MN-01****
Death Date:	5/11/2020
Age (Years):	91
Sex:	M
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	Y
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	ADVANCED MIXED DEMENTIA. TESTED POSITIVE FOR COVID-19 IN LATE APRIL 2020. UNCLEAR HOW MUCH COVID-19 CONTRIBUTED.
MCoD - ICD Assigned by CDC	F03, F179, I139
Cause A	ADVANCED MIXED DEMENTIA. TESTED POSITIVE FOR COVID-19 IN LATE APRIL 2020. UNCLEAR HOW MUCH COVID-19 CONTRIBUTED.
Time Cause A to Death	>1 YEAR
Cause B	-
Time Cause B to Death	-
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	HYPERTENSIVE HEART AND KIDNEY DISEASE.

If the coroner writes “unclear how much covid-19 contributed”, that should tip you off that maybe covid wasn’t “the disease or injury that initiated the train of events leading directly to death”. Especially when the patient was 91 with advanced dementia, hypertensive, and suffering from heart and kidney disease. Oh, and there wasn’t even any record of actual covid *symptoms*.

MINNESOTA LOONY COVID UCoD DEATH #2

LOONY COVID UCoD DEATH #3	
Certificate ID:	2020-MN-04****
Death Date:	12/8/2020
Age (Years):	85
Sex:	M
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	Y
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID 19 (PROBABLE: (+) TEST ON 12-2-20)/LEWY BODY DEMENTIA/CHF/CKD STAGE 4
MCoD - ICD Assigned by CDC	E142, G318, I500
Cause A	COVID 19 (PROBABLE: (+) TEST ON 12-2-20)/LEWY BODY DEMENTIA/CHF/CKD STAGE 4
Time Cause A to Death	-
Cause B	-
Time Cause B to Death	-
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	DM

Here we have an 85yo decedent suffering from dementia, congestive heart failure (“CHF”), stage 4 chronic kidney disease (CKD), and diabetes mellitus (DM). This fellow also had a “probable positive test” 6 days before he departed this world.

What is a ‘probable’ positive test? How could a test be a ‘probable’ positive? Good questions. Questions that the CDC doesn’t seem to have cared to resolve before dutifully slapping on the U07.1 as the UCoD though.

And even if we grant the positive test was 100% conclusive, heck even if he had 100 positive tests, how did the CDC adjudicate which of the myriad conditions mentioned in Cause A would get the coveted UCoD designation?? Yes, the doc completely botched this death certificate big time - there is only supposed to be ONE condition per line in Part 1 of a death certificate (Causes A-D). That still

doesn't really explain how the CDC arrived at the conclusion that the 'probable' covid test represented the condition most likely to have "initiated the train of events leading directly to death".

That must've been one whopper of an asymptomatic covid. . .

MINNESOTA LOONY COVID UCoD DEATH #3

LOONY COVID UCoD DEATH #2	
Certificate ID:	2022-MN-00****
Death Date:	1/28/2022
Age (Years):	68
Sex:	M
Place of Death:	HOSPITAL - INPATIENT
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	ASYMPTOMATIC COVID
MCoD - ICD Assigned by CDC	B182, K746
Cause A	CIRRHOSIS/ HEPATITIS C
Time Cause A to Death	YEARS
Cause B	ASYMPTOMATIC COVID
Time Cause B to Death	DAYS
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	COVID

Here we literally have a case of death by ASYMPTOMATIC covid. The obvious clinical incoherence of death by something without any clinical manifestation is of no concern to the CDC. The CDC also seems unperturbed by the logical impossibility of the "asymptomatic covid" which started *DAYS* prior to death CAUSING some nasty cirrhosis/hep C to manifest YEARS before covid jumped from bat to bat to civet to rodent to dog to human in the Wuhan wet market.

(Unless those pesky aliens the government caught taught the CDC how to time travel? Or maybe the CDC knows something we don't about the home planet of the decedent that we don't?)

MINNESOTA LOONY COVID UCoD DEATH #4

LOONY COVID UCoD DEATH #4	
Certificate ID:	2020-MN-04****
Death Date:	12/2/2020
Age (Years):	83
Sex:	F
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	Y
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID 19 INFECTION IN PATIENT WITH PARKINSON'S ON HOSPICE
MCoD - ICD Assigned by CDC	G20
Cause A	COVID 19 INFECTION IN PATIENT WITH PARKINSON'S ON HOSPICE
Time Cause A to Death	-
Cause B	-
Time Cause B to Death	-
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	-

Generally, a patient moves into hospice *after* the patient is diagnosed with their terminal illness. Which makes it rather odd to assign the UCoD here as covid. How can a covid infection in a hospice patient could cause the condition which landed the patient in hospice in the first place? Seems like a unsolvable mystery. Or is this another time-warping reversed cause-and-effect conundrum?

Man, those aliens really are something. . .

MINNESOTA LOONY COVID UCoD DEATH #5

LOONY COVID UCoD DEATH #5	
Certificate ID:	2020-MN-01****
Death Date:	4/28/2020
Age (Years):	85
Sex:	M
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	Y
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID 19, DESPITE NEGATIVE COVID -19 TEST ON 4/25/20
MCoD - ICD Assigned by CDC	G20
Cause A	ADVANCED PARKINSON'S DISEASE
Time Cause A to Death	REMOTE
Cause B	COVID 19, DESPITE NEGATIVE COVID -19 TEST ON 4/25/20
Time Cause B to Death	REMOTE
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	-

This death offers an illustration of just how much latitude the CDC had in mind when it instructs coroners to use their “best medical judgement” (maybe ‘best’ is a bit of an exaggeration?).

Even a layman would probably be right to presume that an 85 yo man with “advanced Parkinson’s disease” who tested *negative* for covid was probably killed by his Parkinson’s or related pathology. Yet, our expert coroner decided in his profound wisdom that not only was the test wrong, but that the sneaky covid was actually the real primary cause of death!! Or maybe it’s just the overwhelming covid juggernaut that steamrolls over trivial annoyances like negative tests.

Points for honesty though?

MINNESOTA LOONY COVID UCoD DEATH #6

LOONY COVID UCoD DEATH #6	
Certificate ID:	2022-MN-03****
Death Date:	10/11/2022
Age (Years):	76
Sex:	M
Place of Death:	DECEDENT'S HOME
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID TESTED POSITIVE AT DEATH
MCoD - ICD Assigned by CDC	I469, I509
Cause A	CARDIO RESPIRATORY ARREST
Time Cause A to Death	-
Cause B	HEART FAILURE
Time Cause B to Death	-
Cause C	COVID TESTED POSITIVE AT DEATH
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	-

If we read this death certificate literally, the decedent suffered heart failure which led to respiratory and circulatory cessation which was instigated by testing positive when he died. That's a mind-bender all right. Being (slightly) more serious, this looks like a textbook example of incidental testing of patients who are on their way 'out' where there is no reason to suspect covid has any clinical relevance.

MINNESOTA LOONY COVID UCoD DEATH #7

LOONY COVID UCoD DEATH #7	
Certificate ID:	2020-MN-04****
Death Date:	11/30/2020
Age (Years):	96
Sex:	F
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	Y
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID VISITATION AND INTERACTION RESTRICTION RELATED DEPRESSED MODE
MCoD - ICD Assigned by CDC	E039, I48, I500, R53, R54
Cause A	96 YEAR OLD NURSING HOME PATIENT EXPERIENCING GENERAL DECLINE
Time Cause A to Death	3 MONTHS
Cause B	COVID VISITATION AND INTERACTION RESTRICTION RELATED
Time Cause B to Death	3 MONTHS
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	CONGESTIVE HEART FAILURE; ATRIAL FIBRILLATION; HYPOTHYROIDISM; ELDERLY STATUS - 96 YEARS OLD; LOSS OF WILL TO LIVE

Loony death #7 is a comedy-tragedy.

The comedy is that the CDC ‘somehow’ ‘missed’ the minor detail that the death certificate clearly does not mean to convey that the decedent suffered from a clinical covid infection. “Covid visitation and interaction restriction related depressed mode” describes, however unartfully formulated, that the patient was DEPRESSED BECAUSE OF THE COVID **POLICIES**, not that the patient had covid herself!! ChatGPT could probably do a superior job to the super-secret CDC algorithm that assigns ICD codes.

The tragedy is that this patient was killed by the loneliness imposed by the barbaric, demented covid policies in nursing homes that utterly ravaged the poor seniors and treated them like disposable garbage.

MINNESOTA LOONY COVID UCoD DEATH #8

LOONY COVID UCoD DEATH #8	
Certificate ID:	2020-MN-02****
Death Date:	7/3/2020
Age (Years):	73
Sex:	F
Place of Death:	HOSPITAL - INPATIENT
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID-19 (UNCLEAR IF THIS WAS ACTIVE AT TIME OF DEATH)
MCoD - ICD Assigned by CDC	A419, E785, F179, I120, J440, K559
Cause A	SEPTIC SHOCK
Time Cause A to Death	-
Cause B	C DIFF COLITIS VS MEGACOLON
Time Cause B to Death	-
Cause C	PNEUMONIA
Time Cause C to Death	-
Cause D	COVID-19 (UNCLEAR IF THIS WAS ACTIVE AT TIME OF DEATH)
Time Cause D to Death	-
Other Causes	CHRONIC OBSTRUCTIVE PULMONARY DISORDER, HYPERTENSION, ISCHEMIC COLITIS, CHRONIC KIDNEY DISEASE, HYPERLIPIDEMIA

Can covid cause a death if it was 'inactive' at the time of death? I have no idea. Even if it was active, does it seem likely that the "unclear" covid was the primary CoD over the other six listed conditions (we'll grant the pneumonia as a sequelae of covid)?

I thought that CDC averred the whole notion that its ICD adjudication was basically a crapshoot. Silly me.

MINNESOTA LOONY COVID UCoD DEATH #9

LOONY COVID UCoD DEATH #9	
Certificate ID:	2021-MN-00****
Death Date:	1/10/2021
Age (Years):	93
Sex:	F
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	Y
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID-19 INFECTION IN HOSPICE PATIENT
MCoD - ICD Assigned by CDC	I10
Cause A	COVID-19 INFECTION IN HOSPICE PATIENT
Time Cause A to Death	DAYS
Cause B	-
Time Cause B to Death	-
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	HYPERTENSION

Another case of hospice covid. Yawn.

MINNESOTA LOONY COVID UCoD DEATH #10

LOONY COVID UCoD DEATH #10	
Certificate ID:	2023-MN-00****
Death Date:	1/15/2023
Age (Years):	75
Sex:	M
Place of Death:	HOSPITAL - INPATIENT
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID-19 INFECTION LIKELY INCIDENTAL FINDING; COVID-19 CONFIRMED
MCoD - ICD Assigned by CDC	G934, G935, G936, I619,
Cause A	CEREBRAL EDEMA WITH UNCAL HERNIATION
Time Cause A to Death	-
Cause B	ACUTE LEFT MIDDLE CEREBRAL ARTERY STROKE WITH RESULTANT CEREBRAL EDEMA AND HEMORRHAGIC TRANSFORMATION
Time Cause B to Death	-
Cause C	ACUTE ENCEPHALOPATHY FROM ACUTE STROKE
Time Cause C to Death	-
Cause D	COVID-19 INFECTION LIKELY INCIDENTAL FINDING; COVID-19 CONFIRMED
Time Cause D to Death	-
Other Causes	-

This time, the coroner was open that the patient was killed by ‘incidental covid’. Well, “likely” incidental. If you’re not sure whether the covid is incidental, doesn’t that by definition mean that there weren’t any symptoms of covid???

Yet the CDC ruled that here the “likely incidental” covid infection caused the acute stroke which caused the acute encephalopathy and so on.

But remember, the CDC insists “vaccinated 10 hours before death” obviously is intended to convey that the vaccine had NO side effects and played NO role in the death whatsoever.

MINNESOTA LOONY COVID UCoD DEATH #11

MINNESOTA LOONY COVID UCoD DEATH #11	
Certificate ID:	2020-MN-02****
Death Date:	6/8/2020
Age (Years):	73
Sex:	M
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	Y
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID-19 SUSPECTED, BUT TEST WAS NEGATIVE 5/31/2020 AND 6/2/2020
MCoD - ICD Assigned by CDC	F019, G819, I694
Cause A	NATURAL CAUSES
Time Cause A to Death	REMOTE
Cause B	COVID-19 SUSPECTED, BUT TEST WAS NEGATIVE 5/31/2020 AND 6/2/2020
Time Cause B to Death	REMOTE
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	VASCULAR DEMENTIA, HISTORY CEREBROVASCULAR ACCIDENT WITH LEFT SIDED HEMIPLEGIA.

This ME has even more gumption than the previous ME who overrode a negative test result - here he overrode not one but TWO negative tests. And in the face of vascular dementia and a prior stroke too.

MINNESOTA LOONY COVID UCoD DEATH #12

MINNESOTA LOONY COVID UCoD DEATH #12	
Certificate ID:	2020-MN-03****
Death Date:	8/1/2020
Age (Years):	36
Sex:	F
Place of Death:	HOSPITAL - INPATIENT
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	COVID-19, ELECTIVE SURGERY
MCoD - ICD Assigned by CDC	I269, I458, I469
Cause A	BRAIN DEATH SECONDARY TO PROLONGED PULSELESS-ELECTRICAL-ACTIVITY ARREST
Time Cause A to Death	24 HOURS
Cause B	MASSIVE SADDLE PULMONARY EMBOLISM
Time Cause B to Death	24 HOURS
Cause C	COVID-19, ELECTIVE SURGERY
Time Cause C to Death	3 WEEKS
Cause D	-
Time Cause D to Death	-
Other Causes	ORAL CONTRACEPTIVE, COVID-19 INFECTION MONTH PRIOR TO ELECTIVE SURGERY

This death certificate is a bit hard to parse. But we shall try nonetheless.

As we are all well aware, elective surgeries were mostly canceled in 2020 because of COVID MANIA™. There is less than a snowman's chance of survival jumping into an active volcano that an elective surgery was performed *on a covid positive patient* in 2020. Which is of course stipulated in Part 2 - "covid infection months prior to elective surgery".

So it would seem that there are two competing interpretations of the chain of events leading to the patient's death here:

1. Ancient resolved covid infection caused a 'massive' pulmonary embolism months after the fact

- The PE was a complication of the much more recent surgery (and which is a known potential complication of many surgeries)

This is practically not even a choice at all. Option #1, DUH.

MINNESOTA LOONY COVID UCoD DEATH #13

MINNESOTA LOONY COVID UCoD DEATH #13	
Certificate ID:	2021-MN-04****
Death Date:	12/12/2021
Age (Years):	52
Sex:	F
Place of Death:	DECEDENT'S HOME
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	DIAGNOSED WITH COVID 12/2, FOUND UNRESPONSIVE12/2 WITH NO RESPONSE TO CPR, DEATH PRESUMED RELATED TO COVID COMPLICATIONS
MCoD - ICD Assigned by CDC	-
Cause A	DIAGNOSED WITH COVID 12/2, FOUND UNRESPONSIVE12/2 WITH NO RESPONSE TO CPR, DEATH PRESUMED RELATED TO COVID COMPLICATIONS
Time Cause A to Death	-
Cause B	-
Time Cause B to Death	-
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	-

52-yo women without *any* known comorbidities or other medical conditions are typically mobile and active. So the fact that this lovely lady was *diagnosed* with covid suggests that the covid wasn't an acutely severe disease. Which should

indicate that her sudden death was caused by something else? (I think her vaccination status might be germane here. . .)

MINNESOTA LOONY COVID UCoD DEATH #14

MINNESOTA LOONY COVID UCoD DEATH #14	
Certificate ID:	2022-MN-05****
Death Date:	12/31/2022
Age (Years):	87
Sex:	F
Place of Death:	HOSPITAL - INPATIENT
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	INCIDENTAL POSITIVE COVID-19 STATUS AT TIME OF ADMIT.
MCoD - ICD Assigned by CDC	F179, I469, J449, R688, S270, W19
Cause A	CARDIO-PULMONARY ARREST SECONDARY TO MULTI-SYSTEM FAILURE AND DNR/ COMFORT CARE STATUS.
Time Cause A to Death	30 MINUTES
Cause B	L-PNEUMOTHORAX TREATED WITH CHEST TUBE. PT HAD REMOVED CHEST TUBE ON 12/28.
Time Cause B to Death	3 DAYS
Cause C	PALLIATIVE CARE CONSULT. FAMILY DECISION TO PROCEED WITH COMFORT CARE AND DNR/DNI STATUS
Time Cause C to Death	3 DAYS
Cause D	INCIDENTAL POSITIVE COVID-19 STATUS AT TIME OF ADMIT.
Time Cause D to Death	5 DAYS
Other Causes	PT HAD A PAST MEDICAL HISTORY OF COPD WHICH MAY HAVE CONTRIBUTED TO PNEUMOTHORAX AFTER FALL.

This case of death-by-incident-covid is confirmed 100% incidental. And in a patient who was receiving palliative care. In other words, she was already saying her goodbyes (over a hospital iPad probably).

So of course, the incidental covid “initiated the train of events leading directly to death”. DUH DUH DUH.

MINNESOTA LOONY COVID UCoD DEATH #15

MINNESOTA LOONY COVID UCoD DEATH #15	
Certificate ID:	2022-MN-00****
Death Date:	1/10/2022
Age (Years):	67
Sex:	F
Place of Death:	DECEDENT'S HOME
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	NATURAL DEATH. POSSIBLE COVID.
MCoD - ICD Assigned by CDC	F179, F319
Cause A	NATURAL DEATH. POSSIBLE COVID.
Time Cause A to Death	-
Cause B	-
Time Cause B to Death	-
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	BIPOLAR 1 DISORDER

“Natural death. Possible covid.”

CDC: Definitely covid.

Me: What’s her vaccination status?????

Even if you want to put a U07.1 for the “possible” covid, what is the basis for assigning it as the UCoD??? Shouldn’t the definitive diagnosis take precedence?

(This feels like “possible covid” was used to cover for another possibility that was considered less appealing. . .)

MINNESOTA LOONY COVID UCoD DEATH #16

MINNESOTA LOONY COVID UCoD DEATH #16

Certificate ID:	2020-MN-04****
Death Date:	11/3/2020
Age (Years):	90
Sex:	M
Place of Death:	DECEDENT'S HOME
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	PRESUMPTIVE POSITIVE COVID-19
MCoD - ICD Assigned by CDC	F03, H919
Cause A	PRESUMPTIVE POSITIVE COVID-19
Time Cause A to Death	DAYS
Cause B	-
Time Cause B to Death	-
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	DEMENTIA, IMPAIRED HEARING

I honestly have no idea what a “presumptive *positive* covid-19” is supposed to mean. I get a presumptive covid. But what does it mean to presume a test result that you don’t have?? If the standard for attributing a 90 yo dementia death to covid is merely that one ‘presumes’ a test would come back positive if you bothered to get the result, then pretty much every death in every nursing home is a covid death??

MINNESOTA LOONY COVID UCoD DEATH #17

MINNESOTA LOONY COVID UCoD DEATH #17	
Certificate ID:	2020-MN-01****
Death Date:	4/24/2020
Age (Years):	62
Sex:	F
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	PROBABLE COVID-19 DISEASE (FALSE NEGATIVE COVID-19 TEST SUSPECTED)
MCoD - ICD Assigned by CDC	G35, I10, I219, I500
Cause A	ACUTE SYSTOLIC CONGESTIVE HEART FAILURE
Time Cause A to Death	1.5 WEEKS
Cause B	ST-ELEVATION MYOCARDIAL INFARCTION
Time Cause B to Death	1.5 WEEKS
Cause C	PROBABLE COVID-19 DISEASE (FALSE NEGATIVE COVID-19 TEST SUSPECTED)
Time Cause C to Death	2 WEEKS
Cause D	-
Time Cause D to Death	-
Other Causes	MULTIPLE SCLEROSIS, HYPERTENSION

Another case of ME vs. negative covid test. At least they have the decency to describe the covid as “probable”.

MINNESOTA LOONY COVID UCoD DEATH #18

MINNESOTA LOONY COVID UCoD DEATH #18	
Certificate ID:	2022-MN-02****
Death Date:	7/2/2022
Age (Years):	85
Sex:	M
Place of Death:	OTHER - ASSISTED LIVING
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	RECENT COVID-19 , WITH (IN SETTING OF) ADVANCED DEMENTIA
MCoD - ICD Assigned by CDC	E112, F03, I119, I672, R628
Cause A	ADULT FAILURE TO THRIVE
Time Cause A to Death	REMOTE
Cause B	RECENT COVID-19 , WITH (IN SETTING OF) ADVANCED DEMENTIA
Time Cause B to Death	REMOTE
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	DIABETES MELLITUS TYPE 2, HYPERTENSIVE HEART DISEASE, ATHEROSCLEROTIC CEREBROVASCULAR DISEASE, CHRONIC KIDNEY DISEASE

So the covid caused the failure to thrive afterwards. Never mind the diabetes, heart disease, atherosclerosis, and kidney disease. It was obviously the recent covid infection that didn't produce any identifiable clinical sequelae.

MINNESOTA LOONY COVID UCoD DEATH #19

MINNESOTA LOONY COVID UCoD DEATH #19	
Certificate ID:	2020-MN-01****
Death Date:	4/30/2020
Age (Years):	79
Sex:	M
Place of Death:	NURSING HOME/LONG TERM CARE FACILITY
Lived in Nursing Home Y/N	N
Manner of Death:	NATURAL
Injury Description:	---
UCoD - ICD Assigned by CDC	U071
UCoD - Text	SUSPICIOUS FOR COVID-19 DESPITE NEGATIVE TEST RESULT
MCoD - ICD Assigned by CDC	A419, F03
Cause A	SEPSIS-LIKE SYNDROME
Time Cause A to Death	3 DAYS
Cause B	SUSPICIOUS FOR COVID-19 DESPITE NEGATIVE TEST RESULT
Time Cause B to Death	3 DAYS
Cause C	-
Time Cause C to Death	-
Cause D	-
Time Cause D to Death	-
Other Causes	DEMENTIA

“*Suspicious for covid despite negative test result.*” This sentence is so churlish that it refutes itself. Cuz there’s nothing else out there that could possibly cause sepsis in a 79 yo Long Term Care resident with dementia.
